A REVIEW OF '76 CONTINUES—PART TWO A Look At Walking Liberty & Franklin Halves, Morgan & Peace Dollars

The Market in Depth

ALLEN HARRIMAN

This first issue of 1977 will be devoted to a review of last year's activity in the Walking Liberty and Franklin half dollar series—and to the very volatile Morgan and Peace dollars. This is a continuation of the year-end review of the 1976 numismatic market.

HALVES: The Walking Liberty series was affected little if at all by the BU roll "promotion" which took place in early Spring. Without exception, the '34-'40 rolls enjoyed gains during '76. The big winner in this group was the 39-D roll—with an very impressive 60% advance (from \$500 bid in early January to \$800 in December); following rather closely behind is the elusive 39-P roll—up 43% for the year (\$770 vs \$540). The other advances of note include: 34-P up 19% (\$620 vs \$520) and 35-P & 36-P both up 10%. The 37-P and 40-P & S performed far less impressively with small gains of only 1%-3%.

In direct contrast to the plus signs registered by the above mentioned rolls, the 1933-39 singles were the victims of rather substantial profit-taking. The only exception is the very scarce choice MS-65 1933-S issue—which chalked up a moderate 8% gain during the year (\$525 vs \$485). The other widespread losses were as follow: 34-D 22%; 34-S 8%; 35-D 11%; 35-S 20%; 36-D 24%; 36-S 55% (this particular date was highly promoted in late '75); 37-D 20%; 37-S 25%; 38-P 9%; 38-D 3%; 39-S 12%. It should be remembered that, in addition to the 36-S, all of these issues were promoted rather extensively prior to January of this year and that, in general, current lower prices are simply the result of a normal "leveling out". If you compare present prices with those in January of 1975 you will find that all of these issues have made very impressive gains over the two year period.

The 1941-47 "short set" ended the year with the total bid for the individual rolls almost unchanged—\$7840 in January and an even \$7800 in mid-December. There were, however, several individual rolls which experienced relatively major price changes during the year—in both directions. The most important among these are: 41-S and 43-S both up 8% (\$1350 vs \$1250 and \$380 vs \$350 respectively); 45-D down 17% (\$275 vs \$335); 46-P up 14% (\$285 vs \$250); 46-D down 10% (\$285 vs \$320); 46-S down 24% (\$330 vs \$435) and 47-P & D up 13% and 10% respectively (\$375 vs \$330 and \$365 vs \$330).

The Franklin rolls were definitely involved in the big BU roll "push" in April and May. Between early January and late May bid for the thirty-seven rolls moved from \$4843 to \$5791—a substantial advance of 20%. Profit-taking, however, had reduced the overall year-end figure to a minus 2% for the series as a whole (the mid-December bid total was pegged at \$4760). Some individual roll performances of note included (the first percentage figure is the advance registered by late May; the second is the year-end advance): 49-D 36%, 11%; 49-S 28%, 2%; 50-P 23%, 6%; 51-D 31%, 4%; 52-D 91%, 30%; 56-P 24%, 5%; 58-P 24%, minus 4%.

DOLLARS: In discussing the Morgans they will be divided into several groups for meaningful comparison. For instance, the "common" S-mint rolls of 1879-82—these six issues lost an average of 11% during 1976; individual losses were: 78-S 19%; 79-S 10%; 80-S 12%; 81-S 5% and 82-S 10%. It should be noted that buyer interest is strong once again and that prices in recent weeks have again begun to move ahead (current bidders want rather large quantities). The 1878-84 P-mints, on the other hand enjoyed a rather successful year with an average gain of 11%—individual advances were as follow: 78-P 16%; 79-P 8%; 80-P 11%; 81-P 3%; 82-P 15%; 83-P 5% and 84-P 18%. Current buyer interest in these issues is only light to moderate.

The year's final results for the Carson City coins were thoroughly mixed—ranging from gains of 19% to losses of 5%. The 79-CC topped the gainers with an increase of 25% during the year (\$815 vs \$650). The second largest advances were reported for the key 89-CC and the very scarce 93-CC—both recorded 19% gains; others on the plus side of the ledger were: 90-CC up 11%; 91-CC up 13% and 92-CC up 14%. Three issues were virtually unchanged at year's end from their January beginnings—80-CC, 81-CC and 85-CC. The four losers were: 78-CC down 4% and the 81-82-83-CC issues which were each lower by 5%. Bid, by the way, for one each of the thirteen Carson City dollars in MS-65 condition totaled \$4566 in January and \$5392 in December. This is a reasonably substantial advance of 18% for the year.

All of the better New Orleans issues fared extremely well during '76—with gains ranging from 25% to a very strong 70%. (It should be noted that few if any of these O-mints were included in the "Redfield dollars" which reached the market early in the year—and, therefore, bidders have not had an easy time locating choice MS-65 specimens in this group. Individual gains for top performers were: 79-O 57%; 86-O 76%; 87-O 42%; 89-O 41%; 91-O 35%; 92-O 74%; 93-O 27%; 94-O 46%; 95-O 25%; 96-O 70% and 97-O 62%. The 1898-04 New Orleans rolls, in contrast, were mostly lower at year's end—the only gains being made by the 1900-O and 1903-O rolls (up a small 3% and 2% respectively). Losses by the other five issues in this group were: 98-O 9%; 99-O 7%; 01-O 21% (this one was leveling after a rather active "promotion" earlier in the year), 02-O 7% and 04-O 11%.

Now to the "Redfield" Morgans. All but a few of the 1878-04 S-mint issues were included in this unprecedented hoard of silver dollars. Quantities varied greatly, of course—but since no actual inventory of the dates included or quantities has been made public, we will, for our purposes, simply list the mostly quite substantial advances which have been registered by the 1883-04 issues during 1976 (the 1878-82 rolls have already been covered above). The largest single gainer was the 97-S—with an advance of 88% (\$60 vs \$32)—followed closely by the 91-S at 84% (\$46 vs \$25) and 87-S at 80% (\$63 vs \$35). The other gains in order of date are: 83-S 13%; 84-S 29%; 85-S 18%; 86-S 33%; 88-S 56%; 89-S 35%; 90-S 67%; 94-S 4%; 96-S 27%; 98-S 21%; 99-S 31%; 00-S 40%; 01-S 13%; 02-S 29%; 03-S 8% and 04-S 20%. Those seldom traded rarities 92-S and 93-S registered respective bid increases during '76 of 16% and 8%—but, of course, bids of MS-65 specimens very rarely receive any acknowledgement. The 1895-S issue, it should be mentioned, finished the year exactly where it began—at \$1500 bid.

The bid for one each of the twenty-four Peace dollars in MS-65 condition in January totaled \$1902—by mid-December this total had reached \$2827. This is a very substantial gain of 48%! Topping gains in this popular set is the 24-S—up 100% during the past twelve months (\$180 vs \$90). Other very notable winners include: 26-S up 90% (\$40 vs \$21); 25-S up 89% (\$110 vs \$58) and 28-S up 86% (\$160 vs \$86). The remainder of the series in order registered the following '76 gains: 21-P 27%; 22-D & 23-D both 30%; 22-S 43%; 23-S 52%; 26-P 44%; 26-D 53%; 27-P 33%; 27-D 45%; 27-S 38%; 28-P 28%; 34-P 33%; 34-D 51%; 34-S 48%; 35-P 32% and 35-S 50%.

It is generally agreed that all of the S-mint Peace dollars (with the exception of the key 34-S) were represented by quantities in the "Redfield" hoard. Strong promotions by numerous major dealers of both the Peace and Morgan Redfield was responsible for the greatest percentage of appreciation for these dollars. The current bid levels are more or less the result of the market being "supported" by at least a few of these same dealers. It cannot be stressed too frequently that when dealers bid for "MS-65" dollars, they are definitely buying only strictly MS-65 coins. Weakly struck coins or pieces with more than a minimum of minor bag marks or abrasions fall into the MS-60 or MS-60+ category—and do not command the bid prices currently listed in the MS-65 column of the price charts on page six!

With next week's issue we will conclude the review of market activities for 1976—covering the Eisenhower series, proof sets, mint sets and commemoratives.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$132.90 per ounce.

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MARKET CLOSING PRICES BU SILVER DOLLARS

Gem MS-65/70 singles are worth more than the MS-65 prices below. Roll prices are for average strikes for the issue. Choice full MS-65 rolls usually bring more than the listed prices; scarce and rare date rolls should be figured on the basis of the quality of the individual coins involved.

BARGAINS**ARE DANGEROUS!**

More people are "taken-in" by bargain offerings than by any other means in the coin market. With us the quality you pay for is the quality you receive. Our coin investment services may be the best deal you will ever find in numismatics. In addition to investment suggestions based on research analysis, we offer our clients these professional services:

1. Buying and selling at low fees
2. Investment quality at wholesale
3. Guaranteed payment
4. Teletype facilities
5. Free insurance
6. Integrity
7. Courtesy and service

Whether or not you have been discouraged in the past, now is the time to begin again with a professional approach to numismatic investing. While most people have done poorly over the last two years, our clients have made money. Write for free literature detailing our services. Do it now and we will include free our report on THE COMING BULL MARKET IN BU ROLLS. Call or write for details now! Ask for Mrs. Hecht at:

PART THREE OF THE 1976 REVIEW

The Year's Activity In Eisenhowers, Proof Sets And Commemoratives

The Market in Depth

ALLEN HARRIMAN

PLEASE NOTE that the January issue of the MONTHLY SUMMARY will accompany next week's regular CDN issue. This minor delay in publication is due to the fact that an excellent article on Seated Liberty Half Dimes was not in our hands early enough for mailing this week. It is felt that this article together with timely price charts is of sufficient importance to delay the MONTHLY SUMMARY for one week--and we are certain that subscribers will agree!

The following is the third and final part of our review of 1976 market activity--next week we will resume our regular market coverage.

EISENHOWER DOLLARS: Along with the announcement of the possible discontinuation of the Eisenhower series came an almost immediate rush to buy in this previously rather ignored area of the market. After all, this series was "brand new" in numismatic terms--yet when investors and collectors began to take a serious look at Ike dollars, many found to their surprise that there were already twenty-six issues in this 1971-76 series! (This is two more coins than in a complete set of Peace dollars.)

The big winner of the series during '76, of course, was the low mintage 1973-S 40% silver proof. It began the year with a bid level of \$17 and ended December at \$31--an increase of 82%. However, when virtually everyone had joined the buyer "bandwagon" in late October, bid reached \$40 and retail sales over convention bourse tables were frequently recorded as high as \$50. (At this \$40 peak, the gain from January was a quite impressive 135%.) But, in general, what goes up must come down--at least to a level more in line with true availability. The '73 "brown" Ike is--and likely will remain--the "key" of the series. Today's lower price is simply a reflection of more orderly and realistic trading.

The 1974-S 40% silver proof also cornered a large share of the action as the second lowest mintage issue of the series. It began the year at a quiet \$5.50 and reached a peak of \$12 bid about the same time as the 73-S version. This was a gain of 118%. Normal profit-taking reduced the bid to \$10.35 by the end of December--still a very respectable 88% for the year.

Other strong gainers for overall 1976 include: 1972-S 40% BU--up 21% (\$3.35 vs \$2.75); 1972-S 40% proof--up 55% (\$7.60 vs \$4.90); 1973-P & D clad BU--up 37% (\$7.75 vs \$5.65); 1973-S clad proof--up 40% (\$3.50 vs \$2.50) and 1974-S clad proof--up 24% (\$3.10 vs \$2.50).

When the Eisenhower roll set was added to the CDN charts at the beginning of August, the bid was registered at \$1650. It advanced very rapidly to \$2500 by late October (up 51% in three months)--with bid levelling at \$2350 by year's end (still a gain of 42% since early August). Interest is still evident in this series. Those who waited for the initial flurry of buying to pass are now in a far better position to put away sets or roll sets at reasonable levels. It will definitely be very interesting to see what occurs if and when the series is officially ended.

PROOF SETS and MINT SETS: The early 1936-42 proof sets fared rather well during '76--with an average gain of 14% for the eight sets involved. This figure would have been greater but for the "no gain" situation registered by the '39 set which began and ended the year at \$260 bid. Individual advances for the other issues: 1936 up 7% (\$1295 vs \$1200); 1937 up 13% (\$650 vs \$575); 1938 up 18% (\$325 vs \$275); 1940 up 19% (\$215 vs \$180); both 1941 and 1942 up 17% (\$205 vs \$175) and 1942 (t2) up 18% (\$255 vs \$215). It might be noted here that during '76 proof Mercury dimes advanced 20% (\$60 vs \$50) and proof Walking Liberty halves gained an even more substantial 25% (\$125 vs \$100.)

The only winner in the 1950-55 group was the rather popular '53 set (up 10%--\$37.50 vs \$34); the other six issues (which includes both versions of the '55 set) lost an average of 12%--with the '52 set recording the greatest drop (down 20%--\$87 vs \$97.50). The 1956-64 sets registered more losses than gains. The only two gainers were '58 (up 8%) and '60 "small date" (up 4%); the remaining sets averaged a loss of 8%--with the '56 issue unchanged at \$9.50 bid.

The later S-mint sets performed very poorly during this past year--the '68 thru '74 versions averaging a loss of 24%! All of the seven regular issues in this group shared about equally in the losses--with buyers experiencing little difficulty in locating quantities of any date. The current interest in proof S-mint Kennedy halves tended to "firm up" prices just a bit by year's end.

The 1975-S set ended '76 with a loss of only 5% (\$21 vs \$22), having held its price very well in the face of a generally "down" proof set market. Quantities of this issue remain quite elusive--most offerings consist of only a few sets with few bargain price tags encountered. The 1976-S set hit the charts at \$20 bid in early February, it moved ahead slightly to \$21 with a couple of weeks and from March thru December it was "downhill all the way"--ending the year at \$9.75 bid (down 54% from the high of \$21). In contrast to the 75-S set, quantities of the 76-S version are easily located on today's market.

Note that all of the proof set "varieties" registered advances during the past year. The 1960 "small date" was previously mentioned with a small gain of 4%; the '70 S "small date" set moved ahead 13% (\$42 vs \$37). The three sets with "Philly" proofs fared as follows: 1968 S ("P" dime) up 3% (\$6700 vs \$6500); 1970 S ("P" dime) up 12% (\$550 vs \$490) and the 1971 S ("P" nickel)

up 40% (\$900 vs \$640.)

The three "Special Mint Sets" perked up a bit during the last months of '76 due to interest in rolls of Kennedy halves from these issues--gains were: 1965 up 4%, 1966 up 2% and the somewhat more elusive 1967 up 14%. The volatile 1970 and 1973 mint sets registered respective gains of 9% and an impressive 50% in very active trading throughout the year. Prices for the remaining issues in the mint set group has been based almost entirely upon the pro-rated prices for the single coins involved--trading was at best light to moderate during 1976.

COMMEMORATIVES: The fifty silver commems which comprise a "type set" were bid at a total of \$6099 at the beginning of the year--and at \$6605 the last week of December. This is a moderate 8% overall advance for the year. Individual performances of various issues, however, varied widely; some of the highlights are: Isabella quarter up 27% (\$242 vs \$190); Lafayette dollar up 33% (\$800 vs \$600), Alabama up 17% (\$205 vs \$175); California up 22% (\$54 vs \$44); Grant up 16% (\$56 vs \$48); Huguenot up 28% (\$54 vs \$42); both Missouris up 14% (\$525 vs \$460); Pan-Pac up 16% (\$325 vs \$280) and the Texas type coin (no '34) up 29% (\$40 vs \$31.)

Some of the PDS sets, in direct contrast performed rather badly during '76. The five Arkansas sets were bid at a total of \$1047 in January and \$877 in December--a loss of 16% and the Boone issues dropped from \$1780 to \$1527 during the year (a 14% loss.) The total bids for the various Oregon issues were virtually unchanged during 1976 mostly on the strength of a 57% gain for the 1938 set (\$176 vs \$112) and smaller advances for the 1928 single (up 30%) and the 1936-S single (up 12%). All other Oregons showed varying losses for the year. A major mid-year buying campaign (mostly by one major dealer) resulted in an overall 37% gain for the Texas issues--the complete set being bid at \$660 in January and \$909 by the end of December!

The eleven gold commems were bid at a total of \$5740 at the beginning of the year and \$6515 at the end--a gain of 13% for the complete set. All issues participated in this advance except the \$2 1/2 Sesqui (which registered a 12% loss during the year.)

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$131.30 per ounce

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

BARGAINS**ARE DANGEROUS!**

More people are "taken-in" by bargain offerings than by any other means in the coin market. With us the quality you pay for is the quality you receive. Our coin investment services may be the best deal you will ever find in numismatics. In addition to investment suggestions based on research analysis, we offer our clients these professional services:

1. Buying and selling at low fees
2. Investment quality at wholesale
3. Guaranteed payment
4. Teletype facilities
5. Free insurance
6. Integrity
7. Courtesy and service

Whether or not you have been discouraged in the past, now is the time to begin again with a professional approach to numismatic investing. While most people have done poorly over the last two years, our clients have made money. Write for free literature detailing our services. Do it now and we will include free our report on THE COMING BULL MARKET IN BU ROLLS. Call or write for details now! Ask for Mrs. Hecht at:

SILVER COMMEMS REGISTER STEADY GAINS Bidder Interest Noted For Franklins And Other BU Rolls

The Market in Depth

ALLEN HARRIMAN

For several weeks now silver commems have been registering moderate but steady gains. The current buying is primarily (but not exclusively) being done by a single bidder—one of the country's major commem dealers. And, so far, price advances have been limited almost entirely to those issues which are necessary for fifty-piece "type sets". Many of the commems being purchased by this major buyer are being "put away" by a group of investors who see excellent medium to long term investment possibilities in relation to current prices. A spokesman for the buying firm reports that, in spite of recent higher bid levels, the volume of purchases has been moderate at best. A few small "hoards" have apparently been enticed into the marketplace—but demand from the investor group and others still exceeds the available supply of choice pieces.

Needless to say, current buyers are definitely "quality conscious"—but, on the otherhand, they are not expecting "the impossible" by demanding only MS-70 gems. The above mentioned major buyer, as well as those other dealers who are presently in the silver commem market, are definitely accepting the MS-65 specimens which are offered to them.

Note that bid for the complete fifty-piece "type set" has advanced to \$6800 this week. As a matter of record, it should be mentioned that this particular higher bid is the result of another major commem dealer's attempt to locate a few complete sets. Bids, by the way, for the fifty individual coins total only \$6787 this week. This is the first time in well over a year that the bid for complete sets is over the bid for the individual fifty coins—an interesting and possibly enlightening fact!

Most of the PDS sets—particularly the high-powered ones—as well as such issues as the Grant "with star", are not included on current buying lists. There are those who feel that the numerous issues which are not needed for "type sets" will continue to lag behind. Others, in contrast, are of the opinion that, as prices for the fifty-piece set issues move ahead, the scarce PDS sets and singles will begin to look more and more attractive to investors. This, of course, remains to be seen. However, as those interested in commemoratives know, there can only be a possible total of 2,003 complete 144-piece sets assembled—ever—since this is the mintage of the "key" 1935/34 Boone set.

The current lack of interest in many "better" dates at the moment is perfectly illustrated by the \$540 bid for either of the two Missouri issues—even though the "plain" version is three times as plentiful as the "2x4" variety (15,428 vs 5,000). Another example is the \$780 bid recorded exactly two years ago for the above mentioned '35/34 Boone set—and presently bid at only \$540 (down 30%). Two of the three coins in this rare set have mintage figures of only two thousand each!

CENTS: Several teletype dealers are in the market for choice to gem BU early Lincolns. They want, of course, fully-struck and spot-free pieces—and most are willing to pay "anything reasonable" to get them. As one dealer recently stated, "Throw the Redbook away and just price 'em!" Bids this week, as an example, for a "choice, original BU" 1922-Plain have ranged from \$1500 to \$2500 (with none located, of course).

NICKELS: Last week's advance to \$800 bid for BU roll sets wartime Jeffersons has, thus far, proven ineffective. (The individual bids for the eleven rolls involved currently totals \$850.) The Buffalos and the rest of the Jefferson series remains very quiet—with a few below-market bidders trying to locate quantities of their favorite issues.

DIMES: Most of the Mercury rolls—especially the 1934-40 issues—are still enjoying strong demand. Noting the futility of constantly raising the bid, most bidders are sticking to present levels (with just an occasional price being edged higher here and there). Several buyers have also turned their attention to the Roosevelt series—again mostly without disturbing the current price structure (five to fifty roll quantities of many issues are wanted).

QUARTERS: The 1948-S roll has just been listed as a "sleeper" by a leading advisory publication and, as a result, the teletype bid has jumped from \$64 to

\$75 in one week—with other potential buyers asking for "quotes" and obviously willing to pay more. It is interesting to note how much effect a little "guidance" can have on many investors! Other Washington rolls receiving mild attention (and some plus signs) are 1953-P, 1954-S, 1955-D and 1958-P.

HALVES: Considerable buying interest in the Franklin series is evident; several dealers will take "up to ten rolls" of each date in the series and others are in the market for complete BU roll sets. Although some bidders are still looking for bargains, there are those who have begun to edge offering prices higher. Among this week's advances:

1948D - Bid moves up to \$115; few rolls located.

1953D & S - Now bid at a higher \$56 and \$120 respectively.

1955P - Several dealers want this popular issue—now at a higher \$122.

1956P - Also wanted in quantity—bid moves to \$69.

DOLLARS: In two weeks the 1900-O roll has jumped from \$150 to \$175 bid—and relatively few rolls have changed hands. Also on several "want lists" are the 1899-O and 1901-O rolls (both of which are rather elusive at the moment). Numerous ~~buyer~~ buyers are showing interest in most of the other common date Morgans—particularly the 1878-82 "S-mints" (all are wanted in quantity). The very, very scarce 1884-S, 1901-P and 1934-S singles have again registered gains in full MS-65 condition—with no choice specimens offered for sale.

PROOF SETS and MINT SETS: Very little activity is noted in this quiet area of the market. A few dealers run their usual "bargain hunting" teletype buying lists—and those who need a few sets quickly pay the current price. The Canadian proof-like sets are receiving some attention from two major buyers—several more plus signs have been added to the chart this week.

COMMEMORATIVES: See "The Market in Depth".

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$132.80 per ounce.

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MARKET CLOSING PRICES BU SILVER DOLLARS

Gem MS-65/70 singles are worth more than the MS-65 prices below. Roll prices are for average strikes for the issue. Choice full MS-65 rolls usually bring more than the listed prices; scarce and rare date rolls should be figured on the basis of the quality of the individual coins involved.

CIRC TYPE IS NOT DEAD

It's stacked up in our back room! But we're not complaining—we sell it, sooner or later . . . And in order to sell it, we must buy it—and that's where you come in. Don't tie your money up in it when we're willing to pay you very good prices, just to add it to our pile! When you're ready—please call.

BARGAINS ARE DANGEROUS!

More people are "taken-in" by bargain offerings than by any other means in the coin market. With us the quality you pay for is the quality you receive. Our coin investment services may be the best deal you will ever find in numismatics. In addition to investment suggestions based on research analysis, we offer our clients these professional services:

1. Buying and selling at low fees
 2. Investment quality at wholesale
 3. Guaranteed payment
 4. Teletype facilities
 5. Free insurance
 6. Integrity
 7. Courtesy and service
- Whether or not you have been discouraged in the past, now is the time to begin again with a professional approach to numismatic investing. While most people have done poorly over the last two years, our clients have made money. Write for free literature detailing our services. Do it now and we will include free our report on THE COMING BULL MARKET IN BU ROLLS. Call or write for details now! Ask for Mrs. Hecht at:

BU ROLL ACTIVITY ON THE INCREASE

Silver Commems Continue Advance; Common Date Morgan Rolls In Demand

The Market in Depth

ALLEN HARRIMAN

Activity has increased considerably across the BU roll market—from the wartime Jefferson issues thru most of the lower priced Morgan rolls. Plus signs are rather liberally scattered across the charts this week as a result of some major roll buyers entering the arena. Interestingly, sales have remained quite limited; not too many dealers seem to have the rolls wanted—or, perhaps, they expect higher prices in the coming weeks.

Several subscribers have written to ask if the bids quoted for BU roll sets (page four) are simply the totals of the bids for the individual rolls included in the particular series. The answer, of course, is no. Bid levels for complete roll sets are separate bids—attempts by dealers to buy already completed roll sets rather than assembling them roll by roll. Generally, the less active a series is the lower the bid will be in relation to the total individual roll bids. At the moment, for instance, there is an approximate ten percent “built-in discount” on bids for roll sets of 1934-58 Lincolns and 1938-64 Jeffersons. Slightly more interest is evidenced for the Roosevelt series with an approximate eight percent discount currently noted on roll set bid. These, during the past several months, have been series attracting only light investor attention and prices for the individual rolls have remained more or less static. Therefore, most dealers are content to bid eight to ten percent less—and to wait for a seller.

On the otherhand, those series which are experiencing moderate to rather heavy investor demand tend to reflect bids for complete BU roll sets which are much closer to the total bids for the separate rolls. Current examples: the Franklin roll set which is bid this week at \$4675—with the single roll bids totalling \$4706 (less than a one percent discount); bid for the Kennedy roll set is now registered at \$1300—the thirty-two separate rolls are bid at \$1329 (a two percent discount). The complete twenty-six roll set of Eisenhower dollars is bid this week at \$2250—with the roll bids totalling virtually the same at \$2260!

For BU roll sets which are now rarely encountered—such as the 1934-38 Buffalo nickels, the 1934-45 Mercuries or the 1941-47 Walking Liberties—bids usually range a small two to five percent under. The 1941-64 Washingtons, at the moment, fall in between with a current six percent discount noted on the roll set bid (\$6250 vs \$6636).

A major concern for buyers of already completed roll sets is that often a few “shakey” rolls are included in the package. Investors should take the time to examine such purchases thoroughly—and it should be remembered that it is not only the “key” dates which are subject to this problem!

This Week's Market

CENTS: The 1922 “plain” Lincoln is needed by several bidders—and very, very few properly graded specimens are being offered for sale (check this week's higher bids on page four). The “key” of the late date regular issues—the 1969-P roll—is now receiving quantity bids of \$5.50 (and the buyer will take original bags at a slightly higher price). As usual, of course, only choice rolls are wanted.

NICKELS: Most of the wartime issues are carrying plus signs this week—yet most sellers seem reluctant to part with rolls even at these higher levels. Bid for the complete eleven roll set has now edged up to \$810—still with none listed for sale (total bids for the individual rolls this week is \$859). The often popular 1955-P roll is appearing once again on a few “want lists”; potential buyers will take “up to fifty rolls” at a slightly advanced \$15.50. The “highly promoted” 1974-S proof Jefferson roll has slipped into a lower \$115-\$125 range.

DIMES: Numerous dealers are still in the market for choice early Mercury dimes with “full bands”; several are expressing their willingness to pay even more than the prices recorded in the January MONTHLY SUMMARY issue by asking for “any reasonable quotes” on the dates they need. Gains among the later S-mint Mercury rolls include:

1937-S & 1938-S - Bids move to \$650 and \$510 respectively
1939-S - A very elusive roll; bids of \$750 are totally ineffective
1942-S, 1943-S and 1944-S - All register higher bid levels (see page three)
Winners in the Roosevelt series are: 1948-D, 1949-S, 1950-S and 1955-D

QUARTERS: Five or six dealers now want the suddenly “hot” 1948-S roll which was mentioned last week. Bid has jumped to \$90! This is a two-week increase of 40% (from the \$64 recorded in the January 14 CDN issue). Other Washington

rolls currently evading bidders are: 1937-P (bid has moved up to \$635), 1950-D and 1953-P (bid now at \$105 and \$68 respectively), 55-D and 58-P (receiving bids of \$86 and \$41). Higher bids of \$1800 fail to produce any “choice MS-65” complete silver Washington sets (1932-64). The scarce 1913-S Barber, by the way, has registered further gains in Good and Very Good (see page four).

HALVES: Walking Liberty rolls are firm at present levels—very few find their way onto selling lists. Bidders frequently ask for “choice fully struck MS-65” specimens of the 1941-45 San Francisco issues—and they are willing to pay a “premium above ask” for the right pieces. The Franklin series remains active—with gains noted for 1954-S (bid now \$92), 55-P (wanted in quantity at \$126) and 1956-P (also wanted in quantity—at \$70). The Franklin BU roll set is unsuccessfully bid at a higher \$4675—with choice single sets trading as high as \$250!

DOLLARS: Quite a bit of activity is suddenly evident in the Morgan series—mostly in the “common date” category. The two or three major teletype bidders in this area want from “several” up to as many as fifty rolls of numerous issues. Small quantities of a few of the “Redfield” dates are listed for sale at slightly lower prices. Mild profit-taking is still plaguing the Eisenhower series—but scattered investors still show interest in complete roll sets.

PROOF SETS and MINT SETS: Light trading within current levels is the rule—with the usual bargain-hunting being encountered. The ‘37 and ‘38 sets are rather elusive at present respective bids of \$650 and \$325.

COMMEMORATIVES: This week is virtually a repeat of the last several—with the addition of substantially higher bids for four of the high-powered PDS sets (‘38 & ‘39 Arkansas, ‘37 & ‘38 Boone). Bid, by the way, for “choice MS-65” type sets is now \$7000—yet the total individual bids for the fifty coins is only \$6841 (an increase over last week's reported premium for complete sets).

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$131.40 per ounce.

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

BARGAINS ARE DANGEROUS!

More people are "taken in" by bargain offerings than by any other means in the coin market. With us the quality you pay for is the quality you receive. Our coin investment services may be the best deal you will ever find in numismatics. In addition to investment suggestions based on research analysis, we offer our clients these professional services:

1. Buying and selling at low fees
2. Investment quality at wholesale
3. Guaranteed payment
4. Teletype facilities
5. Free insurance
6. Integrity
7. Courtesy and service

Whether or not you have been discouraged in the past, now is the time to begin again with a professional approach to numismatic investing. While most people have done poorly over the last two years, our clients have made money. Write for free literature detailing our services. Do it now and we will include free our report on THE COMING BULL MARKET IN BU ROLLS. Call or write for details

now! Ask for Mrs. Hecht at:

ACTIVE MARKET CONTINUES; DOLLARS IN DEMAND

Fewer Dealers Look For Bargains As Serious Bidding Increases

The Market in Depth

ALLEN HARRIMAN

Less and less "bargain-hunting" is being noted on the various teletype circuits. This doesn't mean that dealers have given up on locating any material at prices below general market levels—but it does indicate that many serious bidders are anxious to buy and that they are willing to pay prevailing prices (or, in many cases, a little more) in order to locate the coins they need. There still appears, of course, the usual lengthy buying list with prices ten or even fifteen percent below bid. But these lists are simply ignored. In the silver commem series, for instance, one major buyer has been increasing bids steadily for several weeks now—with moderately successful results. And still a couple of other dealers regularly offer to pay "ten percent below bid" for the same coins. Occasionally these teletype messages follow each other on the tapes! Obviously the dealer with MS-65 specimens to sell will ship them to the higher bidder—with, perhaps, the "super sliders" and MS-60 pieces going to the lower bidder. (It should again be emphasized that the dealer who is currently raising bid levels for silver commems is not asking for "superb" coins—only strictly MS-65.)

This phenomenon of bid level disparity is also noticeable in the BU roll market—from Lincolns thru silver dollars. Those dealers who want rolls for specific reasons—whether it be for customers, for stock or for investment—are offering to pay at least bid. On the other hand, an occasional optimistic bidder will offer to buy practically any date in the Franklin series, as an example—but at a substantial discount from current levels. These below-market bidders, it would seem, are more or less inviting the shipment to them of less than choice material. It would seem logical that a seller would ship a somewhat inferior roll to the bargain-hunter and get top dollar for his choice material.

As was mentioned last week, the entire BU roll market is showing increasing strength. The current interest does not seem to be the result of any specific "promotion"—but rather an indication that numerous dealers and investors might feel that current prices are "the bottom line" and that selective and orderly buying is now in order. Price advances are cautious and usually occur after attempts to buy at present levels have been unsuccessful. There is, of course, the school of thought that raising bids tends to make buying more difficult—encouraging potential sellers to "wait and see" just how much higher prices might go!

This Week's Market

CENTS: Again this week the elusive 1922-plain has registered gains across the board; bidders will take "up to ten pieces" of each grade thru XF—but only scattered singles have been located. Those several dealers who are in the market for "gem BU" early Lincolns are also having very little luck; numerous bidders are apparently a bit surprised at how difficult it is to locate the earlier mint-marked issues in fully struck, original color and spot-free condition! Low grade Flying Eagles and 1859 Indians, by the way, are currently wanted in large quantities at slightly higher levels.

NICKELS: At present bid levels the 1937-D "three legged" Buffalo is eluding potential buyers almost as successfully as the '22-plain—regular bidders find only an occasional specimen or two. A few dealers are bargain-hunting in the '34-'38 Buffalo series—perhaps hoping that recent static prices might mean that below-market bidding will produce results. The fact is, however, that virtually any roll located at a "bargain price" is probably inferior in one way or another (weakly struck, cleaned, spotted, etc.)

DIMES: Advances continue to be recorded by the Mercury rolls—gains this week have been noted for: 1937 P (bid now at \$225), 1939-D & S (bid respectively at \$275 and \$760), 1943-D & 1944-D (both now wanted at \$133) and 1944-S (tough at a higher bid of \$141.50). Bidders remain moderately active in the Roosevelt series—but they are carefully leaving present bid levels undisturbed. Sales in both series have been quite limited throughout the week.

QUARTERS: Several dealers are running frequent and rather lengthy buying lists for various Washington rolls—particularly the issues in the 1941-55 group. Again, the majority of buyers simply offer to "pay bid"—but an anxious few have raised some prices.

1945P - This sometimes elusive date has edged up to \$56 bid

1948S - Still "hot"—at least two dealers will now pay \$95!

1950D & 1953P - Following last week's example, both again move higher with respective bids of \$110 and \$69

HALVES: Bag quantities of "any Franklin under \$40" are wanted—with the minimum bid moving up to \$37.50. The few sellers who can be found are keeping their price tags just ahead of increasing bid levels—as a result, very few quantity sales have been noted. (See page three for the numerous plus signs.)

DOLLARS: Many teletype dealers want silver dollars! Cirs are wanted in bag and multi-bag quantities—with the higher grade common dates registering gains (chart on page four). Last week's surge of interest for common date Morgan rolls continues; prices again move ahead for a number of dates and bidders often ask for ten to twenty-five rolls. The scarce and rare dates in both series, it might be mentioned, are also in demand—particularly, of course, in top condition.

PROOF SETS and MINT SETS: This area remains basically unchanged. The '37 and '38 sets are difficult to locate—small gains have been recorded. Slightly lower prices are noted for the '70 and '73 mint sets—but sales are still rather brisk for these two popular issues.

COMMEMORATIVES: The "type" issues are still on the move! This week's gains have been rather substantial in several instances—especially for the suddenly awake '38 and '39 Arkansas and the '37 and '38 Boone PDS sets. Several of the Oregon issues have also been added to the "plus column". Continued bidding of \$7000 fails to produce any "choice" complete fifty-piece sets!

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$132.80 per ounce.

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

BARGAINS ARE DANGEROUS!

More people are "taken in" by bargain offerings than by any other means in the coin market. With us the quality you pay for is the quality you receive. Our coin investment services may be the best deal you will ever find in numismatics. In addition to investment suggestions based on research analysis, we offer our clients these professional services:

1. Buying and selling at low fees
 2. Investment quality at wholesale
 3. Guaranteed payment
 4. Teletype facilities
 5. Free insurance
 6. Integrity
 7. Courtesy and service
- Whether or not you have been discouraged in the past, now is the time to begin again with a professional approach to numismatic investing. While most people have done poorly over the last two years, our clients have made money. Write for free literature detailing our services. Do it now and we will include free our report on **THE COMING BULL MARKET IN BU ROLLS**. Call or write for details now! Ask for Mrs. Hecht at:

NEW COMPLETE CIRC DOLLAR CHART BEGINS THIS WEEK

Increased Trading In Circ Dollars Warrants Addition Of Bid-Ask Prices For Entire Series

The Market in Depth

ALLEN HARRIMAN

With this issue the CDN introduces a new price chart covering ALL DATES in both the Morgan and Peace dollar series--in ALL GRADES from Good thru AU! These bid-ask prices will appear each week on page five (with the various charts for "type" material having been relocated on page four.) Since the rather recent addition of our second publication, prices for the other "circ key date singles" were being reported in both the weekly and the MONTHLY SUMMARY. This dual reporting offered us the logical space for this entirely new circulated dollar listing without sacrificing any valuable market coverage--and, in addition, keeps the CDN as concise and convenient for subscribers as always. Prices in this new chart have been researched for a number of weeks now and they reflect the most up-to-the minute levels in an area which has enjoyed a considerable increase in trading over the past few months.

It should be pointed out to subscribers that the "AU" grade is one of the most abused in all of numismatics--and nowhere is it more so than in the dollar series. A quick check of many "retail" ads will reveal selling prices for this grade which are well below the bid levels listed in our new page five chart. Such coins are generally nice XF's with a bit of luster--if that! True AU pieces, of course, are specimens with very little wear and with most of the original luster intact--in other words, an "almost uncirculated" coin! Our bid levels for this grade in particular have been thoroughly checked with knowledgeable and reputable dealers who specialize in this area. While in numerous instances they do not bear much resemblance to prices published by some of the newer entrants into the "pricing guide" field, our price levels represent accurate bids for coins which fall at least solidly into the AU-50 category.

NOTES ON PROOF SETS: The proof set market has basically been quite steady for some time now. There are, of course, the usual "bargain oriented" buying lists--but serious bidders who want choice sets regularly offer to pay bid--or frequently just a bit more in order to facilitate purchases. The earlier sets (1936-42) are, as always, rather difficult to locate in top condition--a large percentage have a "problem" of one sort or another. These problem sets, however, are not always described as such in teletype selling lists. The price tag, however, is generally the clue. When a major bidder regularly offers to buy, say, choice 1938 sets at \$335--and, virtually at the same time, another dealer is offering to sell at \$300, it is clear that this seller knows his set will not stand up to the requirements of choice, spot-free material. Less than choice sets, obviously, bring prices commensurate with the problems of the particular set. THE CDN PRICING STAFF MAKES CERTAIN THAT LOWER TELETYPE SELLING PRICES ARE FOR CHOICE SETS BEFORE LOWERING BID LEVELS!

This brings us to an interesting point. Lately we have seen specific bid-ask prices published for "slightly spotted" sets. There are, of course, absolutely no established teletype trading levels for such sets--simply because phrases like "slightly spotted" are totally meaningless. What could they mean? How many spots are "minor"? Which coin (or coins) is spotted? Is the spot (spots) on the cent or nickel (which cannot be cleaned) or on the silver coins (which many times can be dipped without any sacrifice of quality)? We note above our proof set chart that "spotted or otherwise inferior sets (hairlines, etc.) bring 10%-25% less according to quality." Sellers of such sets--particularly those sets above the \$10 range--usually describe what is wrong with the particular sets involved--and attach price tags accordingly. Occasionally "lots" of inferior later date sets are traded at an approximate discount of 10%--but even then reliable sellers usually indicate the extent of the problems.

This Week's Market

CENTS: The 1968-74 proof Lincoln rolls have all been offered at lower levels this week--but reduced prices have sparked very little buyer interest. The strangely elusive 1969-P roll, on the otherhand, has registered another advance; one major buyer still wants bag quantities of choice rolls--and will now pay \$6 per roll (or \$625 per bag.) The 1977-P & D rolls have just hit the teletype circuits--with first selling prices ranging from \$65 to \$75 per bag.

NICKELS: As with the Lincolns, proof Jefferson rolls have recorded minus signs across the entire 1968-76 group--again with few if any transactions noted. (There are one or two dealers who will take both the cent and nickel proof rolls--but the prices they offer to pay are well below even current low levels.) Choice and gem BU Buffalos remain on numerous "want lists"--see the "comparative rarity" study in the enclosed February issue of the MONTHLY SUMMARY.

DIMES: Bid levels have again been raised for a number of Mercury rolls--and bidders are having practically no success with their higher offering prices. It should be remembered that dealers want strictly choice rolls at these prices--not "put together" rolls containing a sprinkling of "slider" or MS-60 coins.

1936-P & 1937-P--These two are now receiving bids of \$250 and \$235 respectively.

1939-D--Bid moves to \$290--and one dealer will pay a bit more for "quick delivery."

1941-S & 1942-D--Both are now bid at a higher \$190.

1944-D & S--Bids of \$135 and \$150 fail to produce the desired results.

1949-S--This Roosevelt roll has registered another gain--bid is now \$625.

QUARTERS: The 1937-P roll is eluding all bidders--at a higher \$660; only one or two 1948-S rolls have been located by the dealers who are still willing to pay \$95. In general, however, prices are firm in the Washington series--and sales light to moderate.

HALVES: A substantial jump--to \$400--in the bid level for choice 1947-P rolls hasn't proven very effective; the 1947-D seems almost as elusive with frequent bids of \$365 providing virtually no results. Bag quantities of BU Franklin rolls are now on even more buying lists--with at least one anxious dealer now willing to pay \$3850 for "original, solid-date bags!"

DOLLARS: "Want lists" continue to lengthen in this area! Buyers want all sorts of dollars--common date VG/better bags, higher grade common dates by the roll, BU bags and, of course, the scarce and rare dates in all grades. Gains have been noted this week for two issues which are very, very difficult to locate in strictly choice MS-65 condition--1886-O and 1892-O. Also on buying lists are "any CC dollar in VG" at a higher \$8 and 1934-D & S, 1935-P & S in VG at \$5 each (these are all wanted in large quantities.)

PROOF SETS and MINT SETS: Several Canadian prooflike sets have been moving ahead steadily in recent months; top among these are the 1954, 1955 and 1956 sets--this week's higher respective bids are \$235, \$120 and \$80. The 1970 and 1974-76-PL sets are also surprisingly tough to find in quantity--see page six for the latest bids.

COMMEMORATIVES: Numerous plus signs again appear in the MS-65 column--and they have been joined this week by a number of gains for XF/AU pieces. Current bidders definitely want quantities of virtually all of these issues and they will take all properly graded coins. There are a few sellers "at bid"--but more often than not the specimens being offered are less than choice (UNC-60 or so) and in many instances they are coins which have been rejected once--or twice--before. Obviously there would be little point in offering to sell at less than another dealer is ready and willing to pay unless it is known that the quantity is not quite all there. Generally, UNC-60 silver commems sell for 5%-10% under the MS-65 bid levels (with a greater discount allowed for the more expensive key and semi-key issues.)

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figures on a basis of gold at \$136.30 per ounce.

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MARKET CLOSING PRICES BU SILVER DOLLARS

Gem MS-65 70 singles are worth more than the MS-65 prices below. Roll prices are for average strikes for the issue. Choice full MS-65 rolls usually bring more than the listed prices. Scarce and rare date rolls should be figured on the basis of the quality of the individual coins involved.

BARGAINS ARE DANGEROUS!

More people are "taken-in" by bargain offerings than by any other means in the coin market. With us the quality you pay for is the quality you receive. Our coin investment services may be the best deal you will ever find in numismatics. In addition to investment suggestions based on research analysis, we offer our clients these professional services:

1. Buying and selling at low fees
2. Investment quality at wholesale
3. Guaranteed payment
4. Teletype facilities
5. Free insurance
6. Integrity
7. Courtesy and service

Whether or not you have been discouraged in the past, now is the time to begin again with a professional approach to numismatic investing. While most people have done poorly over the last two years, our clients have made money. Write for free literature detailing our services. Do it now and we will include free our report on **THE COMING BULL MARKET IN BU ROLLS**. Call or write for details now! Ask for Mrs. Hecht at:

"POPULAR" BU ROLLS REACH BUYING LISTS Circ Dollars In Strong Demand; Later Proof Sets Edge Lower

The Market in Depth

ALLEN HARRIMAN

Prices are thoroughly mixed across the BU roll charts this week—with the number of plus signs exceeding the minus signs by a small margin. Several dealers are showing definite interest in BU rolls—with many of the "popular" issues (43-D & 55-P nickels, 1955 D & S dimes, 55-D quarters) now wanted in relatively large quantities. These dates, as most readers know, are among those which are often subject to rather volatile "promotions". In addition, when the BU roll market makes a substantial move, these are usually among the first rolls to stir. It remains to be seen, of course, whether current buying will lead to a general upswing in this area or not.

It is interesting to note how very few strictly choice BU (MS-65 or better) type coins are offered for sale on the various teletype circuits—in spite of the fact that bid prices have remained rather static for some time now. There is naturally, a scattering of pieces described as "choice" and listed at what appear to be "bargain" prices. Almost invariably, however, these coins turn out to be graded a bit optimistically—and they have sometimes "crossed the country" several times as sellers hope they will finally "stick". Truly choice material continues to bring prices well in excess of bid-ask levels when offered at auction. The March issue of the MONTHLY SUMMARY will cover many of the important "prices realized" in the numerous major auctions scheduled during the next two weeks.

Note this week's new format and somewhat increased coverage of common date U.S. gold. Although most teletype bidders still ask for "XF/AU" specimens—particularly of the more common types—there has been a recent trend toward increased trading of the more elusive types in lower grade (VF) and of XF and AU pieces separately. It should be mentioned that even though most "dated" gold is still selling at prices well below the high levels reached in the period two to three years ago, there is also increased interest in this area of the market. This is especially true for the scarce and rare dates in the popular later series. Present reasonable prices for these coins in circulated and "unc" condition is probably responsible for current moderate buying. Strictly choice MS-65 or better specimens, of course, continue to elude most buyers—even those who simply ask for "quotes" rather than offering to pay specific prices!

This Week's Market

CENTS: Even though a few rolls in the 40's show slightly lower prices, several bidders are still in the market for numerous dates—particularly those issues in the '34-'40 group. It should be mentioned (as noted on page two) that CDN bid levels are for choice rolls which are "suitable for single sales". Sellers of material that does not meet this requirement usually attach lower price tags (but buyers of inferior rolls are very few and far between). The 1972/72 double die is suddenly receiving bids again as high as \$110-\$120 in choice condition; the

1970-S "small date" roll is wanted in quantity at \$60 (none available) and the 1969-P still is up once again at \$6.25 bid (bags are still needed)!

NICKELS: The rather quiet Jefferson series is enjoying a bit of attention—with the 43-D, 52-S and 55-P topping "want lists" with respectively higher bids of \$71, \$9.50 and \$17.50 (bidders will take ten to twenty-five rolls of each). In the late date group, the 1971-P roll is surprisingly difficult to locate—higher quantity bids of \$4.50 have produced very few results.

DIMES: The minimum bid for choice BU Mercury rolls has moved to \$109 this week; buyers, of course, do not want "put together" rolls at this price. In the Roosevelt series, the key 1949-S and 1950-S rolls are both higher—with unsuccessful bids of \$650 and \$340 recorded; one dealer also will now take "up to fifty rolls" of 1955-D at a slightly advanced \$22. By the way, the 1969-P roll is following in the footsteps of its Lincoln counterpart—one major buyer will take a large number of rolls at \$9.75 per!

QUARTERS: A few 48-S rolls have finally come out of hiding—and bid-ask has settled this week in the \$90-\$96 range. Still on buying lists is the elusive 1937-P (bid now at \$675), the 53-P (higher at \$72 bid) and the 55-D (wanted in ten roll lots at \$87). Frequent bids of \$1800 fail to pry loose any complete 1932-64 Washington sets in "strictly choice MS-65 condition"—probably because dealers who may locate such sets have ready and willing retail customers for such material.

HALVES: Lengthy buying lists for the earlier Franklins stick rather close to current price levels—with a bit of unsuccessful bargain-hunting noted here and there. (As previously mentioned, low bids often result in the shipment of less than choice rolls—which are then returned to the sender as "unsatisfactory".) Several gains have been registered by the later issues—with the minimum bid for any Franklin roll now pegged at \$38!

DOLLARS: Circulated common dates—especially the pre-1921 Morgans—continue to command much bidder attention. Bid for VG/better rolls has moved to \$78.50 (with a few dealers willing to pay \$80 for small quantities of five or ten rolls). The newly introduced complete circ dollar chart already shows scattered gains for a few of the higher grade pieces—see page five.

PROOF SETS and MINT SETS: The 1937-40 sets are carrying plus signs this week—and at least one major buyer will pay over even these increased bid levels for gem sets. Most of the S-mint issues edge slightly lower along with a number of the later Canadian PL sets (advances are again noted for the 1954 and 1955 PL issues).

COMMEMORATIVES: Recently escalating bid levels for choice MS-65 commems have now brought a few sellers into the marketplace. One dealer, in particular, has apparently purchased a rather large hoard—many of which have been sold (without benefit of the teletype circuits) to a major retail firm. It should again be pointed out that the vast majority of dealers who bid for silver commems want MS-65 coins—simply because there are very few collectors who want anything less than top quality. It is a rare occasion to see a teletype message requesting "average Unc" commems. There are, of course, sellers of less than choice specimens—and they usually ask 5%-10% under the MS-65 levels (the discount for the key issues is a bit more).

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$136.50 per ounce.

* Kennedy sets include 32 rolls listed on page three

SINGLE SETS AND ROLL SETS

Complete sets do not include 22-Plain, 55/55, 72/72, 18/17 or 42-41

Gem MS-65/70 singles are worth more than the MS-65 prices below. Roll prices are for average strikes for the issue. Choice full MS-65 rolls usually bring more than the listed prices. Scarce and rare date rolls should be figured on the basis of the quality of the individual coins involved.

BARGAINS ARE DANGEROUS!

More people are "taken-in" by bargain offerings than by any other means in the coin market. With us the quality you pay for is the quality you receive. Our coin investment services may be the best deal you will ever find in numismatics. In addition to investment suggestions based on research analysis, we offer our clients these professional services:

1. Buying and selling at low fees
2. Investment quality at wholesale
3. Guaranteed payment
4. Teletype facilities
5. Free insurance
6. Integrity
7. Courtesy and service

Whether or not you have been discouraged in the past, now is the time to begin again with a professional approach to numismatic investing. While most people have done poorly over the last two years, our clients have made money. Write for free literature detailing our services. Do it now and we will include free our report on THE COMING BULL MARKET IN BU ROLLS. Call or write for details now! Ask for Mrs. Hecht at:

GOLD COINS REGISTER NUMEROUS ADVANCES Bidders Have Difficulty Locating Buffalo, Mercury And Walking Liberty Rolls

The Market in Depth

ALLEN HARRIMAN

Reports from dealers who specialize in gold coins are that sales are definitely on the increase. This is not only true for the scarce and rare dates which were mentioned last week, but also for "type" common dates in all grades. Readers will note a substantial number of plus signs in the newly expanded gold chart at the bottom of this page; these are the result of a considerable amount of teletype bidding as well as a thorough monitoring of dealer buying prices at recent conventions. Actual sales have been only moderate—with all but the most plentiful types seemingly unavailable in sufficient quantities (at current prices) to satisfy demand. It must be mentioned that in this area, too, proper grading is all important. A number of sellers tend to overgrade by about half a grade or so—thus many "bargain-priced" offerings are not bargains at all. Choice XF gold coins often carry an "AU" description—and a price tag somewhere between the XF and AU levels. Buyers in this area should exercise caution—and a glass—before making purchases!

One major teletype bidder is currently offering to "pay bid" for any choice BU Buffalo, Mercury or Walking Liberty roll. Frequent bidding, however, has thus far resulted in virtually no sales of properly graded rolls. Interest in these three series, of course, has been evident for quite a while now—but "put together" or inferior rolls (weak strikes, discoloration, etc.) are not wanted. Sellers are reluctant to part with choice rolls of even the most common date Philadelphia issues at present price levels. Some anxious bidders are now offering to take five or ten singles—just as long as they are "choice MS-65" specimens! (This is particularly true for the mintmarked Mercuries and Walking Liberties.) These early rolls have been discussed in recent weeks by at least two numismatic "advisory publications"—as excellent "long-term investments". It is apparent that numerous buyers are heeding such advice—and that many dealers are having a tough time supplying their clients with choice material.

The BU roll market again presents a thoroughly mixed group of price changes—with about the same number of gains and losses recorded. The "popular" rolls mentioned last week continue to interest some buyers and a number of dealers are in the market for choice rolls across all series "at bid". There are sellers, also, within current bid-ask ranges—but, in many instances, the rolls being offered for sale are less than choice and are not "suitable for single sales". In this quality-conscious market, "average BU rolls" attract very little attention. It should be pointed out—as explained on page two—that CDN bids are for choice MS-65 rolls—not for rolls which exhibit the various problems connected with the particular series involved.

This Week's Market

CENTS: At least one "original BU bag" of 1960-P small date Lincolns has hit the market—and the seller seems willing to listen to "reasonable offers"; bid for individual rolls has skidded dramatically to a considerably lower \$80! And, in addition, another dealer listed two bags of the Denver version of the "small date" for sale at \$110 per (these sold a couple of days later at this price). Last week's higher bid for strictly choice BU 1972/72 specimens is still in force—frequent bids in the \$115-\$120 range are producing only limited results.

NICKELS: The 1955-P Jefferson is continuing its upward swing—quantity bids are noted this week at a higher \$18.50 (few sellers have been located so far). The various Wartime rolls remain on several "want lists"—with two or three dealers still interested in BU roll sets at around \$800 (again, sellers are few and far between). The "king" 1950-D roll is now pegged in a lower \$265-\$285 range; buyers have no trouble locating choice rolls when they need them.

DIMES: Where are the Mercury dime rolls? This question is being asked by several dealers. Potential buyers for any and all dates from the most common P-mints—to the recently elusive late mintmarked issues—to the scarce dates in the 30's—are finding that current levels are not encouraging many sales. (The few choice rolls encountered on the teletype circuits usually carry price tags well ahead of present bids.) Gains have been registered this week by numerous dates—see page two and three. The Roosevelt series, by the way, is virtually unchanged in light trading. It should also be mentioned that the higher bid of \$10 for 1969-P rolls is not effective!

QUARTERS: Bids of \$600 still fail to produce any strictly MS-65 1932-D Washingtons. (Two MS-65 specimens brought \$675 each at auction this past week). One regular bidder will now pay as much as \$60 for 1935-S's in the same choice condition; only a few pieces have changed hands. The Washington series in general, however, has recorded a few scattered minus signs—with only the 1941-44 mintmarked rolls giving bidders any real problem. Please note that circulated 1932-D & S quarters are being added to a revised page two within a week or two—meanwhile, current prices stand as follows:

	1932-D	1932-S
Good	\$29.00 - \$31.50	\$28.50 - \$31.00
VG	32.00 - 34.50	30.00 - 32.50
Fine	37.00 - 40.00	33.00 - 36.00
VF	47.00 - 52.00	39.00 - 42.50
XF	72.00 - 80.00	46.00 - 50.00
AU	105.00 - 115.00	60.00 - 67.50

HALVES: Although bid levels are unchanged (except for a small gain registered by the 47-P), several hopeful bidders are finding that Walking Liberty rolls—and even choice late date singles—are now extremely elusive. Retail bourse table sales of strictly MS-65 or better examples have been rather brisk at recent conventions; replenishing depleted stocks is far from easy. As indicated last week, the Franklins are appearing on numerous buying lists—with the usual scattering of unsuccessful bargain-hinting noted.

DOLLARS: Advances for higher grade pieces pepper the newly added complete circ dollar chart on page five; bidders, of course, want strictly graded coins—especially in the XF and AU category. All of the 1971-74 "blue" and "brown" (40% silver BU and proof) 1's again reflect slightly lower levels—most buyers are now only looking for bargains.

PROOF SETS and MINT SETS: Many later date proof sets as well as mint sets are being included on selling at slightly reduced levels; buyers are rather selective and actual trading is light. The Canadian PL sets, on the otherhand, are sporting several more plus signs.

COMMEMORATIVES: Prices are at a standstill this week for the various "type" issues—with losses for a few of the PDS sets noted. There are currently buyers and sellers within present bid-ask ranges—but they have been having trouble getting together. Indications are that many of the "choice" pieces being offered "at bid" just miss the qualifications for MS-65 material. By the way, one major commemo dealer is offering to sell numerous issues at current bid levels and at the same time is offering to buy complete fifty-piece sets at \$7350—which is well over the total bids for the coins involved!

U.S. GOLD (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$140.20 per ounce.

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

GOLD & SILVER BULLION CONTINUE STRONG ADVANCE Type Gold And Mercury Dimes Top Numerous "Want List"

The Market in Depth

ALLEN HARRIMAN

"Type" gold coins continue last week's upswing—with many of this week's additional plus signs appearing in the Uncirculated MS-60 and Gem MS-65+ columns. Another major buyer has now entered this area of the market and the resulting buying lists covers all types from the one dollar pieces through double eagles—most at higher prices. In the "gem" category, by the way, the "right" coin will command even higher levels than those presently registered—particularly for the more elusive types. As was mentioned last week, accurate grading is crucial in this area; the dealers who are currently buying want only strictly graded coins and they do not hesitate to return material which does not fulfill their exacting requirements.

The tendency to "push" descriptions just a bit on selling lists is still evident. One of the major areas of this overgrading is noted in the MS-60 grade. Since the price jump is quite substantial between the AU and MS-60 grades, some sellers grade their AU/UNC or "slider" pieces as full MS-60. It should once again be repeated that MS-60 coins are strictly unrecirculated even though they do not qualify for a "choice" rating.

A great deal of interest continues to be noted for common date BU Franklin half dollar rolls. Dealers edge their offering prices slightly higher each week—and bag quantities are wanted by numerous bidders. So far, sales have been sluggish; most sellers edge price tags a bit higher each week as the bid level advances. It is interesting to note that, at present, most buyers will pay virtually the same price for the fairly plentiful 1962 and 1963 rolls as they will for some of the larger mintage issues in the 1954-61 group. In spite of the large mintages involved, these earlier dates were not saved in the same quantities as the last couple of years of the Franklin series. Yet the 1954-D, 1957-D, 1958-D, 1959-D, 1960-P & D and 1961-P & D rolls currently command little or no premium over common date status. Some astute teletype buyers, however, are picking these rolls from selling lists—at no more than fifty cents or a dollar over the price of 1963-P or D rolls.

Interest in unrecirculated early Lincolns continues to grow. The problem is, however, that practically everyone wants "original gems"—specimens that are spot-free, full red and sharply struck. Such pieces are very difficult to locate. As one dealer recently stated, he would prefer to begin assembling a gem set of Indians—rather than Lincolns—in the same condition! The problem, of course, stems from the fact that the Indian set includes only the late 1908 and 1909 branch mint issues (both of which come rather well struck), whereas numerous Denver and San Francisco cents after 1910 were poorly struck (and usually improperly preserved). Hopeful bidders regularly offer to pay at least twenty-five percent over current Guidebook listings for gem early mintmarked Lincolns—and several simply ask for a "reasonable" quote. Practically no transactions are being recorded—dealers almost always have retail customers for gem pieces. By the way, many of the issues which are extremely difficult to find in full red well struck condition are dates which still carry quite nominal "unc" listings in the Guidebook—such issues as 1917-D & S, 1918-D & S, 1925-D & S, 1926-D, etc.

This Week's Market

CENTS: A large number of the 1934-55 Lincoln rolls are now appearing on various "want lists"; buyers are sticking to current bid levels—and they want

only choice rolls which are "suitable for single sales". The 60-P small date" roll has recovered slightly from last week's major loss—with sales noted around \$85. The 1968-72 proof Lincoln rolls slip lower once again; the elusive 69-P roll is bid this week at a higher \$6.75.

NICKELS: Bid for the complete BU roll set of wartime Jeffersons is now \$825—with numerous buyers also noted for quantities of the individual rolls (bid for the eleven rolls separately totals \$854). The Buffalos (and the remaining Jeffersons) are quiet at present levels—with the exception of the 55-P roll (bid now at \$19.50) and the 1968-71 proof rolls (all slightly lower).

DIMES: The "short set" Mercury rolls (1934-45) continue to dominate trading in this area—or rather, continue to dominate buying lists (not many actual transactions are being registered). Gains are again generously scattered across the chart; the roll sets and single sets are also enjoying higher (but unsuccessful) bid levels—sell page five! With the exception of the 49-S roll (higher at \$675 bid), the Roosevelt rolls are unchanged. Buyers, however, often pay "ask" for strictly choice single sets—and requests for complete 1964-46 BU roll sets usually go unanswered.

QUARTERS: A quantity of 50-D rolls is available on the teletype circuits—now in a lower \$103-\$109 range; the 48-S roll has again edged higher—bidders will pay \$91.50 this week. The remainder of the Washington series is quiet in light trading; choice BU single sets (1941-64) change hands occasionally at around \$165.

HALVES: The 1933-39 Walking Liberty halves are now trading moderately well within current bid-ask ranges. (Readers will recall that the mintmarked issues in this group were the victims of a considerable amount of profit-taking after enjoying a spectacular rise several months ago). The 1934-40 P-mints, by the way, have remained steady throughout—and are still quite scarce in choice MS-65 condition (interested dealers will take singles—since full rolls are now so few and far between). The "short set" issues (1941-47) continue to record moderate buyer interest—very few choice rolls are on the market.

DOLLARS: The bid for any pre-1921 Morgan roll is approaching the \$125 level—with some buyers already taking small quantities at this figure. Frequent attempts to buy virtually all issues across both series are meeting with very limited success. One dealer, in particular, regularly runs a lengthy "want list" starting with 1878 and ending with 1935; his offers to "pay bid" has resulted in only widely scattered transactions. Most of the available rolls fall more into the MS-60+ category—not suitable for single sales of choice MS-65 coins.

PROOF SETS and MINT SETS: A few small losses are noted here and there—but nothing serious. Trading, however, in this area remains light—with the usual bargain-hunting evident.

COMMEMORATIVES: Numerous buyers want practically all issues in XF/AU condition—and several higher bids have been recorded this week. Most issues, of course, are far more elusive in XF/AU condition than they are in "average UNC" MS-60 grade. A few minor losses have been registered by the MS-65 silver commemoratives—by issues which are not on current still rather extensive buying lists.

U.S. GOLD (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$146.60 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions or offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE the prices in the Newsletter are from dealer to dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES:
\$10.00 per column inch; four consecutive ads (no changes) - 10% discount
Advertising space is limited; ads will be placed in first possible edition.

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

HARGAINS ARE DANGEROUS!
 More people are "taken in" by bargain offerings than by any other means in the coin market. With us the quality you pay for is the quality you receive. Our coin investment services may be the best deal you will ever find in numismatics. In addition to investment suggestions based on research analysis, we offer our clients these professional services:

1. Buying and selling at low fees
2. Investment quality at wholesale
3. Guaranteed payment
4. Teletype facilities
5. Free insurance
6. Integrity
7. Courtesy and service

Whether or not you have been discouraged in the past, now is the time to begin again with a professional approach to numismatic investing. While most people have done poorly over the last two years, our clients have made money. Write for free literature detailing our services. Do it now and we will include free our report on **THE COMING BULL MARKET IN BU ROLLS**. Call or write for details now! Ask for Mrs. Hecht at:

USA - VISIT
 We will be in the United States from Feb 24 to Mar 10 and are very strong buyers of **NETHERLANDS** coins particularly provincial issues. We are also interested in purchasing coins of Belgium, England, Spain & Colonies, and other worthwhile world coins. Ancients also required. In USA material we purchase slider silver \$ roll, 1921, 2, 3 BU \$ rolls, VF-XF-AU Bust 50¢, and slider Commems. We plan to attend the Suburban Washington, Shaker Heights, and St. Louis coin shows. Visit our table or write to the address below.

CIRC vs UNC

Like all dealers, we like to handle rare and gem material. However, we also have many customers for nice circ type as well. And, not being manufacturers, we are always looking for steady sources. Next time your stock overflows, or you want to free-up some cash, give us a call—you might find that circ type is not as dead as you thought!

MERCURY DIMES REGISTER SUBSTANTIAL GAINS

Choice Walking Liberty Rolls Seldom Available To Current Bidders

The Market in Depth

ALLEN HARRIMAN

Usually, when a series is experiencing only light bidder attention, many of the rolls in that series are included on numerous teletype selling lists. Not so with the Walking Liberty half dollar "short set" issues. Only occasionally does even a single roll in this 1941-47 set appear on the various tapes--and few if any "bargain offering" are being monitored. There are buyers of this series, of course--astute dealers and investors who are putting strictly choice rolls away while the opportunity to be "picky" is still available. (As knowledgeable buyers know, it is a lot easier to locate choice material in any particular area when most of the bidder attention is centered elsewhere.)

A comparison of current bid prices for the twenty rolls in this beautiful series with those in effect slightly over two years ago reveals that only six issues have registered gains--while fourteen have lost ground. Changes--in both directions--have been fairly substantial; the following chart shows the percentage of change for each issue since January of 1975;

	Jan.'75	Mar.'77	% Change		Jan.'75	Mar.'77	% Change
41-P	\$275	\$235	-14%	44-D	\$310	\$360	+16%
41-D	510	430	-16	44-S	420	350	-17
41-S	1300	1350	+ 4	45-P	275	220	-20
42-P	275	235	-14	45-D	360	275	-24
42-D	365	385	+ 5	45-S	375	320	-15
42-S	760	750	- 1	46-P	300	275	- 8
43-P	270	230	-15	46-D	365	295	-19
43-D	540	460	-15	46-S	465	330	-29
43-S	365	395	+ 8	47-P	350	405	+16
44-P	275	230	-16	47-D	350	365	+ 4

There are two ways for current buyers to look at the rolls in this series. One would be to concentrate on those issues which have experienced the greatest percentage of loss during the past two years or so. Topping this list with a loss of 29% is the 46-S roll--followed closely by the 45-D (minus 19%). After these three, there are numerous dates with losses in the 14-20% range. When investigating investment possibilities from this standpoint, one must consider whether or not previous higher price levels were the results of a promotion or of actual scarcity.

Another way to look at this chart would be to consider those issues which have proven elusive and recorded gains in spite of a general slump in prices. These are only six rolls which fall into this category. Substantial increases of 16% each have been registered by the 44-D and 47-P rolls; the other four have shown advances in the 4 - 8% range. With the possible exception of the 47-P and D rolls (which have recently been the object of one major teletype bidder's attention) these six issues have not been "promoted" into higher ground. Even the 47-P and D rolls have not been exploited in the usual sense of the word--they have simply been recommended as a purchase by an investment advisory publication and have proven quite difficult for those following this advice to locate.

It should be mentioned that complete single sets from 1941 thru 1947 were bid at \$410 in January of 1975--and are now bid at \$390. This is only a small loss of only 5%. It is also interesting to note that one teletype dealer recently told us that he is currently selling strictly choice "short sets" for \$500 at the retail level. This, it was explained, is for sets with twenty fully struck MS-65 or better specimens. As most readers know, none of the S-mint issues

are easily located in this top condition; the price of such choice sets is based upon the inclusion of fully struck San Francisco coins.

This Week's Market

CENTS: The 1960-P "small date" rolls is lower again this week--with quantities now available in the \$78 - \$83 range. One dealer is offering to sell one roll each of the four 1960 rolls at \$85 per "set" (on another teletype system, the same four rolls are being offered at \$95.) Large quantities of Flying Eagle cents, two-cent pieces and three-cent nickel pieces are wanted--at higher prices (see page four.)

NICKELS: Other than the wartime rolls, interest in the Jefferson series remains at a very low level. The eleven "silver issues" of 1942-45 are, however, on several buying lists--and bidders are finding that \$825 will not pry loose any complete BU roll sets. It should be noted, also, that strictly choice original (MS-65/better) 1939-S specimens are not easy to locate--rolls tend to be inferior and singles have often been cleaned.

DIMES: The 1934-45 Mercury dimes continue to make history! Advances are again liberally scattered across the chart and very few actual transactions have been recorded. One rather extensive selling list did appear this week--with price tags well above current ask levels. (As usual, when an area of the market is "hot" most potential sellers raise their prices by a considerable margin--or simply put their rolls away--hoping to catch the "peak.")

1936-P & 1937-P -- These two are now bid at \$270 and \$260 respectively.

1938-S -- Bids of \$540 produce no results.

1939-D & S -- Both advance this week--higher bids of \$325 and \$810 are noted.

1941-S & 1942-D -- Bids move to \$225 for both issues.

1942-S -- A \$50 jump for this roll--to \$325 bid!

1943-S, 1944-D & S -- Three more issues on the plus side.

QUARTERS: In contrast to the Mercury series, even the early Washingtons are very quiet. Very little bidding is noted in this area--and the occasional roll or two which is needed is usually located without much trouble. Exceptions can be the 1941-44 mint marked issues and, at the moment, the 1953-P roll. (It should be mentioned that frequent bids of \$6250 for 1941-64 BU roll sets have been unsuccessful--with the same bidder asking for complete BU roll sets of Buffalos, Mercuries, Roosevelts, Walking Liberties and Franklins.)

HALVES: Lengthy "want lists" include virtually every issue in the Franklin series. Bidders, at this point, seem reluctant to raise bid levels--so sales are widely scattered and strictly choice rolls continue to be listed at "ask" or slightly more. Interest in quantities of common late dates is still strong around \$39.

DOLLARS: Bid for the most common Morgan rolls has already topped the \$125 barrier--with any pre-1921 issue now worth at least \$127 to several buyers. As discussed last week, dealer buying lists also include practically every Morgan and Peace issue--with very few sellers willing to part with choice rolls at this time. (Occasionally a few rolls which fall into the MS-60/60+ category are offered--but buyers of course, want choice material at today's prices.)

PROOF SETS AND MINT SETS: Another inactive area of the market. There are more sellers than buyers and bargain-hunting accounts for most of the bidding. Exceptions are the 1936-42 issues--for which current bid levels are inadequate to supply choice sets.

COMMEMORATIVES: Lower prices are scattered across the chart--especially for the BTW and W-C sets. The other issues which carry minus signs are those which are not on the still fairly extensive buying list of one major buyer of "type" pieces.

U.S. GDLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$147.50 per ounce.

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

BARGAINS ARE DANGEROUS!
 More people are "taken in" by bargain offerings than by any other means in the coin market. With us the quality you pay for is the quality you receive. Our coin investment services may be the best deal you will ever find in numismatics. In addition to investment suggestions based on research analysis, we offer our clients these professional services:
 1. Buying and selling at low fees
 2. Investment quality at wholesale
 3. Guaranteed payment
 4. Teletype facilities
 5. Free insurance
 6. Integrity
 7. Courtesy and service
 Whether or not you have been discouraged in the past, now is the time to begin again with a professional approach to numismatic investing. While most people have done poorly over the last two years, our clients have made money. Write for free literature detailing our services. Do it now and we will include free our report on THE COMING BULL MARKET IN BU ROLLS. Call or write for details now! Ask for Mrs. Hecht at:

CIRC vs UNC
 Like all dealers, we like to handle rare and gem material. However, we also have many customers for nice circ type as well. And, not being manufacturers, we are always looking for steady sources. Next time your stock overflows, or you want to free-up some cash, give us a call-you might find that circ type is not as dead as you thought!

MORGAN DOLLARS & MERCURY DIMES TOP BUYING LISTS Bid-Ask Coverage For Commemoratives Expanded To Include MS-60 Prices

The Market in Depth

ALLEN HARRIMAN

Demand for Morgan dollar rolls is definitely on the increase. A quick glance at the page six chart will show that practically every issue under the \$150 level has registered an advance this week. Lengthy "want lists" from numerous dealers are now being monitored on all of the teletype circuits--virtually on an hourly basis--and most bidders want from ten to fifty rolls each of these lower priced issues. Potential buyers are carefully watching each other's attempts to locate these Morgan dollars and they frequently edge their offering prices higher in the hope that they will be the one to corner a quantity before prices advance much further. (Most of the better dates--particularly the Philadelphia and New Orleans coins--are also wanted. Bids, however, remain unchanged in this area.)

As usual, when demand increases and prices begin to move ahead, most sellers disappear--and those who remain simply raise selling prices. Thus few choice Morgan rolls have changed hands as a result of this week's higher bid levels. Reports do indicate that a number of somewhat inferior rolls have been shipped--a few dealers taking advantage of current strong demand to move some less than choice material. Today's buyer, however, is well aware of this tactic and such rolls are usually returned forthwith!

Prices are also quite active for circulated Morgan and Peace dollars. Of particular interest, of course, are the scarce and rare dates in the higher grades. Regular buying lists for such dates as 79-CC, 84-S, 89-CC, 93-S, 94-S, 03-S, 04-S and 34-S in XF and AU condition produce very few results. As has been mentioned previously, collector/investors should be especially careful of grading in this area--sellers often tend to "push" by half a grade or so--and proper grading will be all-important when it comes time to sell!

Readers will note that the page two chart for commemoratives has been expanded beginning with this issue to include prices for the MS-60 grade. Recently escalating levels in this area--coupled with considerably more quality-conscious buyers--have resulted in this two-tier price structure for uncirculated pieces. As most dealers and collectors already know, MS-60 specimens are strictly uncirculated coins which for some reason (weak strike, bag abrasions, handling marks) cannot be classified as choice MS-65. The MS-60 coin, however, is NOT a "super slider" which shows "just a bit" of wear--even though coins of this lesser quality are sometimes offered as such. This expanded price chart should prove very useful to those who must make a price determination for silver commems which do not fall into the "choice" category. (It also might be mentioned that prices for the eleven gold commem issues in XF/AU condition have been added to our regular weekly market coverage.)

This Week's Market

CENTS: Early half-cents and large cents remain on several dealer's buying lists--particularly in nice defect-free Fine and Very Fine condition. These pieces are quite difficult to locate; most have "problems" of one sort or another. The

1960-P "small date" roll has slipped substantially lower again this week--with ten roll quantities available at \$75; very little interest is noted even though this is the lowest price recorded in a long, long time.

NICKELS: The BU roll set of Wartime nickels is now receiving bids as high as \$860; several are wanted--and none have been listed for sale. Other than the WT issues, only the 1950-D roll is bucking the trend toward lower prices in the remainder of the Jefferson series--minus signs are rampant across the chart. The "no drapery" half-dime (1838-40) in MS-65 condition is extremely hard to find at the current bid of \$500; dealers rarely have choice specimens for sale at any price.

DIMES: The big news in this area continues to center around the 1934-45 Mercury dimes. Once again advances have been recorded for numerous issues in this group--with common P-mint rolls (exception: 45-P) all now bid at a minimum of \$121. Buyers still far outnumber sellers and the few available rolls still carry price tags well ahead of even this week's higher levels. Gains in the still rather quiet Roosevelt series include the 47-D, 48-P & D, 50-S and 53-S rolls--one dealer wants up to twenty rolls of each (see page three for higher bid levels). As with the half-dime, the "no drapery" dime in MS-65 condition is eluding all potential buyers at the present bid level of \$700.

QUARTERS: Dealers regularly ask for "any reasonable quote" on 1916 Standing Liberty quarters; most bidders will take several pieces--in any grade available. In addition, bidders are still very interested in the 1918/17-S as well as the key Barbers--1896-S, 1901-S and 1913-S (again, any grade is of interest). So far, bids remain at the levels reported in last week's MONTHLY SUMMARY issue--but it appears that it will take higher offering prices to pry loose even a few specimens. The Washington series remains quiet--with another light scattering of slightly lower roll prices.

HALVES: At least two major dealers are now in the market for choice Walking Liberty halves in the 1934-47 group. Current offers to pay "pro-rated bid" for five or ten singles hasn't resulted in many actual transactions. Bid, by the way, for common date P-mints has advanced to a minimum of \$225 (for the 45-P) and \$235 for the 1941-44 rolls. One anxious dealer is attempting to buy circulated 1839-O "reeded edge" halves; the following bids are well ahead of Guidebook listing in the higher grades: Good \$50, VG \$65, Fine \$140, VF \$200, XF \$275 and AU \$375.

DOLLARS: The Eisenhower series continues to register lower ask prices--with only the key 1973-S "brown" issue (40% silver proof) firm at \$25 bid (several small lots were traded during the week at this level). For market activity in the Morgan series, see "The Market in Depth" column.

PROOF SETS and MINT SETS: Again a number of small losses have been recorded for the later issues; numerous dealers have "mixed lots" of sets for sale and minor price cutting seems to be the method they are using to move their inventory (this doesn't always prove effective, however, since most buyers want specific dates and don't want to buy entire "lots" to get them).

COMMEMORATIVES: The Oregon, Texas, BTW and W-C sets have all been offered for sale at lower levels this week. Since bidders are still concentrating on most of the "type" issues, few of these PDS sets have changed hands. The various "type" issues remain on the still extensive buying list of one major buyer; prices for a few other have advanced slightly (among them the tough Grant "with star" and Missouri 2x4). It should be mentioned that another dealer will "pay \$300 over bid" (\$7300) for choice fifty-piece type sets mounted in plastic! (This is well over the total of the individual bids for the fifty coins involved.)

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$148.70 per ounce.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

BARGAINS ARE DANGEROUS!
 More people are "taken in" by bargain offerings than by any other means in the coin market. With us the quality you pay for is the quality you receive. Our coin investment services may be the best deal you will ever find in numismatics. In addition to investment suggestions based on research analysis, we offer our clients these professional services:
 1. Buying and selling at low fees
 2. Investment quality at wholesale
 3. Guaranteed payment
 4. Teletype facilities
 5. Free insurance
 6. Integrity
 7. Courtesy and service
 Whether or not you have been discouraged in the past, now is the time to begin again with a professional approach to numismatic investing. While most people have done poorly over the last two years, our clients have made money. Write for free literature detailing our services. Do it now and we will include free our report on THE COMING BULL MARKET IN BU ROLLS. Call or write for details now! Ask for Mrs. Hecht at:

BU ROLLS BEGIN TO RECORD GAINS A Look At The "Sleeping" 1934-38 Buffalo Nickel Issues

The Market in Depth

ALLEN HARRIMAN

Although the earlier Buffalo nickels have been in very strong demand during the past year or so, the 1934-38 "short set" issues have so far failed to join in the activity. In fact, it was in the 1974-75 period that the twelve issues in this group last enjoyed a definite upswing--posting an average gain of 38% between March of '74 and March of '75. (The 16% gain recorded for the roll set during 1975-76 was entirely due to interest in the very scarce 1934-P & D and 1935-D issues.) In examining the following chart which covers six years of activity for these "short set" dates, readers will find that the last major upswing was during the 1972-73 period--when an impressive average advance of 72% was recorded!

	1971	1972	1973	1974	1975	1976	Current
1934-P	\$210	\$240	\$335	\$390	\$575	\$ 750	\$ 825
1934-D	360	360	560	640	800	1240	1480
1935-P	105	110	260	290	350	360	350
1935-D	250	275	325	380	625	825	900
1935-S	180	195	280	310	450	460	500
1936-P	81	95	215	230	310	310	315
1936-D	81	95	215	230	350	360	360
1936-S	95	105	215	250	350	350	380
1937-P	85	125	215	235	310	275	245
1937-D	86	102	215	225	330	320	285
1937-S	130	120	245	255	330	320	300
1938-D	81	97	220	220	260	260	250
	\$1744	\$1919	\$3300	\$3655	\$5040	\$5830	\$6190
	10%	72%	11%	38%	16%	6%	

Very few choice Buffalo rolls are available on today's teletype circuits--and when a few are offered they are usually 1937-P or 1938-D--with an occasional 1936-P, 1937-D or 1937-S noted. The remainder of the issues can now seldom be located--particularly in choice, brilliant well-struck condition. Note that the 1937-P was once considered the scarcest of the '37 issues; the dispersal of a major hoard, however, has now relegated it to the "most common" category. Most of the rolls in this hoard, by the way, were of "average strike" condition--not particularly weak--but certainly not as choice as most of the 1938-D's which are encountered. As a matter of fact, practically all of the 1934-37 rolls fall into this category. True "gem MS-65+" specimens of these late dates are more elusive than most people think! It is for this reason that the 38-D is most often chosen as a "type" example by collectors.

The 1935-D Buffalo holds a unique position in the "short set". The current bid of \$900 is for the above mentioned "average strike" rolls--coins which considerable detail and full original luster. The problem with this date is that practically all of the rolls which have been for sale in recent years are very weak--with practically no design detail visible on either the obverse or reverse of the coins. These rolls are quite difficult to sell. Strictly fully struck MS-65/better pieces are quite scarce--perhaps rare in relation to many other dates in the series. Sales of "gems" have been recorded as high as \$150! The 1934-D is also quite scarce also (but not as much as the 35-D); sales of "gems" have been registered as high as \$75.

Current bidders in the series are sticking to present bid levels--and very few choice rolls are changing hands. It is obviously going to take higher bids to satisfy even today's moderate interest.

This Week's Market

CENTS: Demand for the one-year-of-type 1859 Indian in Good or better condition has pushed the bid up to \$3--and large quantities are wanted. Likewise, two-cent pieces are enjoying quantity bids at a higher \$2.95. Changes remain minimal for the very lightly traded Lincolns--with an occasional dealer asking for a few scattered rolls in strictly choice condition (locating totally defect-free rolls even in today's quiet market isn't always an easy task).

NICKELS: The definite upswing continues for the Wartime Jeffersons--all eleven rolls are sporting plus signs this week (see page three). The BU roll set is now unsuccessfully bid at \$875 (bid for the individual rolls totals \$915). Dealers are finding that the scarce 1879-83 three-cent nickels are still extremely difficult to locate in any grade--requests for "quotes" seldom even receive an answer.

DIMES: Further advances dot the Mercury dime chart--with most bidders still going empty-handed! Several potential buyers will take "a few choice singles" of the pre-1941 "short set" issues--and they often will pay "pro-rated ask" to get them (even these attempts to buy are showing very scattered results). One major roll buyer continues to run "want lists" which include numerous pre-1956 Roosevelt rolls--and this week several bid levels have been edged slightly higher. Seated Liberty dimes are still wanted in large quantities at \$2.85--sales have been limited.

QUARTERS: The Washingtons are the only silver rolls which are not participating in the current rather active roll market; the few bidders in this area are mostly still looking for bargains. Selling lists, on the otherhand, do not now include very many rolls. There are one or two dealers who will take 1941-64 BU roll sets at the current bid of \$6250 (none seem available). The VG/better Standing Liberty roll is quite elusive at \$42 bid--most of the circulated pieces offered in quantity fall into the AG/G range.

HALVES: The BU roll set of Walking Liberties (1941-47) is bid now at a higher \$7750 (the individual roll bids total \$7925); not a single offer to sell has been monitored. This places the strictly choice MS-65 single set in the \$400-\$435 range (buyers should examine sets carefully for those "super sliders" which somehow slip in on occasion). A quick glance at the page three chart will show that the Franklins are on the move--with twenty-five of the thirty-five dates registering gains this week! This BU roll set is unsuccessfully bid now at \$4750; single choice MS-65 sets are pegged in a higher \$250-\$270 range. (By the way, one anxious bidder will take half-bag quantities of virtually any Franklin issue in choice BU condition!)

DOLLARS: The general advance for "common date" Morgan rolls continues! Numerous dealers have joined in attempts to buy and many want bag quantities; the minimum bid for pre-1921 rolls is now \$130 and even the 21-P roll is up this week (buyers will take bags at \$5000--or rolls at the pro-rated figure of \$100). The Ikes are steady--although mixed "lots" are occasionally listed for sale at "bid plus postage"; the key 1973-S proof has recorded a small gain--at \$26 bid.

PROOF SETS and MINT SETS: Scattered minor gains have been noted for several pre-1964 issues; the later issues are still easily located. Trading volume remains light.

COMMEMORATIVES: Further losses have been chalked up by all of the Oregon, Texas, BTW and Washington-Carver PDS sets--as well as some of the others; one dealer's frequent selling attempts of these issues are basically ignored. The "type" silver issues are generally steady and a few gains are welcome on the gold commem chart (see page two).

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$153.50 per ounce.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

BARGAINS ARE DANGEROUS!
 More people are "taken in" by bargain offerings than by any other means in the coin market. With us the quality you pay for is the quality you receive. Our coin investment services may be the best deal you will ever find in numismatics. In addition to investment suggestions based on research analysis, we offer our clients these professional services:
 1. Buying and selling at low fees
 2. Investment quality at wholesale
 3. Guaranteed payment
 4. Teletype facilities
 5. Free insurance
 6. Integrity
 7. Courtesy and service
 Whether or not you have been discouraged in the past, now is the time to begin again with a professional approach to numismatic investing. While most people have done poorly over the last two years, our clients have made money. Write for free literature detailing our services. Do it now and we will include free our report on THE COMING BULL MARKET IN BU ROLLS. Call or write for details now! Ask for Mrs. Hecht at:

FRANKLIN HALF DOLLAR ROLLS SCORE SUBSTANTIAL GAINS Roosevelt Dimes And Circulated "Type" Gold Coins Also Register Advances

The Market in Depth

ALLEN HARRIMAN

Franklin halves are getting "hot"---or certainly "warm" at least! Dealer buying lists are lengthy and numerous; selling lists are relatively few and far between---and price tags have been raised noticeably during the past few weeks. Several potential buyers have been advancing their bid levels day after day in attempts to be the "highest bidder" on the teletype circuits. One major buyer is interested in half-bag to full bag quantities of virtually all dates in the series---in BU condition! Finding more than a few rolls at a time of the earlier dates is, naturally, quite a task. Several other bidders want from one or two up to ten rolls---again of practically any issue. Since the few sellers who are around are keeping their prices just ahead of bidders, actual transactions so far have been quite limited---and edging prices a few dollars higher hasn't helped much so far.

The bid for the complete BU roll set has advanced this week to an even \$5000 (up \$250). This figure is slightly over the total of the bids for the thirty-five separate rolls in the series. Single BU sets finished the week in the \$260-\$280 range---in strictly choice MS-65 condition, of course!

Readers will also note that the U.S. gold chart at the bottom of this page is peppered with gains this week---virtually all of them being registered by the various circulated grades. Again this is an area in which numerous hopeful bidders are participating---and again sales volume has remained light. Special attention is focused upon the Type I and III one-dollar and the later two \$2½ denominations; dealers want "quantities" and they keep edging bid levels higher and higher to get them. The \$5 and \$10 Indians, by the way, seem equally elusive in the VF/AU grades. It might be mentioned that numerous bidders still ask for "split grades" on their buying lists (VF/XF or XF/AU)---but the bids which accompany these requests are generally about half way between the two "bid" columns involved.

Well, order forms from the mint for 1977 six-piece clad proof sets are in the mail---and the price this year is \$9.00 per set---up 28% over last year's \$7.00. Apparently "holding the line against inflation" doesn't include all government departments. Since 1964 (when the five-piece set contained 90% silver coins and sold for \$2.10) there has been an increase of 328% in the cost of a proof set. This is an average increase of over 23% per year! Today's sets, of course, contain an additional dollar coin---and are packaged nicer---but they also contain only copper-nickel clad coins. There were 4,149,730 sets sold in 1976---the same number of orders in '77 will take an additional eight million (plus) dollars out of pockets earmarked for numismatic spending of one sort or another!

This Week's Market

CENTS: A few minor gains have been noted for scattered Lincoln issues; as usual, buyers want only choice rolls which are "suitable for single sales". The 1970-S "small date" roll is still rather elusive at this week's higher bid of \$63. The 1922-Plain has registered the following advances since we last reported bid

levels in the March MONTHLY SUMMARY: Good \$60, VG \$65, Fine \$90, VF \$120, XF \$220, AU \$550 (unchanged) and MS-60 \$1200. Dealers frequently ask for "quotes" on MS-65 or better specimens---but they never receive an answer.

NICKELS: Although bid remains at \$875 for the BU roll set of Wartime Jeffersons, gains have again been recorded by several of the individual rolls (see page three). Several non-wartime dates slip lower; only a minimum of buyer interest is evident (one major dealer will take scattered dates)---but sellers far outnumber buyers. Those dealers who are in the market for circulated specimens of the 1863-73 three-cent silver pieces seldom locate even a single coin. These dates are rarely available in any condition except proof and owners of a circ or BU example can almost "name his price"!

DIMES: The Roosevelt series continues to register small gains---with particular emphasis on the 48-D, 50-S and 51-S rolls. The 1946-64 BU roll set is bid this week at a higher \$2750 (none offered); single BU sets are now listed in the \$56-\$61 range. Strong demand for Mercury rolls and singles still results in only an occasional transaction. The "non-available 1941-45 BU roll set is wanted at a higher \$2475; choice single BU sets are now pegged at \$51-\$55. The scarce 1942/41-D, by the way, is currently receiving the following bids: Good \$110, VG \$120, Fine \$135, VF \$160, XF \$210 and AU \$360 ("quotes" are requested for choice BU specimens).

QUARTERS: An advance to \$6400 for the 1941-64 BU roll set of Washingtons has proven unsuccessful (individual bids for the sixty-one rolls total \$6736). Frequent buying lists for MS-65 or better Standing Liberty quarters with strictly "full heads" result in only an occasional common date being offered; asking for "any reasonable quote" on the scarce and rare dates are almost always ignored. By the way, one dealer will buy "strict gem" 1935-S singles at \$65 per---in quantity!

HALVES: Even though plus signs are nearly absent from the Walking Liberty half dollar chart, this doesn't mean that buyer interest is at a standstill. Several bidders are asking for five to ten strictly choice singles---as well as rolls---of all of the "short set" issues. The current bid of \$400 seldom brings a choice '41-'47 set out of hiding (an occasional MS-60/65 set is located---or a set with a few "super sliders"). Franklin halves are very active---see The Market in Depth. By the way, one bidder continues to find lower grade 1891 halves very elusive; current bids are well over "Redbook": Good \$15, VG \$18, Fine \$25.

DOLLARS: Common date Morgan rolls continue to dominate bidding---with another scattering of slightly higher bid levels registered again this week. Dealers will take from five or ten rolls up to bag quantities of nearly any issue priced under \$175 or so. Another round of losses has been suffered by the various "blue" and "brown" Ikes---with the exception of the 73-S 40% silver proof (which is steady at \$26 bid).

PROOF SETS and MINT SETS: The 1968-S thru 1974-S sets are all slightly lower; moderate quantities are being offered to a largely indifferent teletype audience. Gainers this week include 1953, 1960 sd, 1961, 1964, 1975-S and 1976-S---the latter of which is wanted in rather large quantities.

COMMEMORATIVES: One major commem buyer's "want list" continues to include numerous "type" issues---but not as many different issues as in previous weeks. Those which are not included are beginning to slip a bit lower---along with the several PDS sets which have been out of favor for many weeks now.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$149.80 per ounce.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

TYPE COINS REGISTER GAINS IN MOST GRADES

Lincolns & Jeffersons Suffer Losses; Roosevelts & Franklins Enjoy Continued Demand

The Market in Depth

ALLEN HARRIMAN

This week's sudden rash of plus signs across both the circulated and uncirculated type coin charts is a welcome change from the static price levels in force during the past several months! It should be pointed out that these gains are mostly the result of one major Eastern dealer's attempts to locate these coins--quantities are being requested and strict grading is definitely all-important. Considerably more grades and types are wanted than those which have registered advances; in at least an equal number of instances present bid levels have been used on the extensive buying lists which were encountered frequently during the week. Whether this latest upswing is the beginning of a trend--or simply the result of a short-lived attempt to expand inventory remains to be seen. To sustain an upward momentum for more than a week or two more bidders will have to join the activity. Another criteria for a definite general advance in this or any area is for bidders to keep the properly graded material which is sent to them. Readers can be certain that this area will be closely watched in the coming days to determine the strength of the newest apparent awakening of the "type" market!

Interest in type gold coins remains strong. Prices advances are considerably less numerous than last week's record-breaking showing--but at least eight to ten anxious bidders are regularly attempting to buy quantities of VF, XF and AU specimens of virtually all types and, as last week, transactions have been relatively limited. It cannot be stressed too thoroughly that these bidders are not in the mood to accept even slightly over-graded coins--or pieces with impairments of one sort or another. Today's quality-conscious attitude extends into all corners of the market!

The U.S. mint set market presents an interesting situation. This week's extensive number of price changes is due primarily to the demand for the individual coins contained in these government issue sets. With the exception of the popular 1970 and 1973 issues, mint sets have never been particularly interesting to most dealers or investors. It seems that most of the scattered bidders in this area are of the bargain-hunting breed. Bids are usually well under the pro-rated roll bids for the coins involved; a surprising number of sellers will part with sets at prices which--when figured on a coin by coin basis--are less than they would be willing to sell the separate coins for! Buying a few mint sets, by the way, is an excellent manner in which to build an adequate store stock of singles without buying full rolls of the various individual coins. (Readers will still find that current bid levels for mint sets are five to ten percent under bid for the separate specimens included.)

PLEASE NOTE that the April issue of the MONTHLY SUMMARY will accompany next week's CDN. The coming issue will present an extremely important article on Standing Liberty quarters--a series which is now enjoying a great deal of attention--and which, it appears, still has a long way to go!

This Week's Market

CENTS: One major roll dealer apparently decided this week to lower prices on a majority of the Lincoln rolls; quantities are available--yet reduced ask levels have thus far created very little buyer interest. Exceptions are the still elusive 1970-S "small date" (up slightly) and the "proof only" 1975-S (up substantially in the \$675-\$725 range.) As was mentioned last week, an occa-

sional bidder requests a few specific rolls in the '34 to date group--but in nearly all instances the rolls must be of exceptional quality.

NICKELS: A number of Jefferson rolls have followed the example set by the Lincolns--and again lower selling prices have failed to entice many buyers. The BU wartime set, however, is higher this week at \$900 bid--with choice single sets now listed in the \$23.50 - \$25.50 range. As will be reported in next week's April MONTHLY SUMMARY, the following bids for the very scarce circulated 1879-81 Shield nickels represent substantial increases:

	Good	VG	Fine	VF	XF
1879	\$42.50	\$48.50	\$55.00	\$63.50	\$84.00
1880	45.00	51.00	57.50	70.00	92.50
1881	40.00	45.00	51.00	60.00	80.00

DIMES: The 1916-31 Mercury singles continue to reflect strong demand; several dealers run frequent "want lists" which often include most of the dates in this early group. These bidders, of course, usually want only choice MS-65 or better specimens with "full bands"--and they seldom locate even a single coin. Although interest remains high for the singles and rolls from 1934 thru 1945, most potential buyers are content with current bid levels (after all, raising bids week by week has proven rather ineffective.) The early Roosevelts register a few more advances--see page three.

QUARTERS: The scarce 1932-40 singles are receiving mild attention; current bid levels, however, seem adequate to pry loose an occasional single--with the exception of the key 1932-D (which is now seen only rarely on the teletype circuits in choice MS-65 condition.) The 1941 to date rolls show only a minimum of price changes--trading remains at recent very light levels. (The 1953-P roll, by the way, is still rather difficult to locate--even at this week's higher bid of \$85.)

HALVES: Continued bidding at the \$5000 level has yet to produce a single BU roll set of Franklins; numerous individual dates in the series record further advances. There are several dealers who will take three, five or ten singles of most of the better issues--of course, they almost always want the choicest specimens. Most sellers are hesitant to break rolls for such sales since there are usually a few pieces in even the nicest "original" rolls which are difficult to sell as singles. Walking Liberty rolls are quite firm--with small gains registered by 1939-P, 1946-D and 1947-D.

DOLLARS: There have been more sellers of common date BU rolls in evidence on the teletype circuits this week. Most price tags, however, have remained slightly ahead of the market and completed transactions have been rather scattered. At least three major buyers are in search of solid date BU bags--so far offers to pay in the \$6500-\$6600 range for fifty rolls of "any pre-1921" Morgan issue are generally being ignored. Gainers this week include:

1884-P -- Wanted in quantity at a higher \$195.

1888-P & O -- Choice rolls are now wanted at respective bids of \$140 and \$150.

1898-O & 1899-O -- Bid edges up to \$142 for both.

PROOF SETS and MINT SETS: The 1976-S set has been quite active throughout this trading week; quantity sales were noted as high as \$9.50--but by week's end bid-ask had settled into the \$9.30 - \$9.55 range. Interest is also evident for the 1975-S set--but for this one potential buyers are willing to leave bid undisturbed at \$19.50. The remainder of the series reflects only minor adjustments and continued light trading. (As usual, a moderate amount of bargain-hunting is monitored each day.)

COMMEMORATIVES: The silver issues are thoroughly mixed in both the MS-60 and MS-65 columns. The Texas PDS sets have rebounded slightly (they have been added to the "want list" of the current major commem buyer); the BTW and W-C sets continue to slip lower--with virtually no teletype readers taking advantage of the lowest ask levels in a long, long time (most, perhaps, expect this lowering trend to continue for a while yet--but catching the absolute "bottom" can be a tricky task!)

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$147.70 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES:

\$10.00 per column inch; four consecutive ads (no changes) - 10% discount.

Advertising space is limited; ads will be placed in first possible edition.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

BARGAINS ARE DANGEROUS!
 More people are "taken in" by bargain
 offerings than by any other means in
 the coin market. With us the quality
 you pay for is the quality you receive.
 Our coin investment services may be
 the best deal you will ever find in nu-
 mismatics. In addition to investment
 suggestions based on research analysis,
 we offer our clients these professional
 services:
 1. Buying and selling at low fees
 2. Investment quality at wholesale
 3. Guaranteed payment
 4. Teletype facilities
 5. Free Insurance
 6. Integrity
 7. Courtesy and service
 Whether or not you have been dis-
 couraged in the past, now is the time
 to begin again with a professional
 approach to numismatic investing.
 While most people have done poorly
 over the last two years, our clients
 have made money. Write for free liter-
 ature detailing our services. Do it now
 and we will include free our report on
 THE COMING BULL MARKET IN
 BU ROLLS. Call or write for details
 now! Ask for Mrs. Hecht at:

FRANKLINS VERY STRONG; ROOSEVELTS ALSO ADVANCE Eisenhower Dollars Slip To "Pre-Buying Flurry" Levels; Quantities Available

The Market in Depth

ALLEN HARRIMAN

Last week's flurry of plus signs across the type coin charts on page four have been followed by another smaller scattering of gains. All of the previous advances are still in effect as the major Eastern buyer mentioned last week is still trying rather unsuccessfully to buy. Current "want lists" include all denominations from half-cents thru trade dollars---mostly in grades from AU to choice MS-65 (with many of the scarce early types wanted in Fine thru XF). It cannot be stressed too often that proper grading is a MUST---and that harshly cleaned, nicked or otherwise inferior coins do not command the prices listed!

Another major buyer of choice and gem "type" as well as scarce and rare dated material has recently been attempting to locate several dates in the Barber half dollar series (in addition to practically all of the pre-1934 Walking Liberties). In most cases, this dealer's bids are considerably ahead of those reported in the enclosed MONTHLY SUMMARY issue. The reason for this is that these particular bids are accompanied by the requirement that only "gem MS-65+ specimens" will be accepted. The CDN bid-ask prices, of course, are for "choice MS-65" pieces; the rarely encountered superb coin is, obviously, worth more---how much more is dependent upon the quality of the individual coin involved. A few of the bids for these "gem" halves include: 1892-S \$1600, 1900-O \$1250 and 1904-O \$1500. In the Walking Liberty series, bids for truly outstanding pieces usually run from ten to twenty-five percent over the MS-65 bid levels. So far, it might be added, very few if any coins of this ultimate quality have been traded!

All of the 1971-74 "blue" and "brown" Ikes have slipped lower once again. Current apathy seems about as widespread as last autumn's rush to buy! Readers may remember that the Eisenhower series suddenly became "hot" back in September when the possibility that the series would be ended was being widely publicized and discussed. It was even speculated that the '76 issues would be the last---and that the delay in the Mint's acceptance of 1977 proof set orders was due to the fact that a decision was being made about whether or not an Ike dollar would be included. Well, there are to be '77 clad proof dollars with the "S" mint mark as well as circulation '77-P & D coins---and investor interest has sagged considerably since the "peak" reached around the first of November. (A spokesman for the mint has confirmed that there will be no 40% silver Eisenhowers this year.)

As reported in the 11/5/76 CDN issue, bid for the eight 40% silver Ikes (four BU and four proof) totaled \$79.55. This week the total is \$53.20---representing a loss of 33% in about five months. The 1971/72-PD rolls have lost 16% while the "key" 1973-P & D rolls have registered a small gain since the beginning of November (\$155 per roll vs \$140). Only very minor changes have been for the eight different '76 rolls which it is possible to assemble from various sources.

Of course, when an "official" announcement about the future of the dollar coin is made, the present picture could change dramatically within a matter of days (or hours, on the teletype circuits). The "complete" Eisenhower dollar set, as of now, will consist of twenty-nine issues---certainly a record, by the way, for a series which spans only seven years!

This Week's Market

CENTS: One major roll buyer has apparently decided that at least a few of the

Lincoln rolls are under-valued at current levels; the resulting higher bids are for quantities of such issues as 42-S, 44-S, 45-D and 49-D & S. (It remains to be seen how far this buying attempt will be carried---only choice rolls are wanted and quantities may not be easy to locate.) Frequent bidding at present levels for both MS-60 and MS-65 "type" half-cents are proving almost totally ineffective (a few over-graded specimens are occasionally shipped back and forth between teletype dealers).

NICKELS: The above mentioned buyer is also interested in bag quantities of the very low priced 46-P, 47-P and 48-P Jeffersons---bid-ask for all three is now \$4.50-\$5.00 (with several sales noted within this range). Led by a substantial jump for the elusive 44-D roll (bid now \$85---up from last week's \$72), the Wartime issues continue to perk merrily along. The BU roll set, by the way, is bid this week at a higher \$940---none have been offered for sale. Strictly choice MS-65 Liberty nickels are practically impossible to find at bid of \$90---most pieces have minor problems of one sort or another.

DIMES: Choice MS-65 "full bands" 1937-D and 1939-S Mercuries are evading all bidders---this week's increases have again been ignored. The remainder of the Merc "short set" issues are firm at recently attained levels---with no "bargains" noted on any of the various teletype circuits. Scattered gains again dot the Roosevelt chart; special buyer emphasis still center on 48-D, 50-S, 51-S and 52-S---and these have now been joined by the 46-D & S rolls. The usually "popular" 1955-PDS rolls, by the way, are all lower this week---and all are available in quantity. One dealer's frequent and rather lengthy buying list for strict MS-65 Barber dimes seldom receives even a "quote" on the numerous dates needed.

QUARTERS: Bid has advanced to \$6500 for the 1941-64 BU roll set of Washingtons. The only price change of note for an individual roll has been registered by the very tough 1953-P (up \$10---at \$95 bid). Interest remains very strong for strictly "full head" specimens of all but the most common Standing Liberty quarters---see the extensive article in the enclosed April issue of the MONTHLY SUMMARY.

HALVES: Demand for common P-mint Walking Liberty rolls has edged prices slightly higher for the 1941-45 issues---and the very scarce 47-P roll has moved ahead once again (bid is now unsuccessful at the \$425 level). Advances continue for the Franklin series. Bidders are complaining that many of the rolls being received as a result of recently increased bid levels are somewhat inferior---falling more into the MS-60/65 category and not really "suitable for single sales" or for inclusion in choice single sets. It should be mentioned that the BU roll set is also up a bit---pegged at \$5100 this week (an occasional single set changes hands around the \$270 mark).

DOLLARS: Changes in the Morgan and Peace dollar series are minimal this week; bidders, however, are active and prices are definitely firm---with quantities of common date rolls wanted by numerous dealers. Circulated VG/better bags are still regularly bid at \$4050---with an occasional offer to pay an extra \$50 for quick delivery noted. The Eisenhower series continues to slip lower---see "The Market in Depth".

PROOF SETS and MINT SETS: "Bargain-hunting" seems to be the rule in this area of the market---particularly for the sets dated after 1955. Quantities of all dates remain simple to locate and "as a lot" offerings abound. The 1976-S set has settled into a more leisurely trading pattern once again---now in a slightly lower \$9.20-\$9.70 range.

COMMEMORATIVES: Prices have drifted lower here and there in lackluster trading. Most bidders hope to pick up the issues they need in "lots" at prices just below those currently recorded. Dealers who want choice MS-65 gold commems are finding that sellers of strictly graded pieces are relatively few and far between---and, as a matter of fact, many of the "choice MS-65" silver pieces listed for sale fall a bit short of their description.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$152.40 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information on sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES:

\$10.00 per column inch; four consecutive ads (no changes) - 10% discount.

Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster. MS-65 coins are choice fully struck specimens without detracting marks—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

WALKING LIBERTY ROLLS ARE ADDED TO "WANT LISTS"

Buying Prices Up-Dated For The Scarce Circ 1879-89 Three-Cent Nickels

The Market in Depth

ALLEN HARRIMAN

Trading this week has more or less followed the previous week's pattern. Recently increased bid levels for numerous "type" issues in VF thru choice MS-65 remain prominent on the teletype circuits, Roosevelt and Franklin rolls have been joined by the Walking Liberties on "want lists" and common date Morgan rolls have reached at least a temporary plateau. Changes are minimal in most other areas.

Readers will remember that the September issue of the MONTHLY SUMMARY included an in-depth study of the Three-cent Nickel series. Featured in this article was a list of prices that dealers were willing to pay (at the time) for the very elusive circulated 1879-89 pieces. During the ensuing months there have been numerous advances in buyers' offering prices for these scarce coins--the following is a compilation of the bids of several dealers over the past few months and is an up-date on our September chart. (The 1881 issue is omitted, of course, because it is a large mintage "common date"---and the 1886 has been added to reflect current bids for "circ" specimens of this "proof only" issue.)

	Good	VG	Fine	VF	XF	AU
1879	\$15	\$20	\$25	\$ 35	\$ 45	\$ 65
1880	16	22	28	38	48	70
1882	17	23	28	38	50	75
1883	25	34	45	55	70	95
1884	37	42	55	70	90	115
1885	60	65	75	100	115	140
1886	62	70	85	110	130	160
1887	45	50	62	79	95	120
1888	13	15	18	21	27	36
1889	15	19	21	26	32	45

Notes on the 1941-S and 1949-S halves: both of these issues carry plus signs this week---and both rolls are very difficult to locate in choice condition. This week's higher bid of \$1375 for the 41-S is for choice original rolls, but bidders at this level do not expect to receive fully struck specimens. (They may hope that a few of the coins in the roll will fit this description, but it is very seldom indeed that such will be the case.) Recent bids for strictly MS-65 pieces with full head, hand and skirt lines have been noted as high as \$125---and virtually any knowledgeable dealer will pay at least \$100 for coins of this ultimate quality. While the 1949-S doesn't present quite the problem that the 41-S does, finding fully struck MS-65 rolls isn't nearly as easy as the current \$850 bid might indicate. The crucial grading point for this issue concerns the rows of parallel lines across the bottom of the Liberty Bell. On the majority of 49-S's these lines "fade away" at the center of the bell---and the very scarce specimen with "full lines" will currently command a moderate premium. In all likelihood this premium will increase in the coming years---as quality-conscious collectors and investors pay more attention to the Franklin series. It should be noted that there are other issues in this series which suffer from the same weak striking (1951-S is a notable one)---and, as time passes, these other dates will most likely begin to be recognized in the same way that the fully struck S-mint Walking Liberties of 1942-45 already are!

This Week's Market

CENTS: Attempts to locate truly choice proof Indian cents at the current \$120

bid level are seldom successful. A very large percentage of the extant specimens have problems of one sort or another---hairlines, spotting, unattractive toning or they have been cleaned. Those dealers who have really choice pieces usually have retail customers at \$150 or more; proofs in the MS-60 category, on the otherhand, are relatively plentiful and record only sluggish sales in the \$60-\$70 range. Price changes for Lincoln rolls are minor; a few dealers are looking for one or two of scattered dates "at ask"---in strictly choice condition, of course!

NICKELS: Collector/investor interest in outstanding Liberty nickels is more and more evident. The series, in a sense, has long been overlooked---with only a few dates enjoying general attention. There are, however, a number of other issues in this rather short series (only thirty-three coins) which are far more elusive in top condition that Redbook listings indicate---and bidders are finding that even the "common" dates in gem quality are few and far between. Although the Wartime Jeffersons are still experiencing buyer activity, bid prices are virtually unchanged this week---with a few more rolls available around present ask levels; the remainder of the series is very quiet. (The 1974-S "proof only" roll, for some reason, is bucking the trend toward lower prices with an advance to \$107 bid.)

DIMES: A few scattered rolls in the 1934-45 Mercury "short set" are finally beginning to appear on selling lists. Thus far these are usually dates after 1940---with an occasional P-mint roll in the '37-'40 group included; the attached price tags are usually "ask" or very close. (Current buyers are mostly concentrating on the pre-1941 mint-marked issues plus 34-P and 35-P; they will gladly take choice singles rather than wait for full rolls.) Changes are few for the Roosevelts this week---trading has been rather light (choice single sets change hands at around \$59).

QUARTERS: Only a few price fluctuations have been noted for the Washington rolls. The \$6500 bid for 1941-64 BU roll sets is still ineffective and, as a matter of fact, very few choice single sets are listed for sale on the various teletype circuits. One dealer is offering to pay prices somewhat over current bid levels for several of the pre-1941 key and semi-key dates in strictly "gem MS-65+" condition; few if any have been located.

HALVES: Interest in the Walking Liberty "short set" issues (1941-47) has pushed several individual roll prices higher this week. Among the higher bids are: 1941-S (\$1375), 1944- (\$365), 1946-P (\$280), 1946-D (\$315), 1947-P (\$440) and 1947-D (\$400). Offers to pay an advanced \$7850 for a complete (and choice) BU roll set have been unsuccessful. Several more of the pre-1954 Franklins have moved to higher levels; the '54-'63 issue are firm---with numerous transactions recorded.

DOLLARS: This area is still following last week's trend toward quieter trading. Buying lists remain rather numerous---but, in most instances, bidders are holding to current levels. Actual sales are perhaps a bit more frequent now---due to the fact that sellers become more evident when week-after-week price advances come to a halt. (The 1881-S roll has nearly caught up with the other S-mints of the period---with a sudden advance to \$140 bid.) Incredibly, the Eisenhowers continue to slip lower---with an occasional far-sighted buyer stepping in to take the most obvious bargains.

PROOF SETS and MINT SETS: Minus signs abound across both charts this week. Sellers continue to outnumber buyers by a substantial margin and even the bargain-hunters are able to make an occasional deal. (There are those who feel that many issues---particularly the 1956-64 silver proof sets---are drastically underpriced. But, at this point no one seems ready to begin a concerted buying effort.)

COMMEMORATIVES: Very few changes have been registered this week; one major buyer continues to run a relatively lengthy "want list" for strictly MS-65 silver issues. Most of the pieces now being listed for sale seem to fall into the MS-60 or MS-60+ category rather than the fully choice---and shipments to this most active bidder have slowed apparently considerably.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$148.00 per ounce.

THE COIN DEALER NEWSLETTER

As part of the coin market, a weekly barometer of the coin market is published. This is a free service to all subscribers of the newsletter. The prices in the newsletter are from dealers to dealers transactions. As an investor, you may place your buy and sell orders through a dealer for a fee as you would buy stock through a broker.

INVESTORS NOTE: The prices in the newsletter are from dealer to dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee as you would buy stock through a broker.

ADVERTISING RATES

\$10.00 per column inch, four consecutive ads (no changes) 10% discount
Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC" - they may have bag marks or handling marks but no wear and they have full mint luster. MS-65 coins are choice fully struck specimens with no detracting marks. They may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices. "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

DEALERS BID FOR "GEMS"—HAVE LITTLE SUCCESS! Choice Walking Liberty "Short Set" Issues Elude Bidders; 47-P Roll Paces Series

The Market in Depth

ALLEN HARRIMAN

And the search for "gems" goes on! More and more evident on the teletype circuits are those dealers who are trying to locate truly gem specimens in all series from cents thru double eagles. In many instances these bidders describe the coin or coins they hope to locate and then ask for a reasonable quote (some will even offer to entertain an "unreasonable" quote!) More frequently now, however, hopeful bidders are listing the high prices that they will pay for the quality they are seeking. One of the more interesting buying requests noted during the past couple of weeks is a dealer's attempt to buy a single "gem MS-70" common date ten-dollar Liberty (wm) gold piece. Bid in the final column of the price chart below is currently \$265. This buyer will pay \$450 for an MS-70 specimen (nothing less, naturally, will qualify!) So far, frequent requests for this coin have netted zero results! This week's increased bid levels for several MS-65+ gold coins have been just as unsuccessful.

In the Mercury dime series everyone knows that the pre-1934 issues are in great demand in the ultimate MS-65 or better "full bands" condition. However, buying lists now frequently include a number of dates in the 1934-39 group—again at prices well ahead of current bid levels—for the "right coin," of course. Among recent impressive bids in this area the following stand out: 1934-P \$20, 1934-D \$60, 1935-D \$115, 1936-D \$65, 1937-D \$22 and 1939-S \$25! Bidders will take more than a single specimen—often asking for "up to ten pieces." It must be stressed that these bids are for strict MS-65+ gem specimens with "100 percent split bands." Several of the 1932-40 Washington singles are also enjoying this same bidder attention—although not yet as concerted as for the Mercuries. Bids in the \$650 area for "gem" 32-D's are rarely (if ever) successful and offers to pay as much as \$250 for the 32-S in the same top condition receive only widely spaced answers. It should be noted that one anxious dealer is now offering to pay \$85 (!) for strict gem 35-S's—and, again, quantities are wanted (bid for choice MS-65 pieces is now \$65). This date, by the way, has not previously been thought of by most dealers as particularly scarce—even in gem condition. Which other dates in this pre-1941 group would prove just as elusive should the same buying effort be concentrated upon them?

Again this week, the recent "want lists" in the type coin area have been appearing at least daily on all of the teletype circuits. Bid prices remain at the advanced levels recorded during the past three or four weeks—and actual transactions have remained quite limited. Those few dealers who had expressed the opinion that prices were "too high" for many types in grades from VF thru MS-60 don't seem to have many coins to ship to the current strong bidder—even at recently escalated bid levels. Of course, this buyer (as well as virtually all others) are strict in their requirements that the coins they buy must be properly graded and defect-free! The days when a sharp VF+ coin could be sold as XF—or when an XF with slight problems would "stick" are probably gone forever.

This Week's Market

CENTS: Several potential buyers continue to ask for scattered rolls in the Lincoln series (perhaps even a few more, this week); most bidders, however, demand very choice original rolls—and they will, at best, pay "current bid" to get them. A very large percentage of the Lincoln rolls which are on the market

contain at least some problem coins—and such rolls will seldom satisfy today's buyer. Bid levels for the extremely scarce 1922-Plain have again advanced since the last report in the April MONTHLY SUMMARY—current bids are at least: Good \$62.50, VG \$67.50, Fine \$92.50, VF \$122.50 and XF \$222.50. Strict grading is a MUST—and an occasional bidder will top these figures just a bit.

NICKELS: Bid for the BU roll set of wartime Jeffersons has dropped back slightly (to \$925)—with a couple offered now at around \$1000. The eleven individual rolls are unchanged with the exception of 43-S (lower in the \$42-\$45 range). The rest of the series remains more or less "out of favor" in very light trading. Quantities of G/VG 1913-P (I) Buffalos are wanted at a higher \$1.50 per; finding more than a few pieces at a time is not a simple matter (this date is more easily located in Fine or better condition).

DIMES: Interest in the Barber dime series has been on the increase for several months now. Not only are choice MS-65/better "type" specimens wanted (at a generally unsuccessful \$120 bid), but there are apparently a number of collectors who are attempting to assemble complete date sets in choice condition. In addition, several dealers run frequent teletype buying lists for virtually all dates in grades from Good (quantities are wanted) thru the VF and XF categories. Sales are surprisingly limited for the circulated coins—it is to be expected that the choice and gem pieces would be few and far between. Prices are firm and demand high for the Mercuries; changes are minimal for the Roosevelts.

QUARTERS: One important buyer regularly lists bid prices for "full Good" Barber quarters—covering practically all of the mintmarked issues in the series. Thus far, however, few buyers of the higher circ grades have been noted and only an occasional specific date in MS-65 condition appears on "want lists"; even the "type" specimen is rather quiet in the current \$260-\$285 range. (Strictly choice pieces seen on convention bourse tables, it should be added, usually carry price tags well ahead of this teletype bid-ask range.) The 1932-40 Washingtons continue to enjoy moderate attention; the 1941-64 rolls remain quiet.

HALVES: Several more advances have been registered by the Walking Liberty "short set" rolls. Bid is now a minimum of \$235 for the 45-P (probably the most plentiful roll with the possible exception of 43-P); other dates currently eluding bidders are 44-D, 46-D, 47-D and particularly 47-P (one buyer will already pay \$475 for "original gem rolls" of this latter date). Mild profit-taking is now evident for the 1954-59 Franklins (not unexpected, in view of recent strong advances); the earlier dates are steady with two gainers this week (48-P & D) and the late common dates are still wanted in quantity at current levels.

DOLLARS: A reasonable number of plus signs are scattered across the dollar charts. The scarce and rare date circ pieces are wanted by several dealers and the common date BU rolls have been joined on buying lists by several of the key date singles (see page six). Finally a couple of small gains have been noted for the Ikes (the 71-S, 72-S and 73-S "blue" versions)—although most bidders in this area still hope to locate bargains.

PROOF SETS and MINT SETS: All of the regular proof sets issues from 1970 to date carry minus signs this week; quantities are being offered to a largely indifferent teletype audience. Last week's lower prices for late mint sets have now affected the 1965-67 "special" sets.

COMMEMORATIVES: One major commem dealer has obviously decided that it is now time to sell silver commems! His frequent selling lists cover a large percentage of the issues in both MS-60 and MS-65 condition—all with lower prices. Most potential buyers, of course, immediately assume a "wait and see" attitude (a few, however, are asking for some of the MS-65 pieces—as long as the grading is "right on").

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$146.10 per ounce.

BU ROLLS

- Refer to "Early Singles" above

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worthless than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

BARGAINS ARE DANGEROUS!
 More people are "taken in" by bargain offerings than by any other means in the coin market. With us the quality you pay for is the quality you receive. Our coin investment services may be the best deal you will ever find in numismatics. In addition to investment suggestions based on research analysis, we offer our clients these professional services:
 1. Buying and selling at low fees
 2. Investment quality at wholesale
 3. Guaranteed payment
 4. Teletype facilities
 5. Free insurance
 6. Integrity
 7. Courtesy and service
 Whether or not you have been discouraged in the past, now is the time to begin again with a professional approach to numismatic investing. While most people have done poorly over the last two years, our clients have made money. Write for free literature detailing our services. Do it now and we will include free our report on THE COMING BULL MARKET IN BU ROLLS. Call or write for details now! Ask for Mrs. Hecht at:

the COIN DEALER newsletter

... a Monday morning report on the Coin Market

Vol. XV No. 18

May 6, 1977

Single copy price: \$2.00

ACTIVE MARKET CONTINUES; COMMON MORGANS UP AGAIN Early Copper Coins Enjoy Higher Bids; Silver Commems Edge Lower

The Market in Depth

ALLEN HARRIMAN

Except for a few of the areas which have been quiet for some time now (cent and nickel rolls, late proof sets), the overall tone of the market continues to present a rather healthy image. Moderate interest is still being shown for the Roosevelt and Washington rolls (mostly at current levels)--with continued strong interest evident for the "short set" Walking Liberty and Franklin rolls as well, of course, as for Morgan dollars. Needless to say, Buffalo, Mercury and the pre-1941 Walking Liberty rolls are practically non-existent on the teletype circuits. (Those few which do appear are usually snapped up very quickly by those dealers who are "on their toes." Even though bid prices for circulated, MS-60 and MS-65 "type" remain at the advanced levels registered during the past few weeks, the one important buyer's "want lists" continue to appear quite regularly--and with only very scattered results noted.

Readers will note that several major advances have been registered this week by the rarely offered 1793 copper issues. Higher bids for the Flowing Hair half-cent as well as both the Chain and Wreath cents have yet to produce the desired results--most likely because very few dealers have this early material in stock. Generally when a specimen or two is acquired by diligent searching of bourse tables or from an auction, the dealer/buyer already has a "home" for it--and thus these pieces seldom reach the teletype circuits. Another factor which drastically limits the trading of these early coppers is that bidders almost invariably want defect-free coins--and only a small percentage of the extant specimens are without problems of one sort or another. The chances are that even higher bid levels would produce the same slim results--such is the limited availability of this desirable material. It should be added that a noticeable increase in bidding for another "one-year-of-type" issue--the 1796 Draped Bust quarter--has been monitored this week; again, no actual transactions have been recorded. The Flowing Hair dollar of 1795 is also appearing more and more often on dealer "want lists"--and gains have also been registered for this scarce coin (see page four).

Advances in bid levels for circulated 1879-89 Three-cent Nickels during the past two weeks have been so substantial that another "up-date" seems in order. The following bids--some of which are as much as 20% higher than those reported in the April 22nd CDN--are still meeting with only a minimum of success:

	Good	VG	Fine	VF	XF	AU
1879	\$15	\$20	\$25	\$35	\$45	\$65
1880	20	25	30	38	49	72
1882	17	23	28	38	50	75
1883	32	40	55	65	75	100
1884	45	50	60	70	90	115
1885	60	65	75	100	115	140
1886	70	80	95	110	135	175
1887	50	55	67	84	100	125
1888	13	15	18	21	27	36
1889	19	21	25	30	33	45

Gains have been particularly impressive for the "almost impossible" 1883, 1884, 1886 (circ proofs) and 1887 issues.

This Week's Market

CENTS: Strong demand is still evident for G/VG large cents, two-cent

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$147.60 per ounce.

pieces and three-cent nickels; bidders want quantities (some will take up to five hundred of each)--but current bid levels usually result in scattered sales of far fewer pieces. A few dealers still want a number of Lincoln rolls (but usually no more than one or two of each date)--and with the current market climate they can be extremely "fussy" about the quality which is acceptable. The early Lincoln singles in gem condition, however, present another side of the picture--they are rarely offered and frequent attempts to buy are almost totally futile (even when bidders ask for "any reasonable quote.")

NICKELS: Teletype buying lists regularly include the 1879-81 Shield nickels as well as the rarely encountered "circ proofs" of 1877 and 1878; bidders will take "any quantity in any grade"--sales, however, are very, very few and far between! At least two major buyers also run daily "want lists" for all of the pre-1900 Liberty

nickels in Good/better condition; these low priced coins are surprisingly scarce and hopeful bidders seldom locate quantities. A large percentage of these dates seem to grade Good on the obverse--but have reverses that are only AG or are "wiped out" almost entirely; Fine or better specimens are, of course, even more elusive.

DIMES: Don't let the lack of plus signs in the 1934-45 Mercury group fool you! Demand is unabated--but the majority of bidders are now simply asking for "quotes" rather than offering specific prices. After all, they tried raising prices week after

week--which, basically, resulted in keeping rolls off the market as owners waited to see just how high bids might soar! Current buyers, as in recent weeks, are willing to take a few choice "full bands" singles rather than wait for rolls. There were two gainers this week--with no sales as a result; the 1938-D & S issues are bid this week at \$665 and \$565 respectively. Changes in the lightly traded Roosevelt series are minimal--with small gains recorded by the key 1950-S and 1951-S rolls.

QUARTERS: Bidders are finding that the earlier "common date" Standing Liberty quarters in full date G/VG-condition are quite difficult to locate in quantity. Bid has jumped substantially--to \$4 each--for 1917-P (II) and 1920-P thru 1924-P; "any 1918" is now bid at a minimum of \$4.50 and the 1919-P at an impressive \$11. The raised dates wore very quickly on the 1917 (II)-1924 issues and often a coin from these years will grade an overall Fine or better but still have a barely discernable date. Current buyers, of course, want only specimens with fully readable four-digit dates. (All of the latest gains, by the way, for the entire S.L. quarter series will be covered in next week's May issue of the MONTHLY SUMMARY.) One dealer continues to offer a record-breaking \$85 for gem MS-65+ 1935-S Washingtons--nothing less is acceptable and "choice MS-65" pieces are being returned.

HALVES: The 1947-P rolls--which are currently extremely elusive--is bid this week at an even higher \$475. Gainers in the Franklin series include: 1949-S (\$875), 1950-P (\$350) and 1956-P (\$75)--with small profit-taking losses recorded by 1950-D, 1951-D, 1953-P and 1958-P. Continued attempts to buy complete and choice BU roll sets at \$5100 are still unsuccessful; an occasional sale of a single set is noted around \$270. In "type", the 1795 Flowing Hair half has been enjoying strong demand for the past several weeks; bids of \$225 G/VG, \$350 for Fine and \$500 for VF seldom pry loose even a single properly graded and defect-free specimen.

DOLLARS: The minimum bid for pre-1921 Morgan rolls has advanced to \$133.50--with half-bag and full bag quantities wanted. Prices are lightly mixed across the charts; trading is moderate. Several minor gains in the Eisenhower series have followed last week's rather tentative end to the extensive "slump" experienced since the first of the year.

PROOF SETS and MINT SETS: A very quiet area--with prices nearly unchanged this week and only widely scattered sales noted. The 1976-S six-piece set has edged lower once again--now pegged in the \$8.50 - \$9.00 range (a few transactions have been registered within this lower range.)

COMMEMORATIVES: A number of the silver commems have slipped lower again this week in both MS-60 and MS-65 condition; this price lowering has generally affected issues which were unchanged in last week's downward trend. Most of these reduced prices are the result of one major commem dealer's extensive selling lists. The XF/AU specimens, by the way, are quite firm and frequently bid at current levels.

FOREIGN GOLD: (Usually traded in quantity in AU/BU condition.)

MARKET CLOSING PRICES BU SILVER DOLLARS

Gen MS 65-70 singles are worth more than the MS 65 prices below. Roll prices are for average strikes for the issue. Choice full MS 65 rolls usually bring more than the listed prices. Price and face date rolls should be figured on the basis of the quality of the individual coins involved.

1977-S PROOF SETS REACH TELETYPE CIRCUITS

Silver Dollars Very Active; Price Hikes Are Numerous In All Categories

The Market in Depth

ALLEN HARRIMAN

The 1977-S proof set hit the teletype circuits in quantity during the past few days--but hardly with the "bang" associated with the 1975 and 1976 issues. Early in March of last year the '75 six-piece set was steady at \$26 bid and the '76 version was strong at \$21 bid. This year's delayed ordering procedure--probably coupled with depressed price levels for the '76 set--has resulted in a much less exciting entrance for the new '77 set. This, of course, is the first year in which acceptance of orders was postponed until the first of April (in earlier years orders were accepted on November 1st of the previous year.) So rather than a "dribbling" of sets into the marketplace, dealers were immediately able to offer '77 sets by the hundred-set lot! The Mint was obviously in a position to deliver substantial quantities as soon as shipments began--thus limiting (or more nearly, eliminating) the substantial profits realized in past years by those who were the first to receive their sets.

Placing a "bid-ask" range on this new 1977-S set is a rather ticklish problem--readers will note that the price range in the page six chart is pegged at \$10 - \$11.50 for the moment. When the first sets reached the teletype circuits, a few optimistic sellers were listing them for sale as high as \$18--and an occasional buyer was willing to pay as much as \$12. This situation changed almost immediately. By mid-week some bidders were offering to pay only \$8.50--with the average bid level around the \$10 mark (don't forget, the Mint is charging \$9 this year.) Some sellers were willing to part with small numbers of sets around \$12; larger quantities could be picked up at \$11--or, perhaps, even a bit less! It may be that the market is overly pessimistic--and these immediate low resale prices could conceivably limit the number of sets yet to be ordered. There is, also still the possibility that the '77 set will contain the last proof Kennedy half and Eisenhower dollar--with all the resulting ramifications.

The silver dollar market is perking along quite well! At least two major "quantity bidders" are now paying \$4.10 for any pre-1921 Morgan in VG/better condition (\$82 per roll) and the bid has been raised to \$4.25 for any dollar in the same condition that is dated between 1897 and 1904. Also, for inclusion in "year sets" (rather than complete sets), the 1892-95 common dates are in considerable demand--with minimum of \$5 now offered for the most plentiful issues (92-P & O.) The 1893-P, O & CC and 1895-O & S coins are quite elusive at current bid levels.

In the BU roll area, quite substantial gains have been registered by the 1888-P & O, 1900-P and 1901-O rolls--with the first three now bid at \$165 and the 01-O at \$160 (these prices are up as much as \$25 from last week's levels.) It should be mentioned, in addition, that one dealer was willing to pay as much as \$175 for a few choice rolls of the 88-P & O and 00-P's--again, most likely, for use in BU "year sets."

In the area of scarce and rare singles, bidding has also increased; at least three major silver dollar buyers are in the market for choice MS-65 examples of such issues as 1884-S, 1892-P, 1893-O, 1895-O, 1896-O and 1901-P--to name just a few. Of course, buyers are "fussy" when it comes to MS-65 silver dollars (as well as all other areas) and MS-60+ pieces will definitely not fill current requirements. Check page six for this week's numerous gains across the silver dollar charts!

any teletype dealers have these coins in stock--at least; in nice defect-free condition. More dealers are joining in the hunt for gem early Lincolns--also with little or no success. The 1934 to date rolls are virtually unchanged in continued very light trading. It should be noted that CDN bid-ask levels for Lincoln rolls (as well as all other series) are for choice BU rolls; lower prices quoted elsewhere are presumably for the inferior rolls which can be picked up on any of the various teletype circuits at what might appear to be "bargain" prices!

NICKELS: A bit of mild profit-taking has been noted for a few of the wartime issues (42-PS, 44-DS); the eleven issue BU roll set is listed this week in the \$925 - \$985 range. The Buffalo as well as the remainder of the Jefferson rolls are very quiet--with an occasional bargain-hunter looking for such issues as 49-S, 50-P and 51-S (these and a few others are dates which have proven relatively elusive when previous market upswings have taken place.)

DIMES: One or two dealers regularly ask for "quotes on any grade" of the scarce low mintage 1863-67 and 1879-81 Seated Liberty issues. These dates are fairly simple to locate in proof condition--but from Good thru MS-65 they are seldom listed for sale on the circuits (dealers lucky enough to locate a specimen or two almost always find these dates on their customer "want lists"). Choice "full bands" Mercury dimes remain uppermost in the minds of numerous bidders--with several offering to pay well over pro-rated "ask" for gems in the '34 - '40 group (with even some of the '41 - '45 issues now beginning to enjoy this same attention.)

QUARTERS: The rare 1796 quarter continues to appear on buying lists--only a single "AG with problems" specimen was offered for sale during the week. In addition, two or three teletype dealers are now looking for the extremely scarce 1804 issue in grades from VG thru VF. This particular coin has always been more difficult to locate than Redbook price listings have indicated; most of the pieces encountered are unevenly worn or have detracting scratches or dings. Readers should note that the 1796 and 1804 quarters have very similar mintages--6,146 for the earlier date and only 6,738 for the much lower prices 1804. It is the "one-year-of-type" status which keeps the price of the 1796 so far ahead--and, interestingly, the 1796 issue is far easier to locate in the grades above VF than is the 1804! The 1805-07 issues, by the way, are also in demand--and again current bid levels fail to produce many transactions.

HALVES: Those dealers who are attempting to buy choice common date Walking Liberty rolls in the current \$235 - \$245 range are having practically no success--and very few of the better "short set" (1941-47) dates are being included on selling lists (those few which are noted almost invariably carry price tags somewhat ahead of the market.) The Franklins are basically steady--with just a little profit-taking indicated this week for the 1950-P & D, 1951-P and 1956-P rolls. Dealers will still take quantities of any late date at around the \$39 - \$40 level.

DOLLARS: Perhaps the most active area of the market--from VG/better bags to gem scarce and rare dates; see "The Market in Depth!"

PROOF SETS and MINT SETS: Prices have again drifted lower for a majority of the 1950-76 issues--trading is decidedly dull. The earlier sets (1936-42), however, are not so easy to buy--particularly in choice condition.

COMMEMORATIVES: A minimum of price changes has been recorded this week--with both buyers and sellers obviously having their attention directed elsewhere. These are a couple of dealers who are searching for gem MS-65+ specimens of such key issues as the Isabella quarter, the Lafayette dollar, Hawaiian, Hudson, Panama-Pacific, Spanish Trail, Vancouver and a few others--and they are willing to "listen to price quotes for the right coins."

This Week's Market

CENTS: Further advances have been registered again this week by the 1793 "coppers"; higher bid levels have produced no sale offerings of either the half-cents or the Chain and Wreath large cents. As was mentioned last week, few if

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$147.10 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer to dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

\$10.00 per column inch, four consecutive ads (no changes) 10% discount.

Advertising space is limited, ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks but no wear and may not have full luster. MS-65 coins are choice fully struck specimens without detracting marks—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

TOUGH O-MINT MORGANS WANTED IN GEM CONDITION 1977-S Proof Sets Trading Quietly In \$1050-\$1150 Range; '76-S Set Edges Lower

The Market in Depth

ALLEN HARRIMAN

For several weeks now a number of teletype dealers have been attempting to locate "gem MS-65" specimens of various Morgan dollars which are notoriously poor strikes--or which are very rarely seen in full original mint condition. These bidders are the ones who are usually called "fussy buyers." The dollars they are seeking are not necessarily those which are the expensive key dates (although such dates as 1884-S and 1901-P do appear on these "want lists".) Rather, most of the current bidders are concentrating mainly on the New Orleans issues which are seldom found in fully struck condition--even in the occasional original roll which may be located. The term "gem MS-65", by the way, can be misleading--what these bidders are actually looking for are coins which more properly should be called "gem MS-65+" (MS-65 is generally associated with the word "choice").

Some of the bids recently monitored for outstanding specimens--fully struck pieces with very few detracting marks of any kind--fall into the following ranges: 1880-O \$32-\$35, 1884-S as high as \$1350, 1886-O \$275-\$300, 1889-O \$55-\$60, 1891-O \$65-\$70, 1892-O \$220-\$250, 1893-O as high as \$1000, 1894-O as high as \$600 and 1896-O as high as \$500. It must be stressed that these bid ranges are not really for "choice MS-65" coins--but rather, for the exceptional examples that numerous collector/investors want their dealer-suppliers to locate for them. Finding true MS-65 specimens of these and several other "O-mints" is a tough enough problem--locating superior coins can be a monumental task!

It might also be noted that one major silver dollar dealer is also beginning to include several of the Redfield "S-mints" on his buying lists--with slightly higher bid prices noted for many of the 1885-97 dates. The current requests are for "up to five pieces"--which, considering the availability of these dates, shouldn't be a difficult order to fill.

Readers will note that the 'VF/better' roll listings for Mercury dimes and Walking Liberty halves (page five) have been changed to "XF/AU." This adjustment comes about as a result of increased bidding for common date pieces in these two series in the higher circulated grades. Several dealers are interested in acquiring rolls of original lustrous coins--and they are not as easy to locate now as they were a year or so ago. The XF-AU Mercury rolls are currently bid at \$35 and the Walking Liberties at \$48; bidders, of course, do not want cleaned VF/XF pieces--but only coins with at least some original luster and a minimum of wear. They will take quantities of both.

This Week's Market

CENTS: Several Lincoln issues in the '34-'42 group have registered small gains this week. Current bidders, as has been often mentioned, want only choice rolls which can be broken up and used for single sets. Again it should be stressed that it is a simple matter to locate inferior to average rolls below bid--but that such material seldom changes hands at any price. Since last week's MONTHLY SUMMARY report, buying prices for 1909-SVDB's has moved higher as follows: Good \$120 (unchanged), VG \$127.50, Fine \$140, VF \$145, XF \$155, AU \$170 and MS-60 \$195--with bids noted in the \$230-\$250 for full red MS-65 pieces.

NICKELS: Present bid levels regularly fail to produce sales of the three earliest half-dime issues in any grade; several potential buyers are hopeful of locating the Flowing Hair and both the "small eagle" and "large eagle" reverse Draped Bust issues in defect-free condition--but sellers rarely appear on the teletype circuits. It is doubtful that edging bid levels higher would have much affect since this early material sells quickly on the retail level. The Jefferson rolls have recorded a few small losses. It should be added that, as with the Lincolns, "less-than-choice" rolls can be purchased at prices somewhat below the CDN "bid-ask" levels for choice MS-65 rolls (as may be evidenced by lower prices reported elsewhere--which are presumably for rolls which fall short of the quality in which dealers and investors are interested.)

DIMES: Major buyers are leaving today's bid levels for the 1934-45 Mercury rolls intact--now preferring instead to ask for five or ten "gem, full bands" specimens of numerous issues. The coins they are asking for fall more into the MS-65+ category--and some of the current bid prices for these singles reflect this fact (examples: 35-D \$115 to as much as \$125, 37-D \$28 and 39-S \$30!) The pre-1934 dates, too, remain on several lengthy "want lists"--but with "quotes" usually requested rather than specific buying prices indicated. The Roosevelt series is rather quiet--with the scarce 1950-S roll up slightly at \$430 bid and the 1953-64 issues easily located in quantity.

QUARTERS: Interest in strictly MS-65 examples of the low mintage 1938-S and 1939-S issues has edged bids to a slightly higher respective \$34 and \$37; quantities of both are wanted. The 1941-64 BU roll set has taken a \$200 jump this week--to \$6700--with none yet being listed for sale. Although most of the sixty-one rolls in this set can be located individually with varying degrees of difficulty, finding sellers of already completed roll sets is not an easy task. Dealers have still had no luck in finding even a single defect-free 1804 Draped Bust quarter--nor have any of the rare 1796 versions been listed for sale at any price!

HALVES: Several small advances were noted for Walking Liberty "short set" issues--very few transactions have been recorded. The BU roll set of Franklins is up another \$100--but offering to pay the higher \$5200 is still unsuccessful. With the exception of 1948-P (lower at \$170 bid), the individual Franklin rolls are unchanged this week. The very scarce 1839-O half dollar has remained on one dealer's buying lists for many weeks--and buy prices have been advanced once again--to: Good \$55, VG \$70, Fine \$150, VF \$210, XF \$285 and AU \$390.

DOLLARS: A number of the key and semi-key Morgans in circ condition appear regularly on "want lists"--with further price hikes registered. Such issues as 79-CC, 89-CC, 93-O & S, 94-P & S, and 95-O & S are few and far between--particularly in grades above Fine. For activity in the BU area, see "The Market in Depth."

PROOF SETS and MINT SETS: The newly introduced 1977-S proof set has edged up to \$10.50 bid--with surprisingly little attention being directed to either buying or selling! The 76-S six-piece set is lower again in the \$8.10 - \$8.60 range. Actually, the entire proof set and mint set lineup reflects continued apathy on the part of most dealers (with an occasional bargain-hunter appearing here and there on the teletype circuits).

COMMEMORATIVES: Scattered issues have once again edged a bit lower in both MS-60 and MS-65 condition. However, a few buyers have begun to appear--the optimistic ones offering to pay "5% under bid" for rather long lists of issues and the more practical ones asking for properly graded pieces "at bid". (Those dealers who always look for bargains often find that the coins shipped to them are the ones which have been rejected by the dealers who will accept only strictly graded material and who will pay current bid levels.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$146.50 per ounce.

BIDDERS WANT QUANTITIES OF CIRC MATERIAL

The O-Mint Morgans Continue Advances; MS-65 Pieces Elude Buyers

The Market in Depth

ALLEN HARRIMAN

Teletype bidders are finding that it is not only the key dates in the various later series which are elusive. There are several regular buyers who want numerous dates which are usually considered “easy” as well as the somewhat more scarce recognized semi-key issues in such series as Liberty and Buffalo nickels, Mercury dimes, Standing Liberty quarters and, of course, the popular Walking Liberty halves. In addition, two or three dealers often run lengthy lists of the dates in the three Barber series that they need.

The problem facing these current bidders is that they nearly all seem to want “quantities”--some want “strictly Good or better” while others want Fine, VF or even quantities of XF specimens. It is apparent that today’s bid prices are not yet at levels which will entice much of this material into the marketplace--if, indeed, as many hoards actually exist as is generally believed. It may well be, for instance, that the 1883(NC)-1896 Liberty nickels simply weren’t saved in any large numbers in Fine to XF condition--a major percentage of the extant pieces probably fall into the AG/VG group or they are AU to MS-60. Another example is the current interest in VF and XF early Walking Liberty halves. Again it isn’t too much of a task to locate the lower grades and there seem to be enough “sliders” to go around--but those strictly graded VF and XF pieces are almost always located one or two at a time.

And overgrading isn’t only a problem which faces the buyer of uncirculated material. Today’s demand for quantities of circs in these various series often results in AG or AG/G coins being shipped as “full Good”--nice Fines may become “XF” and strict Very Fines are frequently cleaned and sold (or attempted to be) as “XF.” Needless to say, many of the true XF’s which used to be “original” have been cleaned and toned to appear AU. As one dealer recently stated, it is becoming a rare sight to see an original uncleaned XF coin these days!

The “O-Mint” Morgans discussed last week have continued to forge ahead. Foremost among this week’s winners are two dates which many knowledgeable silver dollar specialists consider to still be vastly under-rated in truly choice fully struck MS-65 condition--the 1889-O and 1891-O issues. Both have moved to \$60 bid this week! Another advance has been registered by the even tougher 1886-O (up to \$260 bid)--and a considerable amount of teletype bidding time is devoted to attempts to locate choice examples of 1892-O, 1893-O, 1894-O, 1896-O and 1897-O. Asking for “quotes” doesn’t seem to be much more effective than raising bid levels. although a few 1889-O and 1891-O’s were shipped as a result of this week’s substantial bid increase. (Whether the coins will meet the bidders requirements for full MS-65 or not remains to be seen.) It is often a tendency of dealers to call a nice mark-free MS-60 or MS-60+ coin “full MS-65” if fully struck specimens are rare enough. But, of course, it is the bid price which sets the fully struck coin apart from the majority of specimens--not the fact that a particular coin is “nice for the date.”

\$160 for VF, \$170 for XF, \$170 for XF, \$180 for AU and \$200 for MS-60 pieces. Up to “five of each grade” are wanted--but at these prices only original color, defect-free coins are acceptable. Surprisingly few have changed hands! Also still enjoying very strong bidder demand is the scarce 1922-Plain; the higher bids reported in the May MONTHLY SUMMARY are producing very few sales. Mild interest in bag quantities of the several late date S-mint Lincolns is evident--with an occasional transaction recorded.

NICKELS: Teletype bidders are finding that the better dates in both the Liberty and Buffalo series are quite difficult to buy. Frequent and rather extensive “want lists” include all of the 1883(WC) thru 1896 Libs and virtually all of the pre-1927 mint-marked Buffs in grades from Good thru VF and XF--but, in spite of the fact that bidders want “quantities”, only scattered small groups are occasionally traded. Apparently current bid prices are not yet at levels which will yet entice many sellers--if, indeed, hoards of this material are going to become available.

DIMES: Quantities of the 1953-64 Roosevelts (plus smaller amounts of such earlier dates as 51-PD and 52-PD) are on the market--several now at slightly lower prices. Buyers, however, seem unimpressed with the fact that a number of the usually popular dates (53-S, 54-S, 55-DS, 57-D, 58-P) are offered at levels barely above the common date BU silver price. Should another “push” materialize, of course, those far-sighted investors who may now be “squirreling away” their favorite dates will be well pleased with themselves! On the otherhand, predicting when a strong general advance in this (or any other) series will occur is virtually impossible--so investors should be “long-term” minded just in case!

QUARTERS: The 1941-49 Washington rolls are of mild interest to a few dealers--but they apparently are not in enough of a buying hurry to raise bid levels. Keeping an eye on various selling lists is often all that it takes to pick up an occasional roll or two in this group. (The most elusive dates, at this moment, include 41-DS, the key 42-S, 43-S and 48-S.) Constant bidding for the three key Barbers (96-S, 01-S, 13-S) in “any grade” meet with very little success--and the frequent requests for the 1916 Standing Liberty meet with the same slim results.

HALVES: A bit of profit-taking has been evident in the Franklin series throughout the week. This doesn’t mean that large numbers of rolls are being offered--only that buyers are now somewhat more patient and that an occasional seller will edge prices lower in order to “move” a few rolls. It should be mentioned that the current \$5200 bid for complete BU roll sets is still unsuccessful. Several of the S-mint “proof only” Kennedy rolls are also available at slightly lower prices--but, again, the complete roll set is steady at \$1225 bid. Dealers are anxious to locate 1977 dated Kennedy rolls--and will pay \$12.50 for either mint; so far, none have been listed for sale.

DOLLARS: Most of the numerous changes in this area are again on the plus side--with the more common rolls sharing gains about equally with the elusive singles. One or two dealers are in the market for the Redfield S-mints (1885 thru 1897)--and, as was noted last week, strict grading is a must! Small advances have been registered by the 1972-74 “blue” Ikes--certainly a welcome change from the recent trend!

PROOF SETS and MINT SETS: The 1977-S set has advanced to the \$11.25 - \$12 range--with scattered transactions recorded at \$11.50 or so. Several buyers want from fifty to two hundred sets--and it is apparent that Mint’s initial shipment has been somewhat dispersed; sellers are now rather firm with their price tags. The 1976-S set, on the otherhand, continues its downward drift--ending the week at \$7.90 bid. Interest, by the way, in the 1950-55 sets (plus 1957) has picked up a bit--though most dealers still offer to pay only current “bid”. (The 1957 set is the exception--with several sales recorded in the \$5.20 - \$5.40 range.)

COMMEMORATIVES: One of the more active commem dealers has re-entered this area--but mostly with “bargain hunting” bids (although a few scattered gains are in effect). Actual trading remains very light--with most of the current transactions being the result of dealer needs for specific customers.

This Week’s Market

CENTS: Last week’s strong buyer of properly graded 1909-SVDB’s has once again raised his bid levels--now offering to pay \$150 for full Fine specimens,

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$144.00 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES:

\$10.00 per column inch; four consecutive ads (no changes) - 10% discount.

Advertising space is limited; ads will be placed in first possible edition.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the 3-mint issues) are worth more than listed prices.

MARKET CLOSING PRICES BU SILVER DOLLARS

MS-60 singles are worth more than the MS-65 prices below. Roll prices are for average strikes for the issue. Choice full MS-65 rolls usually bring more than the listed prices. Scarce and rare date rolls should be figured on the basis of the quality of the individual coins involved.

BARGAIN HUNTERS DOMINATE TELETYPE CIRCUITS Proof Sets Suffer Further Losses; Choice Material Scarce (as usual)

The Market in Depth

ALLEN HARRIMAN

The long holiday weekend—coupled with what may perhaps be the beginning of “summer trading”—has resulted in a very quiet week on the teletype system. Numerous dealers apparently added an extra day or two to their “closed” sign and many direct teletype messages went unanswered for a time. The bidding which was monitored during the week fell more or less into two categories—bargain-hunting for the later material together with the continued search for choice and gem material in such series as the Barbers, Buffalo nickels, Mercuries, Standing Liberty quarters and Walking Liberty halves. There seems to be plenty of the former available—and very little of the latter! In addition, interest in the circulated material discussed last week remains quite evident and, of course, the key and semi-keys in all earlier series are always wanted in quantity and in any grade.

Further reductions in proof set “ask” prices have accompanied rather large offerings of the 1956 to date issues. Prices for a number of sets are at the lowest levels recorded in years—with the ‘71 and ‘72 sets now bid at only a respective \$2.90 and \$2.95! A bit of interest is noted occasionally for the 1956-64 sets—but virtually all bidding is—as mentioned above—of the bargain-hunting variety. The 1936-42 sets, as usual (and, to some degree, the 1950-52 issues) are not easy to find in choice condition; current bid prices these are firm.

One major dealer has now begun to break-up 1977-S proof sets for individual S-mint proof rolls. Current “ask” prices are: cents \$300, nickels \$100, dimes \$38, quarters \$42, halves \$50 and dollars \$55. Very little buyer interest is noted at this point—in fact, no bids have as yet been entered. This is in direct contrast to the circulation strike Philly and Denver quarters and halves—both of which are receiving bids (\$12 and \$12.50 respectively) and requests for “quotes” and neither of which seem to be available on the teletype circuits.

It is rather interesting to note that the highest current bid on the teletype circuits for the 1963-66 Canadian prooflike sets is \$4.50—slightly under the “melt value” of the four 80% silver coins involved (in addition, of course, there is a six-cents “bonus” in each set with the cent and nickel). Sellers are willing to part with sets at prices which are virtually identical to the value of the sets if they were to be broken up and thrown into bags of common Canadian silver coins. Mintages for these four sets, by the way, are far lower than their U.S. counterparts: 1963 (673,006), 1964 (1,653,162), 1965 (2,904,352) and 1966 (672,514). Considering the number of sets which are bound to be melted (who go to the trouble of packing, shipping and paying the postage?), these sets—particularly 1963 and 1966—may well prove to be relatively scarce in years to come.

This Week's Market

CENTS: Few if any properly graded defect-free early “coppers” have changed hands during recent weeks in spite of continued efforts to buy. Most potential buyers know that raising bid levels only results in higher price tags on those pieces which may be available—so, as a general rule, bidders now simply run their “want lists” without specific buy prices. Bag quantities of numerous late date Lincolns are still wanted—with a few small price advances noted again this week.

(At least one dealer will pay “over current bid” for several dates—but in this case only “original mint-sewn bags” are wanted.)

NICKELS: All of the S-mint proof Jefferson rolls (1971-76 have been offered for sale at lower levels this week. It is interesting to note the comparison between the “proof only” Lincolns of 1975 and 1976 (both of which have held up rather well) and the “proof only” Jeffersons (which haven’t). Changes in the remainder of the series are minor—trading remains extremely light. Locating truly choice rolls of Buffalo nickels is definitely not an easy task. At the current bid of \$250 even the relatively plentiful 38-D is rather elusive—and the 1934-36 rolls are rarely offered on the teletype circuits.

DIMES: Even though bid levels are unchanged, dealers remain interested in all Mercury rolls—with the usual emphasis placed on the pre-1941 issues. Many of the choice original rolls which used to be traded are now being broken up for single sales—particularly if the coins involved have fully separated crossbands. (The 1937-D and 1939-S issues still seem especially difficult to locate in this ultimate condition.) The Roosevelt series is still very quiet—with the often popular 55-S roll edging even closer to the “common date” category (a few sales were registered this week around \$18). Bids for nice defect-free G/VG examples of the 1796-97 “small eagle reverse” and 1798-1807 “large eagle reverse” dimes have increased to \$375 and \$140 respectively—with none changing hands.

QUARTERS: Bidders continue their frequent attempts to locate the elusive 1804 Draped Bust quarter in “any grade.” As was recently mentioned, this very low mint-age issue (only 6,738 coins) seems drastically under-valued in the Redbook; offers to pay “full book” and requests for “reasonable quotes” are still quite ineffective. Interest in the 1932-40 Washington singles is quite evident on the various teletype circuits—but potential buyers are sticking to present bid levels in their attempts to locate one or two of the keys and “up to ten” of the lower priced issues.

HALVES: Prices have moved higher for the 1935-P, 36-P and 37-P rolls. None of the 1934-40 P-mint halves are easy to locate in full MS-65 condition—a majority of the pieces listed for sale fall more into the MS-60+ category. Several dealers also want any fully struck S-mint issues in the 1940-46 group and they will gladly take singles rather than wait for rolls. Three rolls in the Franklin series (48-D, 52-S and 54-S) have been listed for sale this week at slightly lower prices; otherwise, the series is firm—and the \$5200 bid for a complete BU roll set is still unsuccessful.

DOLLARS: A considerable amount of bidder interest is noted for virtually all dates in both the Seated Liberty and Trade Dollar series in grades from Fine through AU. Lengthy buying lists are netting only limited results—with very few of the scarcer issues changing hands. Key and semi-key Morgans occupy a reasonable amount of teletype bidder attention—with prices edging forward here and there. The BU rolls and singles are generally quite firm—with a substantial number of dealers still concentrating upon this area of the market.

PROOF SETS and MINT SETS: Incredibly, another wave of minus signs has hit the 1956 to date proof sets. Quantities of most issues can be easily located and practically all of the current bidding is strictly “bargain hunting.” The new 1977-S issue is now on the tapes in one and two hundred set lots—in a lower \$10.50 - \$11.25 range; the 76-S version continues to slip lower—with sales registered as low as \$7.75.

COMMEMORATIVES: Another virtually unchanged area; only an occasional transaction is noted—usually of a few single coins to fill specific customer needs. The Lafayette dollar is probably the most difficult issue to locate in truly full strike MS-65 condition—higher bids of \$835 produce no results. Gem specimens, by the way, have changed hands on the retail level for as much as \$1200–\$1400!

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$144.10 per ounce.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MARKET CLOSING PRICES BU SILVER DOLLARS

Gen. MS 65 singles are worth more than the MS-65 prices below. Roll prices are for average strikes for the issue. Choice full MS-65 rolls usually bring more than the listed prices. Scarce and rare date rolls should be figured on the basis of the quality of the individual coins involved.

TYPE COINS REGISTER NUMEROUS ADVANCES Extensive Buying Lists Cover Higher Grade Circ, MS-60 & MS-65 Material

The Market in Depth

ALLEN HARRIMAN

This week's many plus signs which are liberally scattered across the page four type coin charts are definitely a welcome change from the static price levels of recent months. A large percentage of these advances are the result of one major Eastern dealer's attempts to buy not only nearly all types in the MS-60 and MS-65 grades--but also numerous types in the higher circulated grades. In addition to the issues which have registered gains, many others were receiving frequent bids at currently established levels. This strong bidder, it should be added, is a member of both teletype networks--and extensive and frequent buying lists have been appearing on all of the numerous teletype circuits nationwide. Quantities of this material is wanted--and in view of the slow trading experienced in this area during recent months, surprisingly few coins are being shipped to this newest strong buyer.

It should be emphasized that proper grading is a must--as it is in all areas of numismatics these days. "Super-sliders" will not command the MS-60 price and nice MS-60+ pieces will not be accepted as MS-65. For circ material, coins with small problems are not wanted--and, again, VF/XF pieces will not pass as XF, etc. Perhaps strict grading standards are one of the reasons that relatively little material is changing hands in spite of these increased bid levels. Dealers with coins that fall into the "borderline" category (or which have an edge nick or scratch) realize that shipping will only result in returned coins and lost postage--and so they, for the most part, chose not to bother. Some dealers will almost certainly complain that current buyers are "too fussy"--but the fact is that most of today's bidders are selling this material to investor/collectors and they want to make sure that they would be happy to buy the coins back at some future date. This attitude is far more healthy for the market, of course, than the one in which dealers are pleased to "see the last" of the coins they sell!

There are also two major dealers who are very interested in buying uncirculated gold type coins. This week's several advances in both the MS-60 and MS-65 columns reflect the continued efforts to acquire these pieces--and the combined advances in bid levels of these two strong buyers. It should be added that the rarely encountered "gem MS-65+" specimen will command prices in excess of the listings for choice MS-65 coins. The June MONTHLY SUMMARY, by the way, will accompany next week's CDN mailing and will feature an important and informative article on U.S. gold type coins.

Readers will note that the various late BU roll sets--for cents from 1959 to date--and for nickels, dimes and quarters from 1965 to date (as well as the entire Kennedy and Eisenhower series) have all registered gains this week. This is not due to increased interest--only to the fact that the new 1977 issues have been added--thus adding to the number of issues now included in these roll sets.

This Week's Market

CENTS: Several advances have been registered this week for the scarcer half-cent and large cent issues in circ condition--as well as for a number of types in MS-60 and MS-65 condition (see page four for details.) These higher bids, for the most part, have met with little success. More and more dealers are trying to locate "gem" pre-1930 Lincolns; "want lists" are lengthening--and very, very few pieces which fit

bidder requirements are being listed for sale. One dealer did recently run a fairly complete run of dates in superb condition--at prices roughly "double Redbook"--and virtually every coin sold almost immediately!

NICKELS: In this area, too, prices have advanced for a number of types in the higher circ grades--and in both uncirculated grades; actual transactions have remained quite limited. One bidder is offering to buy all of the 1934-38 Buffalo rolls "at bid" (with a small gain noted for the 38-D); the buyer, of course, wants choice rolls--and, so far, few have been located. The Jefferson series has suffered another round of losses for many dates in the 1945-55 group; lowering ask prices for most of these issues doesn't spark much buyer interest.

DIMES: Gains for the pre-1941 Mercury rolls this week include: 1936-P, 1938-P and 1940-D--all bid now at a higher \$300 each; 1937-P bid at \$275; the very scarce 1937-D roll wanted at a considerably higher \$1200; 1938-D & S receiving bids now at a respective \$675 and \$575; the also very tough 1939-S roll bid unsuccessfully at a higher \$950! Strictly MS-65/better "full bands" single specimens of any of these (as well as practically all of the other 1934-45 issues) will bring prices well in advance of the pro-rated roll price. The 1941-45 rolls are steady--with an occasional P-mint roll being listed for sale with current bid-ask ranges. The Roosevelt series is nearly unchanged--in continued very light trading. For the many changes this week in the type area, again see page four!

QUARTERS: Several individual Washington rolls in the 1945-52 group are sporting plus signs--for a welcome change! And the 1941-64 BU roll set has moved ahead an additional one hundred dollars--bid now unsuccessfully at \$6800 (the single BU set is listed this week in the \$175 - \$190 range--with few choice sets noted on selling lists.) Interest continues for the key and semi-key 1932-40 singles--with gains recorded for the 32-D (\$635 bid), the 34-D (\$95 bid) and the 36-D (\$245 bid.) As in the small denominations, this week's general advance in circ and uncirculated type coins has also affected a number of the quarter issues.

HALVES: Gains are quite thoroughly scattered across the various types of half dollars--again in the higher circ grades in addition to MS-60 and MS-65. It cannot be stressed too often that bidders want conservatively graded material--coins that are free of defects--and coins that have not been improperly cleaned. The Walking Liberty rolls are very firm--and very seldom offered. A few Franklins (50-D, 52-P, 54-P & S) are just a bit lower--but, again, \$5200 bids for choice complete BU roll sets (1948-63) are being ignored.

DOLLARS: Prices are lightly mixed this week across the page six BU charts--with a few of the most common rolls and a few of the S-mint Redfield singles reflecting a bit of profit-taking. Gains continue, on the otherhand, for a number of the scarce and rare singles (84-S, 86-O, 93-CC, 94-O) and for some rather elusive rolls (80-O, 00-P & O, etc.) In the circ area, the 79-CC, 89-CC and 93-CC & S issues have registered further advances. Circulated VG/better rolls are a bit lower than in recent weeks--pegged now in the \$77.50 - \$81 range.

PROOF SETS and MINT SETS: Current low prices have brought out a few bidders for the 1956-60 sets--with several willing to take small quantities (ten to twenty-five sets) at current bid prices. Bargain-hunting remains the rule for nearly all of the S-mint sets--with small gains noted for the 1973 and 1975 issues. The 1976 and 1977 issues are both available in quantity at even lower levels.

COMMEMORATIVES: Attempts to buy truly choice MS-65 Isabella quarters and Lafayette dollars at respective higher bids of \$260 and \$850 usually net only MS-60+ specimens--at best. A few scattered minor losses plague the remainder of the silver issues; there are several potential buyers on the teletype circuits--but practically all are only in a bargain-hunting mood. Proper grading is somewhat of a problem in this area (not only this area, of course)--and many of the "choice" specimens listed for sale fall a bit short of this description.

U.S. GOLD. (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$141.80 per ounce.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

TYPE COINS REGISTER FURTHER ADVANCES "Summer Trading" In Effect Across Market; Most Bidders Have Specific Needs

The Market in Depth

ALLEN HARRIMAN

Last week's rash of plus signs for type material has been followed by additional numerous gains during this trading week. The majority of these increases are still the result of one major buyer's attempts to locate these coins--and in spite of the regularity with which this bidder's "want lists" appear, sales have remained quite limited throughout this latest upsurge in bid prices. One of the problems limiting sales may be the fact that most of the teletype members are well aware that these bids are for strictly graded coins--and at least some may feel that they can "push" the grade a bit more easily when selling to retail over-the-counter customers or thru convention bourse table sales. Shipping even slightly over-graded coins--or pieces with scratches, dings or other problems--at these higher teletype bids simply results in a returned shipment. As was stressed last week, it is not only in the uncirculated grades that today's buyer is quite quality conscious.

Choice gold type coins also continue to occupy a relatively important amount of teletype bidding time--again with very few actual transactions being recorded. In this area, however, bidders are basically interested in strictly choice MS-65 specimens--or in the far more elusive "MS-65+ gem". For these gems, of course, most knowledgeable bidders are offering to pay somewhat over the MS-65 listings--or they are merely asking for "quotes". There are a few dealers who obviously have specific client "want lists" for truly superb specimens of the more common gold types (\$2½ Liberty and Indian, \$5 Liberty/wm, \$10 Liberty/wm)--and they are willing to pay very impressive prices for specimens which truly fall into the "among the finest known" category! Needless to say, such outstanding gold coins are so few and far between that they very rarely appear on the teletype circuits--or, for that matter, they rarely are encountered anywhere! The extensive article on gold type coins in the enclosed June issue of the MONTHLY SUMMARY should prove informative and helpful to those many subscribers who have been or are becoming interested in the growing area of the market.

The remainder of the market is now generally experiencing normal "summer trading"--with most of the bidding that is monitored being to fill specific store-stock or customer needs. Prices are bascially steady in virtually all areas. It should be noted that somewhat inferior BU rolls are on the market "at bid"--or even at 5%-10% discounts. But, these rolls are often far from suitable for single sales--or for putting away as investments. Roll buyers, too, want choice material--so, when it comes time to sell, they will not be faced with the problem of what to do with spotted cent rolls, weak and/or discolored nickel rolls, or "put together" silver rolls which contain a sprinkling of MS-60 or even "slider" coins.

This Week's Market

CENTS: Bidder requests for strictly choice BU (MS-65/70--full original red and spot-free) half cents and large cents rarely result in a transaction. Specimens without "problems" (usually "flyspecks" or fingerprints) are very seldom encountered except occasionally on the bourse tables of the most well-stocked dealers--or when a major collection reaches the auction blocks. In these instances, it might be added, price tags are almost invariably well ahead of current

dealers bid levels. In the area of later material, one dealer is currently looking for "mint-sewn" bags of all the P-mint Lincolns from 1965 thru 1971.

NICKELS: Advances have been registered by both the Type I and III Three-cent silver pieces in MS-60 as well as MS-65 condition; both issues are now bid at \$110 and \$280 in the respective grades. Little change is noted for the very lightly traded Jefferson series--with the exceptions of losses for the 38-S, 42-P (II) and 43-D rolls.

DIMES: The 1941-45 BU roll set of Mercury dimes has moved ahead to \$2550 bid--with none offered to bidders. The "impossible" complete BU roll set from 1934 thru 1945 is wanted at \$20,000!--needless to say, it has been years since such a sale offering has been monitored. The single "short set" ('34-'45) will now easily command \$415-\$450 according to the percentage of "full bands" pieces included (even the most optimistic bidders don't expect a "FB" 1945-P). Gains are extensive this week for the individual Mercury rolls--see page two and three! And while checking prices--see page five for further advances in "type".

QUARTERS: Last week's stirring of interest in Washington rolls has resulted in a few more small gains (44-P, 45-PD, 46-P)--delaers want several more issues in the '41-'53 group, but most are content to wait for results at currently established bid levels. Additional advances have been noted in "type"--including higher prices for the "no drapery" and both the "no motto" and "with motto" versions in AU condition. (Buyers, of course, want strictly About Uncirculated coins--not choice XF pieces with a bit of luster!)

HALVES: Relatively few Franklin rolls were being listed for sale this week; prices remain unchanged with the light to moderate trading all within present bid-ask ranges. Buyers are still in the market for large quantities of late common date rolls in the \$39-\$41 area. Gains are noted for two Walking Liberty rolls (46-P and 46-S--bid now at \$285 and \$340 respectively); otherwise, this series is firm. Several dealers want common date P-mint rolls--but few are being located at today's prices.

DOLLARS: The following Morgan rolls are on the plus side of the ledger:

1889P - Wanted in quantity at a higher \$160

1896P - Now on several "want lists"--also at a higher \$160

1898P - Transactions noted as high as \$195

1900P & O - Bids are now being recorded at \$162.50 and \$168 respectively

1901O & 1904O - Now wanted at \$161 and \$135

PROOF SETS and MINT SETS: Three or four dealers are becoming interested in proof sets at current low levels--but they still aren't in the mood to increase bid levels. Several other potential buyers are in evidence on the teletype circuits--but this group still hopes to buy at further discounts from the already depressed price levels. Sales, as a result, have remained minimal. The 1977-S set, by the way, is still lower this week--in the \$9.65-\$10.15 range.

COMMEMORATIVES: In spite of a nearly unchanged price chart, there are more buyers than sellers now on the various circuits. Some are still "bargain-hunting"--but more are willing to pay presnt prices for properly graded pieces. One problem in this area is the number of MS-60 or MS-60+'s being shipped as full MS-65 coins. Commem buyers are quite "fussy"--knowing that all but a very few issues are rather easily available in strictly choice, fully struck condition.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$136.90 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer to dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES:

\$10.00 per column inch, four consecutive ads (no changes) - 10% discount.

Advertising space is limited, ads will be placed in first possible edition.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

A DISCUSSION OF THE CURRENT GRADING DILEMMA BU Morgan Singles Gain In Active Bidding

The Market in Depth

ALLEN HARRIMAN

As readers are aware, "bid-ask" prices for Unc. MS-60 and choice BU MS-65 type coins have remained virtually unchanged for several months---with the exception of a number of small gains registered in recent weeks. This, however, does not mean that there have been sufficient quantities of material available at current bid levels to satisfy dealer needs. Quite the contrary is true---particularly in the choice MS-65 category. One of the most common complaints among dealers is that they cannot find enough nice material to satisfy current demand.

It is apparent that there are few sales of truly choice material except thru "private treaty" sales and at major auctions---and at auction, of course, choice and gem coins usually bring prices well in excess of "bid" or "ask". One of the main factors limiting transactions in the MS-65 category is the fact that nearly all of today's buyers are extremely "fussy" graders. Many of the coins traded ten, five or even a year or two ago as choice MS-65 do not now fit many dealer's current requirements for the "choice" classification. This problem roughly parallels the time when the grading of coins only involved placing a specimen in one of four categories: Good, Fine, Extra Fine or Uncirculated. (How many readers are aware that the first issue of the Redbook (copyright 1946) included prices for only Fine and Uncirculated coins?) This, of course, is why when a really "old time" collection comes to light, the grade on the envelopes or albums containing the coins often seems ridiculous in light of today's standards.

For example, last year a complete set of Bust halves was sold intact to a collector. This set contained not only every date from 1807 through 1839, but also a great many of the important varieties. They were in the original envelopes as put away at the turn of the century---these envelopes were marked either "Fine", "Extra Fine" or "Unc.". The coins inside, however, ranged from a low side of VF to a high of Gem BU---and, incidentally, all of them had the superb matched original toning which can be acquired only over many years. The majority of the coins probably fell into today's MS-60 rating. (In 1900---and indeed until recently---MS-60 and MS-65 were terms which referred only to copper coinage---never to other series.) What all this points to is simply that grading standards are not only becoming more and more exacting today, they have been being refined for the past 75 or 100 years! It really isn't anybody's "fault" that a coin bought years ago as "Choice BU" is not Choice BU today.

Another example is the statement made recently by a major dealer who regularly handles many of the scarce early BU rolls. He told us that several years ago he had put away a BU roll set of Walking Liberty halves from 1934 through 1947---and that upon a recent examination of these rolls he was "very disappointed" (to put it mildly) to find that although the coins were all definitely BU, a number of the earlier issues were "typical strikes" for the issue and, therefore, certainly not choice by today's standards. What had been put away, for instance, as a choice original roll of 1935D's turns out today to be a roll of flat head coins saleable only as MS-60---or as MS-60+ at best. Yet they were Choice BU in 1970! The tendency of many investors to blame the dealers from whom they bought coins several years ago for the fact that the coins do not stand up under today's close scrutiny is often groundless. It is only that grading standards have changed considerably. (Not that there weren't unscrupulous dealers a few years ago---there were---in fact, probably more than today) but the majority of such present discrepancies are merely due to current more strict grading standards.

Conversely, those buyers who had an "eye" for choice material a few years ago may well be very happy when they view their coins today. These early "fussy buyers" have been finding that they now have the gems now so sought after---purchased previously merely as BU coins. In the Bust half dollar collection mentioned above there were a number of truly superb coins (even by today's standards) which were graded at the time of purchase as only XF to Unc. These halves were purchased (as the handwritten prices on the envelopes indicate) for from \$1 to \$5 each and clearly the collector bought the nicest available from the very few coin dealers who were in the business at that time;

the collector apparently made very little effort to assemble a uniformly choice set of coins---the outstanding pieces included were there more or less as a matter of luck! It is obvious that very little, if any, premium was attached to the gem coin over and above the specimen which today would be called AU or a "slider". It wasn't until the early 1960's that various other grades began to be added to the Redbook columns---and presumably the tendency was still to grade rather conservatively. In other words, a VF was most likely called "Fine" and VG called "Good". On the other hand, what is called a "slider" today was still almost certainly graded "Unc." by most dealers and collectors. The Redbook, as you know, still only lists one column of prices for "Unc."---leaving prices between AU and Gem MS-65+ up to the individual, with only a comment here and there that "full strikes" etc. are worth a percentage more than the prices listed. (It does seem that the distinction between Good and Very Good often listed in the Redbook is far less useful than a column for AU or a distinction between Unc. and Choice BU would be.)

Perhaps the most bothersome problem concerning grading today revolves around the MS-65 category. It is generally recognized that "MS-70" is a perfect coin (although many dealers feel that no coin is perfect and that there are, therefore, no such specimens). However, if it is agreed that MS-70 is perfect, it must logically follow that MS-65 is not perfect. Here is where the problem arises---many collectors (and some dealers as well) are looking for that flawless specimen and, should they find one, the tendency is to expect to pay the MS-65 bid or ask price for it. This is not always true of course, but it does seem to be the general tendency today. The rarely encountered flawless coin (let's call it MS-65+) is worth more than the bid or ask MS-65 price---and often considerably more! The serious collector who wants to assemble any set of gem MS-65+ coins should be prepared to pay prices well in excess of the CDN's MS-65 listings. MS-65 coins, which are not perfect, do have an occasional mark or two, perhaps a slight weakness of strike or even minor hairlines or other imperfections---regardless of what some dealers seem to demand when they are buying! MS-60 coins, in descending order, have more definite problems of one sort or another; they are, however, strictly uncirculated; may have detracting marks caused by contact with other coins, more definite hairlines, obvious weakness of strike or lack of original luster. They are simply that much further removed from the "perfect MS-70" or gem MS-65+ category. Unfortunately, the majority of uncirculated numismatic material, particularly pre-1934, falls into the MS-60 or MS-60+ category.

This Week's Market

By far the most actively pursued coins by teletype traders were Morgan and Peace dollars---especially the Carson City issues and the moderately priced singles in the 1890's. The Eisenhower series showed some spark of interest with a few bidders desiring the key proofs in quantity. They were content to fill their needs with the occasional bargain offerings at slightly under current price levels. Most late date "S" proof rolls---cents through halves declined as numerous sellers dropped prices in an attempt to unload these slow selling items. The notable exception to this was the 1974-S Jefferson nickel roll (Bid moves to \$90.00.)

The summer slow down has affected virtually all areas of the market, however, a few subtle changes could be felt from teletype trading. Inexpensive proof sets appear to have hit bottom. Several bidders are asking for quantities of all the later issues---especially the low priced silver sets from 61 to 64.

Most Walking Liberty rolls from 41-47 are wanted---even choice singles will do as buyers attempt to fill their want lists a coin at a time.

1941, 42, 43, 44 - Bid moves to \$250.00.

1941-D - Wanted in quantity at a higher \$450.00.

1943-D - Now wanted at \$475.00.

1945-DS - Both rolls move up \$5.00.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$140.00 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES:

Advertising space is limited, ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster. MS-65 coins are choice fully struck specimens without detracting marks—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Earl Singles" above

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

A LOOK AT EARLY TYPE COINS Dollars Continue Upward Move; Gold Type Advances

The Market in Depth

ALLEN HARRIMAN

The very earliest United States type material in all grades continues to elude teletype buyers—even though bid prices have been advanced considerably since the first of the year for a number of issues. There are two major roadblocks to finding this early material. First, of course, is that the supply is quite limited and practically any dealer who locates a specimen or two already has a ready and waiting retail customer. This is particularly true if the coin shows even wear, has not been improperly cleaned, is defect-free and is well centered on a nice planchet. These requirements lead to the second roadblock. A very large percentage of the extant early "coppers," Flowing Hair and Draped Bust silver coins have "problems" of one sort or another. Often the original strike was uneven and, as a result, some areas of the design will be more extensively worn than others. This typically uneven wear often makes grading difficult and the general tendency is to grade by the strongest points and ignore the fact that the more worn areas of the piece may exhibit details (or a lack of them) which would lower the grade by one or even two categories. In addition, many of the available early type pieces have had a "hard life", so to speak—having been passed along through generations of non-collectors or, at best, were minimally preserved and perhaps cleaned every ten or twenty years. They were also, of course, holed to be worn on chains or suffered other forms of mutilation. After all, in the early 1800's these coins were usually merely curiosities; only the rarities had premiums attached to them. Those fewer specimens which were carefully preserved are the ones so sought after today and the small percentage of nice, defect-free specimens can hardly satisfy today's demands—especially in the more affordable VG/VF range.

The 1793 half cent has been a recognized rarity for many years and nice problem-free examples now seldom appear in any grade except at major auction or on the bourse tables of some of the more well-stocked dealers. The 1794-97 Liberty Cap type, on the other hand, has been somewhat overlooked even in recent years. Truly defect-free, well centered pieces on nice planchets are more elusive than the current nominal bid levels might indicate. The 1797 issue is the most "common" date of this shortlived type—with the 1794 and 1795 issues somewhat more elusive and the 1796, of course, a major numismatic rarity. The long term future for nice specimens of the Liberty Cap half cent—particularly in Fine or better condition—is quite bright and putting away the occasionally encountered choice circulated specimen is certainly an excellent idea.

In the large cent category, the Chain and Wreath types of 1793 are recognized rarities—and have been for a long time. A very large percentage of the available pieces are pitted, unevenly struck or worn and very often have edge dents. It is again the Liberty Cap type (1793-96) which seems very reasonably priced at today's levels. Current bidders very seldom locate pieces which fit the requirements of today's rather "fussy" collector/investor. Yes, even those who are interested in circ material have become more and more quality-conscious during the past couple of years. The Liberty Cap cent in the middle grades—defect-free, of course—is certainly among those coins which, if bought near current price ranges, will prove to be a highly desirable addition to any collection or investment portfolio.

The Draped Bust half cent and, to some extent, the large cent, are the most easily available denominations of this early design. The large cent, however, is more often troubled with "problems" than is the half cent. Current bid levels seem to result in sufficient sales of both of these issues to satisfy present demand chances for more than average gains seem rather limited.

The Flowing Hair half dime (1794-95), although scarce, is much easier to

locate than the 1796-97 Draped Bust type. Current bid levels occasionally net a specimen or two of the Flowing Hair type—but rarely of the Draped Bust type. This issue is virtually never seen on the teletype circuits and is not much more plentiful on bourse tables. Collectors usually have to wait for the auction of a major collection to obtain a nice piece and then, of course, bidding competition is keen and prices are often quite impressive. The "large eagle reverse" Draped Bust issue of 1800-05 is another quite elusive coin. The mintages were small and a very large percentage of these tiny coins became the victims of mutilations of one sort or another—or were poorly struck and/or unevenly worn. Both types of Draped Bust half dimes are certainly rare enough in problem-free condition to be considered excellent material to "squirrel away;" recent small but steady gains will most likely continue far into the future. Another "plus" is the fact that selling a nice specimen of any of this early type material is never a problem!

The 1796-97 dime, again, is already recognized as quite scarce—particularly without one or more of the above mentioned "problems." Current teletype bid levels are almost entirely unsuccessful. The "large eagle reverse" (1798-1807) is also seldom traded—even though considerably lower bid levels might indicate that they are relatively easy to locate. They are not. Only the 1805 and 1807 issues can boast of fairly large mintage figures and it is from these last two years of issue that the majority of type coins come. Again, putting away a few defect-free in VG/VF condition will certainly prove to have been a good move in years to come.

The rarity of the one-year-of-type 1796 quarter has been known for a long, long time. In fact, in the higher grades the rarity this issue may well be somewhat over-rated; XF/AU to "slider" pieces appear on the market with some regularity. The 1804-1807 type is far more reasonably priced and by all indications has a much brighter future—percentage-wise on the investment—than the earlier far more expensive issue. The 1804 Draped Bust is the rare coin in all grades—leaving only the 1805-07 issues for the type collector to concentrate upon. Many of these Draped Bust "large eagle reverse" quarters were poorly struck and unevenly worn, scratched or dinged. Present bid levels seldom result in more than an occasional problem-free piece changing hands and the Fine to Extra Fine specimen which is choice definitely has an excellent future due both to scarcity and considerable type collector demand. (This sort of material does not need a "promotion" to move the price ahead—steady collector demand and knowledgeable investors usually keep most of the nicest specimens off the market.)

The 1795 Flowing Hair half dollar has been the recipient of numerous bid increases during recent months. This rather large mintage early issue (317,844) has until recently been considered a plentiful coin. Current buyers seem to have cornered at least a percentage of the available "floating supply" of defect-free examples and dealer price tags are now beginning to reflect this fact. The 1796-97 half, of course, is another numismatic rarity in all grades and has been recognized as such for at least the last 100 years or so. The most overlooked half dollar, then, is the "large eagle reverse" Draped Bust issue of 1801-07. Present bid levels are quite nominal—even for the XF and AU grades—yet pieces in any grade which can be truly described as defect-free are not that plentiful. The investor or collector who puts back a few nice specimens—particularly in Fine to XF condition—should be well pleased with the appreciation which is bound to come within the next few years. Teletype dealers do offer these type pieces occasionally—but more often than not they fail to mention the detracting features which most examples exhibit.

Of the various early denominations, the three early types of silver dollars are the most easily located in all grades. They do suffer their share of "problems"—but major auctions quite often include impressive runs of dates and varieties in most grades up to and including AU or "slider". Current teletype bid levels for circ pieces are occasionally successful and bourse tables frequently feature nice early dollars. Price tags are healthy, of course, but the coins are available. Early collectors were obviously partial to silver dollars and, except for true MS-60 or MS-65 grades, it is usually only a matter of deciding which piece is the most pleasing and then comparing dealer and/or auction prices for the best value.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$142.35 per ounce.

BU ROLLS

Refer to "Early Singles" above

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

A LOOK AT BUST TYPE COINS

MS-65 Morgan's Remain "Hot"; Commemoratives Drift Downward

The Market in Depth

ALLEN HARRIMAN

Of the various Bust denominations, the 1829-37 half dime is probably the most easily located in choice MS-65 condition. (This is in spite of the numerous listings of Bust halves in this condition which can be found in retail ads and auction catalogs; we will discuss this later.) This statement does not mean that Bust half dimes are common--or even plentiful--only that other denominations are more elusive in the ultimate choice MS-65 or gem MS-65+ condition. The current bid-ask prices--static for quite a while now in the \$510--\$560 range--produces occasional teletype sales. Bourse table offerings do frequently include nice original MS-65 specimens with price tags in the \$550 - \$700 range, according to the quality of the individual coin. One well-known dealer recently decided to assemble and "put away" a complete date set of Bust half dimes in MS-65/better condition and he was able, in a relatively short time, to find but all two or three dates (with the rare 1837 small 5 ¢, of course, among the missing issues.) Still, the future should certainly be bright for all issues in this rather shortlived series--and the next major price upswing in type material will almost certainly see at least a reasonable advance in this area.

Bust dimes are a bit more tough than their smaller counterparts in choice MS-65 condition and considerably more so in gem MS-65+. In addition, of course, there are many more elusive dates facing the collector who might want to assemble complete sets of either or both large and reduced size versions. Common dates--if that term is truly appropriate--in MS-65 condition have been in the respective \$1900 - \$2100 and \$1100 - \$1250 ranges for some time now. And it seems, at present, that there are enough top grade specimens offered at auction and over bourse tables to keep these prices more or less unchanged. Gem MS-65+ pieces, as mentioned, are quite few and far between now--and, when offered, usually even bring prices well in excess of what dealers or collectors will pay for the MS-65 example. There are fewer collectors, however, who are attempting to put together sets of Bust dimes (particularly of the large size issues) because of such "stoppers" as 1809, 1811/09, 1822, 1824/2, 1828 large date, 1830/29 in addition to a few other "sleepers." If anything, the future for Bust dimes should be even brighter than for the half dimes and should there be another substantial upward trend in the type coin market, these coins could be among the major winners.

Bust quarters were minted in two sizes as were the dimes: the large size from 1815 through 1828 and the reduced size from 1831 through 1838. Again, it is the earlier large size which gives type collectors, as well as date collectors (and dealers as well), the most problems. Truly MS-65 choice specimens and, of course, MS-65+ gems are considerably more scarce than either the half dimes or dimes. Assembling a date set of the large size issue in choice/gem condition would be a monumental task; the reduced size issue consisting only of nine coins (as listed in the Redbook) would be somewhat easier. Bid-ask levels for the two types are currently registered in the respective ranges of \$3000 - \$3350 and \$1700 - \$1875--and have been in these areas for quite a while now. The fact is, however, that when an outstanding specimen appears for sale at a convention the price tag is invariably well ahead of these bid-ask levels--and auction realized prices for truly choice pieces are often quite impressive. Unfortunately, dealers as well as auction houses tend to somewhat overgrade Bust quarters and a large percentage of those described as choice or gem actually fall somewhat short of these grades. Attempts to buy either type on the teletype circuits meet with startlingly little success. Were potential buyers to raise bid levels noticeably, the chances of receiving properly graded coins would still remain quite slim. However, increased bid levels would almost certainly result in a large number of MS-60 or MS-60+ coins being shipped to the buyers in the hopes that they would "stick." Today's buyers for the most part, however, are now a bit too sophisticated not to see the difference in quality and the end result would probably be just a lot of coins being returned to the senders and very few actual transactions. In a major type coin price upswing, both sizes of Bust quarters would most likely be right up there with the top gainers.

Now we come to the "problem" of Bust half dollars. This is one of the most generally overgraded coins in all of numismatics. Coin catalogs quite often feature extensive runs of dates--sometimes complete from 1807 through 1839--with many of the hundreds of varieties included. Frequently, in addition, a large number of these pieces are graded "choice" and "gem." But, unfortunately, due to a number of factors, most of them fall a bit short of these grades when closely examined. In no other early U.S. series are there as many AU, "slider" and MS-60 specimens extant. The true scarcity of choice MS-65 and gem MS-65+ specimens is quite obscured by the easy availability of the numerous lesser quality, but still attractive and usually overgraded Bust halves that are on the market. The current bid of \$625 for a strictly MS-65 piece has been in effect for several months now--but still very few properly graded pieces have changed hands. It is, surprising, also, to find how many dealers (not to mention collectors) do not actually know the difference between MS-60, MS-60+ and truly choice MS-65 Bust halves. However, when two or three knowledgeable specialists are battling over even a common date in truly choice or gem condition at auction, the price can easily reach the \$800 - \$1000 range. This gives an indication of the true scarcity of outstanding Bust halves. Chances are that in the next type coin price advance the bid for Bust halves will move forward a bit--but, as mentioned, the easy availability of pieces which "just miss" may well keep bid levels from rising substantially--due to the fact that knowledgeable buyers simply do not want to bother with returning the many overgraded coins sent to them; most would probably rather wait to buy over bourse tables or at auction.

There are two types of Bust dollars: The "small eagle" reverse of 1795-98 and the "large eagle" reverse of 1798-1803. Choice and gem specimens of either rate as major numismatic rarities. Even the most optimistic graders seldom offer these coins in the ultimate grades and many of even the advanced type collections lack truly choice specimens. Current respective bid levels of \$17,000 and \$11,500 very rarely receive a teletype answer--and even more rarely result in a properly graded MS-65 or better specimen changing hands. Coins in this category speak for themselves individually and bourse table price tags have been noted as high as "double bid"; no "ask" prices can realistically be listed in the CDN. Substantial advances in bid levels would almost certainly produce no results--and it is quite possible that a future general advance in the type market would not see much of a move in these bid levels. Even the occasional "choice" piece listed in a major auction turns out to be MS-60+ at best. Since ultimate grade Bust dollars are so few and far between, even some of the more conservative graders tend to be overly optimistic when a "nice" specimen comes along. Most dealers are well aware that coins in this category are priced on their individual merit and that higher bid levels would only mean higher price tags--rather than the desired transactions.

This Week's Market

Rare and expensive U.S. gold coins are seldom traded across the teletype circuits--however, this does not deter the U.S. gold specialists from bidding for these rarities. For example, one dealer is currently offering \$28,000 for a gem Pan-Pacific commemorative set in an original frame. For the same item in the original box \$26,700 is offered. A choice Pan-Pacific \$50 Round will bring at least \$13,100, while the Octagonal is bid at \$11,200. In an effort to reassemble the original sets, another dealer will pay \$1800 for an original copper frame and \$450 for the box!

The same gold specialist mentioned above is also bidding for territorial \$50 slugs and 1907 High Relief twenties. The bids are as follows:

1851 and 1852--\$50 slugs; No Dates--\$1600; VG Full Dates--\$2350; Fine--\$2875; Very Fine--\$3500; XF--\$4350; XF/AU--\$5000 +; 1907 High Relief--\$20; AU--\$2200; BU--\$3400; Gem BU--\$3800.

U.S. GOLD (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$140.80 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES:

\$10.00 per column inch, four consecutive ads (no changes) - 10% discount.

Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster. MS-65 coins are choice fully struck specimens without detracting marks—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MORGAN DOLLARS STILL TOP BUYING LISTS All Mercury Dimes Continue To Enjoy Strong Demand; Rolls Advance

The Market in Depth

ALLEN HARRIMAN

Silver dollar buyers are dominating the teletype circuits. A quick glance at page six will reveal that last week's numerous advances have been topped by an even greater number of gains during this past trading week!

First, in the area of circulated dollars (page five), gains are liberally scattered across the charts--particularly for the Morgans. Interest in these circ coins centers mainly around those years for which a coin from "any mint" will fill the order. Heading this category are specimens dated 1893 and 1895 (all of which have registered gains this week). One coin from each of these years, obviously, is needed by those collectors who are assembling "year sets" rather than complete sets of Morgans--and those investors who have considered this fact are putting away nice defect-free pieces in quantity. Other years which are benefiting from this demand are 1892, 1894 and 1901-04. The 1921-Peace dollar, in addition, is a coin which appears to have a number of followers.

In the BU roll area there are also several years for which "any mint" rolls are in demand--pretty much for the reasons outlined above. Current bidders are especially interested in 1887-P, 1888-P or O, 1889-P, 1890-P, 1896-P, 1897-P, 1898-P or O, 1899-O, 1900-P or O, 1901-O, 1902-P, 1903-P (rather expensive when compared to the others--but still the lowest priced 1903 issue) and 1904-O. Again, for BU "year sets" these are needed dates. They are not all of equal scarcity, of course, and dealers and investors have their particular "favorites" among these rolls as evidenced by the gains which occur from week to week.

And certainly not being left out of the current bidding are the scarce and rare date singles. The really tough dates are very, very seldom located in strictly full MS-65 condition even though higher bid levels are often accompanied by requests for "quotes--if bids aren't sufficient"! Additionally, there are potential buyers for "MS-65+ gems" who are willing to pay "well over ask" for the "right specimen". For example, one dealer is now offering \$115 for an 1891-O and another is willing to pay \$650 for an 1896-O--as long as the coins meet the very exacting requirements for the "gem" category! It should be noted that a few of the S-mint "Redfield" issues have also recorded small advances this week--these are mainly the result of one or two dealers' requests for "one to ten" strictly graded pieces. As readers know, these S-mints are around in quantity.

FLASH! The latest word on the "newly discovered" 1977/6 Lincoln cent is that they are not products of the U.S. mint. It seems that the several specimens found in Florida are not identical to each other and that both the mint and major coin publications are, at this point, in agreement that the coins are counterfeit. It should be added, however, that one or two dealers still feel that there is a possibility that there still may be some genuine mint products among the pieces known. So, at the time of this writing, confusion still reigns supreme--as to the source and possibility of a true 1977/6 overdate cent.

This Week's Market

CENTS: Last week's advances for early "coppers" has been followed by additional gains this week--and virtually no properly graded and defect-free pieces have been located in spite of escalating bid levels. As has been mentioned previously, a

very large percentage of the extant early half-cents and large cents have "problems" of one sort or another--and today's collector/investor usually wants those few well-centered pieces with even wear on smooth planchets without edge dents or nicks (all of which constitutes a tough order).

NICKELS: Mild bidder interest is noted for the scarce matte proof Buffalo nickels (1913-1916). The 1913 "type one", of course, is a one-year-of-type proof with an original mintage of only 1,520; in 1916 only 600 proofs were issued--making these two dates even more sought after than the still scarce 1913 (2), 1914 and 1915 issues. (By the way, a few 1917 matte proofs are known; the latest sale of an authentic piece was recorded at \$3400.) The Jefferson series is quiet--with small gains noted for the 42-S and 44-S rolls and minor losses for 51-P and 55-P.

DIMES: This area of the market is still dominated by the Mercury dime series--advances for rolls are numerous and some quite substantial (see pages two and three) and several teletype dealers are anxiously trying to locate all of the pre-1934 singles (in the ultimate MS-65/better "full bands" condition, naturally). In the Roosevelt series, the 1955-P roll is rather "hot"--with dealers now offering to pay \$30; small gains are also recorded by the 53-S and 55-D rolls.

QUARTERS: The rare low grade 1796 quarter has registered further gains this week--with no specimens listed for sale on any of the various teletype circuits. (This coin is more often seen in grades from XF thru "slider" condition than in the more affordable lower grades.) A few more gains have been recorded by the Washington rolls--45-D, 46-P, 47-D and 54-S.

HALVES: One major dealer will now take "up to twenty bags" of BU Franklins at a higher \$40 per roll--and other potential buyers will pay slightly more for "original solid-date bags". The earlier dates are steady at current levels with light to moderate trading noted. The 1934, 1935 and 1937 P-mint Walking Liberty rolls have edged a bit higher--these are seldom available (especially 1934). Several dealers are also interested in most of the 1941-47 rolls--but they are reluctant to disturb the present bid-ask structure.

DOLLARS: This is currently the most active area of the market--see "The Market in Depth" column.

PROOF SETS and MINT SETS: There are now several dealers who want to buy proof sets in the 1954-64 group--with a few others interested in the 1965-67 "special mint sets" and the 1968-74-S mint issues. Buyers want from five to ten of each date to as many as three hundred of the lower priced issues--but, thus far, price advances are minimal. The 1977-S set, by the way, is now bid at only the original issue price of \$9--with sellers at \$9.50.

COMMEMORATIVES: Bargain-hunting now seems to be the rule in this area. Those dealers who need specific issues will pay present prices for properly graded coins--while below-market bidders run lengthy buying lists in the hopes of picking up a few bargains. (This tactic, however, usually results only in overgraded or problem coins being shipped.)

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$144.60 per ounce.

THE COIN DEALER NEWSLETTER

represents the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer to dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES:

\$10.00 per column inch, four consecutive ads (no changes) - 10% discount.

Advertising space is limited, ads will be placed in first possible edition.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

20-S VG; 17-P, 27-S, 28-S, (2) 29-D, (2) 29-S, 33-S F; 33-S, 38-P VF+;
35-D, 39-D XF, 26 pcs-\$75.00 (please add extra postage on this lot!);
Lot W.L. 50c, (2) 27-S, (2) 28-S, 29-D, 33-S full F; (2) 28-S, (2) 29-S,
(2) 33-S, 36-S full VF, 13 pcs-\$50.00; 1929-D orig tone, uncleaned BU-
\$210; 29-S fully lustrous AU (sharp strike, full features, bid is \$50)-
\$43.50, ch AU/"slider" BU (looks UNC)-\$60; 1937-P ch orig uncleaned
AU+-\$12; 1938-D VG-\$16, VF/XF choice uncleaned piece-\$32 Pair
1943-P ch MS-65+, 2 pcs-\$26; 1948-D full strike MS-65-\$7.50; Lot
10 pcs 1948-D all orig MS-65-\$67.50; Lot 1949-S, 51-S, 52-S, all orig
MS-65, 3 pcs-\$57; Lot orig BU Franklins, (2) 50-P, (2) 51-P, 52-PD,
(3) 53-D, (2) 54-P, 11 pcs-\$60; Lot strictly MS-65 Franklins, 50-D,
54-D, 57-D, 59-D, 60-D, 5 pcs-\$18; 1950-D gem orig light tone semi-
PL full strike - incredible coin!-\$25; Lot 1955 AU "sliders", 3 pcs-
\$14; Pair rarely seen lightly circ proof halves, 1959 and 1968-S-\$4.
DOLLARS: Early Dollars: 1799 VG-\$220; 1801 ch orig VF+ (no
defects, sharp strike never cleaned; most would grade higher)-\$520;
1860-O VF-\$80; 1872 VF-\$79, VF+-\$89; **MORGAN DOLLARS:**
1878-CC G-\$6.75, VG-\$8, F-\$8.50; Lot 78-CC & 92-CC VG/F; 94-O
full VF, 3 pcs-\$30; 1879-CC VF-\$35; 1882-CC full mirror surface
PL, MS-65/better-\$45; 1886-S orig light tone AU-\$26; 1889-CC F/VF-
\$110; 89-S strictly AU-\$22; 1890-S fully lustrous BU (slightest fric)-
\$11.50; 1891-S ch MS-65 full strike-\$39.50; 1894-O VF/XF (PL)-
\$12; 1894-S strictly AU (PL surfaces, full feathers)-\$115; 1896-S VF+
\$12; 1897-S brill full strike "super slider" BU-\$16, MS-65 (very close
to gem - only a couple of minor marks; orig uncleaned)-\$45; 1900-S
ch lustrous AU-\$20; ch AU (PL surfaces, barest fric)-\$29, strictly
MS-60 (I've seen worse called MS-65, bid is \$85) sell at -\$72; 1901-S
strictly AU/UNC (light scr obv, otherwise would be MS-60)-\$30;
1902-S totally defect-free G (scarcel)-\$14; 1921-S fully orig BU (better
than avg strike - MS-60/65)-\$17; **PEACE DOLLARS:** 1921-a rare full
strike AU (couple very light scuffs obv - otherwise worth \$75 or more)-
\$42; 1922-D MS-60/65 better than usual strike-\$16.

BU ROLL MARKET GATHERS STEAM

Type Coins in all Grades Register Impressive Gains

The Market in Depth

ALLEN HARRIMAN

Last week's forward movement in the BU roll market has now been followed by a considerably more extensive rash of plus signs this week. Possibly prompted by one major bidder's obvious enthusiasm (coupled with higher buying prices), several dealers on the various teletype circuits are in the market for choice rolls in all series from the newly awakened Lincoln cents thru the long active Morgans. True to form, many sellers have suddenly disappeared from the tapes---at least, sellers of the particular dates which are topping current "want lists". This phenomenon has long been a standard one---as soon as an area of the market experiences increased demand, many dealers decide to wait and see just how far bid levels will advance. This is especially true when dealers have choice material; they also often try to move the somewhat inferior portion of their stock during the initial stages of such an advance. This may well account for one bidder's teletype comment that the market is "very thin" and that most of the material being offered for sale is "shabby".

Readers will also note that both circulated and uncirculated type coins have registered another very impressive round of gains. Again, one major buyer (not the one mentioned above) is in the forefront of this market---with several others running less extensive buying lists. Needless to say, only strictly graded coins are wanted at these higher bid levels. Pieces which exhibit improper cleaning, nicks or scratches, weak strikes or "in-between" grades will not be accepted. This segment of the market is considerably more "thin" than the BU roll area---and, in spite of escalating bid levels, actual transactions are quite limited. It must be added that there are some dealers who feel that current bids in this area are already "too high"---but, in general, any dealer who has properly graded and defect-free material usually wants "ask" or more. It should also be stressed that "super sliders" (pieces with rubbing or "cabinet friction") are not MS-60 coins and will not be accepted as such by knowledgeable bidders. Nor are nice VF/XF coins going to be accepted at the XF bid price---even if it is a very scarce or rare type! The trend is undeniably toward conservative grading---at least by a majority of buyers---and all indications point toward an acceptance of these more tightened grading standards.

Interest in choice MS-65 and gem MS-65+ dollars---especially Morgans---continues unabated. This is not only quite evident on the teletype circuits but also to a great extent at coin conventions and at those auctions which include outstanding specimens. In addition, numerous dealers are still actively pursuing choice and gem "deep mirror" prooflike specimens. No actual "bid-ask" prices levels have been pinpointed in this area due to the fact that in this ultimate category each individual coin usually "speaks for itself"---particularly when the date is out of the "common date" class. The following are examples of recently monitored teletype bids for "blazing gem full prooflikes": 1879-CC \$1400 ("or quote"), 1891-O \$600 and 1896-O \$1250! These will give an idea of just how much dealers will pay for the right coin!

This Week's Market

CENTS: Even the Lincolns are not being left out of the sudden mid-summer BU roll advance! Numerous issues are suddenly appearing on buying lists---with several substantial price advances recorded. Among the gainers are 1935-S (bid

now \$155---with one or two attempts to buy choice rolls noted as high as \$165), 36-S, 1940-PDS, 1941-P and 1942-P & D. One major bidder, by the way, will pay even higher than this week's bid levels for a couple of dates---offering as much as \$16 for the 41-P and up to \$9.25 for the 45-D in top condition. The next couple of weeks may prove very interesting for the Lincolns!

NICKELS: The Jeffersons, thus far, are participating only to a minor degree in the current surge of BU roll buying. Small gains are noted for the 42-S, 45-D & S, 48-S and 55-P rolls; minor losses have been registered by 49-S, 50-D, 51-P and a few late dates. Bidders are also interested in most of the 1938-42 pre-war time rolls in truly choice "full steps" condition---but, at this point, they are content to stick with current bid levels. The Buffalo series, by the way, is remarkably quiet in view of general roll activity.

DIMES: In addition to another very extensive run of plus signs for the Mercuries (see pages two and three), several Roosevelt issues have been added to current buying lists---a number of them at higher prices: 47-D up to \$58.50, 52-S bid now at \$67, 53-S wanted in ten to twenty roll quantities at a higher \$21.50 and 55-P & D bid strongly at \$33 and \$23 respectively. Bids in the \$57 area now seldom produce sales of choice 1946-64 single sets---and even the 1965 to date sets are appearing now and then on "want lists" at \$10.50 or so.

QUARTERS: Interest in the earlier "short set" dates has moved a number of issues higher this week---with several potential buyers getting into the act. All of the 1943-48 P-mints are on the plus side---and they have been joined by the 45-D, 46-D & S, 47-D & S and 48-D rolls (check page three for the advanced bid levels). The current bid of \$6900 for choice 1941-64 roll sets is obviously inadequate---not a single one has been offered for sale. Mild interest in 1965 to date single sets is also evident---bids in the \$12.50 area seldom receive an answer.

HALVES: Gains cover virtually every Franklin issue in the 1953-63 group---with most of the earlier dates also wanted (but mostly at present bid levels). The only loss noted was for the usually popular 55-P---with sales in the \$110-\$116.50 range during the week. The 1934-47 Walking Liberty rolls are not being ignored---but again, in this area, bidders are staying with current levels for the moment. Bids of \$400 fail to produce choice MS-65 single "short sets" (1941-47)---and requests for even a few single strictly choice earlier P-mints (1934-40) are usually ignored. The 1934-P, in particular, seems to elude nearly all bidders.

DOLLARS: The advances of the past couple of weeks have been followed by even further gains during the past few days---especially for such "not so common" lower priced rolls as 78-S, 79-S, 82-O & S, 88-P & O, 89-P, 99-O and 1900-P & O. In addition, of course, the really tough singles have again enjoyed a substantial share of teletype bid bidding time---with numerous higher prices resulting. Prooflike dollars are still in demand---see "The Market in Depth".

PROOF SETS and MINT SETS: Quite a number of dealers are still attempting to locate small and large quantities of all of the 1953-64 silver issues---again with a smaller percentage of bidders interested in the 1965-67 and 1968-76 sets. Gains, however, has been quite limited thus far---with only the 1953, 1958, 1975-S, 1976-S (3 pc) and 1976-S sets registering small price hikes. The 1977-S set has changed hands in small groups this week in the \$9-\$9.25 range. The 1973 mint set is also up slightly---with several dealers in need of up to fifty sets at \$13.75 or so.

COMMEMORATIVES: Prices are lightly mixed across both the silver and gold series. Serious buyers offer "bid" or a bit more when specific issues are needed. On the other hand, recent bargain-hunting continues courtesy of a few other potential buyers---although very few properly graded specimens are shipped to below-market bidders. ((Dealers often send specimens which "just miss" to those who offer to pay five or ten percent under bid in hopes that these less desirable pieces will "stick".)

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$144.30 per ounce.

FOREIGN GOLD (Usually traded in quantity in AU BU condition.)

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES:

\$10.00 per column inch; four consecutive ads
(no changes) - 10% discount.

Advertising space is limited; ads will be placed in
first possible edition.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices

EISENHOWER DOLLARS BEGIN TO APPEAR ON "WANT LISTS" Mercuries & Washingtons Continue Advance; Numerous Commems Slip Lower

The Market in Depth

ALLEN HARRIMAN

Numerous plus signs are scattered across the Eisenhower dollar chart. This is a welcome change from the lackluster trading recorded during the past several months as prices drifted lower and sellers outnumbered buyers by a substantial margin. Not all sellers have disappeared from the teletype circuits—but the "bargain lots" so frequently offered earlier in the year are now nowhere to be seen. Current sellers usually have fewer pieces for sale and, this week, most prices have moved ahead along with the higher bids.

Readers will recall that the Eisenhower dollar series "peaked" about mid-November of 1976. At that time bid for the complete BU roll set reached \$2500 (there were then twenty-six issues involved since the '77 rolls were not yet included)—today bid is firm at \$2000 for all twenty-nine rolls. The "key" 1973-S 40% silver proof reached a very strong \$40 bid in November; this week's higher bid of \$24 is producing few results. Rumors continue to circulate that the three 1977 issues will be the last Eisenhower dollars and it is certain that many astute investors have taken advantage of low prices during the past several months to put away roll sets or quantities of their favorite issues. The next several weeks could be very interesting ones for the Eisenhower series!

Scattered gains have followed last week's major advance for MS-60 and the higher grade circulated type coins. Lengthy buying lists continue to appear on a daily basis and sales of properly graded coins continue to be quite limited. There is a point, of course, at which serious bidders who want quantities decide not to raise bid levels for a while. This tactic can often result in more transactions than higher bids week after week may produce. It seems almost a "rule of thumb" that a large percentage of potential sellers will postpone selling while prices advance—hoping to pick the top and sell just before a buying flurry settles down!

Everyone is fully aware of the importance of the "full bands" distinction for Mercury dimes and the "full head" qualification for Standing Liberty quarters—as well as the importance of "full strikes" in general. Along these lines, at least one or two teletype dealers are now in the market for "gem, full steps" Jefferson nickels! And they are not only interested in the "key" dates—but also in "any date" that meets this requirement. As a matter of fact, most of the early "keys" are far easier to locate in fully struck condition than are some of the dates which currently sell for only two or three times face value! One of the most "known" examples of a typical poor strike is the 1954-S—but, as the search widens, it is going to become apparent that there are many dates which are almost impossible to locate in this ultimate condition. The day when a separate price structure for "gem, full steps" Jeffersons seems inevitable!

course, continue to elude a number of potential buyers—even though some bidders are willing to "throw the Redbook away" when it comes to the prices they will pay for true gems!

NICKELS: The small amount of activity being registered by the Jeffersons is virtually all taking place within current "bid-ask" ranges; the 50-D and a few later rolls are listed at slightly lower prices this week. Dealers remain quite interested in the 1937-D "3-legged" Buffalo—with very few actual transactions noted.

DIMES: This week's further rash of plus signs cover virtually every issue in the 1934-45 Mercury "short set"! The BU roll set bids are up substantially (see page five)—but, needless to say, none have been listed for sale for a long while now. Even the single 1941-45 set seldom appears on the teletype circuits—and the appearance of a truly choice 1934-45 set is a rare occasion. In addition to the "key" 34-D, 35-D and 36-D issues, the 37-D and 39-S specimens are giving a number of hopeful bidders quite a tough time! It should be added, of course, that most buyers want "full steps" gems—and that they are usually willing to pay a premium for top quality. A few more gains, by the way, are scattered across the firm Roosevelt series.

QUARTERS: Advances continue for a number of the 1943-53 Washington rolls—with the rather elusive and nominally priced 52-S leading the pack with a \$10 jump! Again, no BU roll sets (1941-64) have been included on selling lists recently and investors are obviously assembling their own roll by roll. It should be mentioned that one teletype dealer is now offering to pay \$75 per for "gem MS-70" 1935-S's (which is \$10 over the bid for MS-65 pieces).

HALVES: Even though considerable interest is evident for the 1941-47 Walking Liberties, dealers seem content with current bid levels—at least, for the time being. Sales of these "short set" rolls have been very limited during the past several months. Gains have been noted for the following Franklins: 51-P bid \$120 (up \$5), 52-P bid \$90 (up \$7), 52-D bid \$80 (up \$6), 52-S bid \$240 (up \$5)—with both the 57-P and 58-P rolls up slightly. Bag quantities of "any date" are still strongly bid at \$40 per roll. The very scarce circ 1891 half, by the way, is regularly receiving bids of \$15 for Good, \$18 for VG and \$25 for Fine specimens (these prices are well over Redbook listings).

DOLLARS: Numerous gains are scattered across both dollar charts—coupled with scattered minus signs for some of the S-mint "Redfield" dates. Actually, it is quite difficult to pinpoint exact prices for most of the 1886-1900 San Francisco coins. There are sellers of "choice MS-65" specimens at slightly below bid—while, at the same time, another dealer will be offering to pay higher than current bid levels for coins of the same quality! The Eisenhower dollars may be on the move!—see "The Market in Depth".

PROOF SETS and MINT SETS: Prices are lightly mixed; a moderate number of sales have been recorded during the week. Interest still centers mostly around the '56-'64 issues at current prices—with small advances registered by the 68-S, 69-S, 72-S and 75-S sets. The 1977-S set is now bid at only \$8.50 (which is below issue price). The 1959 mint set is eluding buyers—who have now moved the bid to \$7.

COMMEMORATIVES: Something of a "sellathon" seems to have developed this week. Two major commem dealers (joined in part by several others) have listed most issues for sale in "MS-65" condition—many at lower prices. Requests for "truly choice specimens with no defects" are still occasionally monitored for individual issues—with these very quality-conscious bidders willing to pay "ask or so" for the right coins.

This Week's Market

CENTS: Last week's advances in the Lincoln roll area have been followed by several more smaller gains—mostly still the result of one prominent dealer's buying requests. Another major bidder is in the market for bag quantities of all of the 1965-72 P-mint issues; his frequent offers to pay "bid plus postage" are meeting with only limited success. Early Lincoln singles in gem condition, of

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$144.90 per ounce.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

SILVER DOLLARS REGISTER FURTHER IMPRESSIVE GAINS BU Rolls Still Strong; Commems Continue To Edge Lower

The Market in Depth

ALLEN HARRIMAN

The BU roll market continues to present a rather healthy mid-summer picture. Still led by the Mercuries and Washingtons, bidding continues to include a few of the Roosevelt issues and scattered dates in both the Jefferson and Lincoln series. Half dollar rolls, too, are on the minds of numerous teletype bidders--with a substantial number of advances noted this week for the Walking Liberties as well as the popular Franklins.

All potential buyers, of course, want choice MS-65 rolls--not rolls which are "bargain priced" but somewhat inferior. Readers should note the explanation regarding prices which appears at the beginning of the page two BU roll chart. Bid-ask prices are for MS-65 rolls--and lesser quality material brings lower prices according to quality. It is hardly practical to list actual bid-ask prices for "problem" rolls which fall into the MS-60 or MS-60+ categories simply because there are twenty, forty or fifty coins involved--instead of one. A price level can be established for a single MS-60 coin, but determining a price for a roll of less than MS-65 quality depends upon how many coins in roll have problems--whether it is a "put together" roll--and/or a number of other factors. Most dealers who have somewhat inferior rolls to sell explain the defects when they list the "bargain" selling price. There are, unfortunately, others who tend to ship problem rolls to bidders in the hope that they will not be returned.

The silver commem market is currently a rather confusing one. As was mentioned last week, something of a "sellathon" has developed between two major commem dealers--and this week's substantial number of losses can again be attributed to the same sources. On the other hand, there are several buyers of specific issues who are offering to pay more than the listed teletype selling prices for the same coins! Many times these buying and selling lists follow within minutes of each other on the circuits--often without a transaction taking place.

It is obvious that there are currently two distinct schools of thought about commems--those who feel that prices are presently quite reasonable and those who can visualize still lower prices. Much of today's confusion in this area simply rests with the differences of opinion as to what is and what is not an MS-65 coin.

By the way, the following are a few prices realized for truly choice commems in two recent major auctions. In the Steve Ivy "Stanford Sale" (July 22-23) some of the impressive prices included \$385 for an Isabella quarter in choice MS-65 condition, \$302 for a "gem" Alabama, \$83 for a choice MS-65 toned 1934 Boone, \$138 for a "gem" California, \$100 for a "gem" Grant, \$620 for a toned MS-65+ Hudson, \$110 for a "gem" 1926-S Oregon and \$99 for a 1936-D San Diego described as choice MS-65! In the July 29-30 New England Rare Coin Auctions "Commonwealth Sale" a "gem" Hawaiian brought \$1831 (!), an MS-65 Missouri 2 x 4 sold for \$680 and a 1935-S "gem" San Diego realized \$70. These prices aptly illustrate how much auction bidders are willing to pay for not only "gem MS-65+" coins but also strictly MS-65 pieces!

This Week's Market

CENTS: Changes for the BU rolls are minimal this week--even though the one recent major bidder is still in the market for several dates in choice condition. (See "The Market in Depth" column for some comments on the grading of BU rolls.) The 1972/72 double die Lincoln is now appearing on buying lists in the \$105-\$110 range--again, of course, for choice original specimens.

NICKELS: Price movements have also been kept to a minimum in both the Buffalo and Jefferson series. A small hoard of 1938-D Buffalo rolls reached the market--with a resulting slightly lower \$250-\$270 bid-ask range. There are a number of Jefferson rolls which are obviously of interest to a few far-sighted dealers and investors--among them are 42-D, 46-S, 48-D & S, 49-D & S, 50-P, 51-D, 52-D and 55-P. At this point, however buyers are quite content to leave the current price structure intact.

DIMES: Don't let the lack of plus signs for the Mercuries fool you! The bidding goes on and very few transactions are being registered. Demand still encompasses all dates from 1934 thru 1945--in addition, of course, to the frequent and extensive "want lists" asking for any or all of the 1916-31 singles in choice "full bands" condition. One or two dealers have again edged bids a bit higher for a few of the Roosevelts--with the "hot" 55-P roll recording sales at a higher \$35. The scarce 1942/41-Denver dime, by the way, is regularly receiving the following mostly unsuccessful bids: Good \$125, VG \$135, Fine \$145, VF \$165, XF \$225, strictly AU \$385, full MS-60 \$825 and "gem MS-65 full bands" \$3000 "or quote"!

QUARTERS: The 1941-64 BU roll set of Washingtons is now bid at an even \$7000--with choice single sets now pegged in the \$180-\$195 range. Numerous individual rolls in the '41-'52 group are being actively sought after--and, as usual, when strong bidding starts the available supply of rolls dwindles noticeably. One dealer is in the market for rolls of the 40% silver Bicentennial quarters--offering to pay \$36 for the BU version and \$56 for the proofs.

HALVES: Bid for "common date" BU Walking Liberty rolls has advanced to \$260--with virtually still none of the 1941-47 dates appearing on teletype selling lists. Several dealers are now asking for "a few choice singles" rather than waiting to locate full rolls of many of the "short set" mintmarked issues (as well as 47-P). Advances have been registered by practically every Franklin issue in the 1953-62 group--and sellers usually manage to keep their ask levels just ahead of the bidders. Common date Franklin rolls remain strongly bid at \$40--with one major buyer now willing to pay \$1400 for "solid date bags" delivered!

DOLLARS: Gains quite thoroughly pepper the Morgan chart again this week. Bidders want singles, rolls and bags--and they aren't hesitant to raise bid levels in order to corner the material they need. With the exception of 83-O, 84-O and 85-O, the minimum bid for any pre-1921 roll has now reached \$134.50; the scarce well-struck New Orleans coins (80-O, 87-O, and 89-O thru 97-O) are still eluding nearly all potential buyers--and the remainder of the keys, of course, are seldom seen except at major auctions. The Eisenhower dollars have also recorded several more gains--coupled with a few small losses.

PROOF SETS and MINT SETS: Minor advances have been noted for several of the 1956-72 sets this week--with two or three dealers in the market for relatively large quantities of all the dates in this group. The 76-S 3-pc. proof set has recorded sales at a slightly \$13 or so; the regular 76-S and 77-S sets are rather quiet within recently established price ranges.

COMMEMORATIVES: This are of the market currently presents a rather confusing picture--see "The Market in Depth"

U.S. GOLD. (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$146.20 per ounce.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

KENNEDY & EISENHOWER ROLL SETS STILL ELUSIVE Commems Halt Recent Downward Trend; BU Roll Market Firm

The Market in Depth

ALLEN HARRIMAN

In spite of this week's lack of changes, the Eisenhower dollar is beginning to appear on more and more dealers' teletype "want lists"--with the single complete BU and Proof sets pegged this week in the \$110-\$117.50 range (one or two buyers were noted as high as \$115). Bid for the entire roll set is now pinpointed at \$2100--again with at least one bidder willing to take one at \$2150. It should be mentioned that the current bid level for the complete roll set presents a rather unusual picture in that it is slightly higher than the total of the bids for the individual rolls. (As readers know, offering prices for complete roll sets usually fall somewhat short of this total.) Also enjoying more noticeable interest is the complete BU and Proof roll set of Kennedy halves--at a slightly higher \$1265 bid. A few single sets have changed hands within the present \$66-\$70 bid-ask range--but no roll sets have been located. It is still widely surmised that 1977 could well be the last year for both the Kennedy half and the Eisenhower dollar. And it is apparent that at least a few investors want to buy now--to be in "on the ground floor" before any possible major upswing in price levels.

"Good and better" circulated sets are also experiencing a moderate amount of demand--with very few being located. Topping buying lists in this area of the three Barber denominations--followed by interest in Buffalo nickel, Mercury dime, Standing Liberty quarter and Walking Liberty half dollar sets. Complete sets in all these series are occasionally listed for sale--but generally they are "average circ" sets containing a liberal sprinkling of AG coins. (And unfortunately, it is more often than not the "key" dates which are of the lowest grade--or which have problems of one sort or another.) Current mostly unsuccessful bids for the much more sought after "strictly Good/better" sets are: Barber dimes \$300, Barber quarters \$700 and Barber halves \$450--with the Buffalos wanted at \$180, the Mercuries at \$200, the S.L. quarters at \$425 and the Walking Liberties at \$235. (Overdates are not included in these prices.) It should be remembered that a couple of "key" dates in only AG condition substantially reduces the value of the set in question.

Gem "type" gold is, as usual, eluding virtually all bidders--in spite of some very impressive bid levels and frequent requests for "quotes". One potential buyer, for instance, regularly offers to pay \$450 for a "common date \$10 Liberty in superb MS-60 condition". Even though the MS-65 bid is only \$295, this offering price has yet to result in the desired transactions. It is obvious that numerous collector/investor are assembling the abbreviated twelve-piece gold type sets--and that a number of them want to put together "gem" sets. However, finding most of the issues in even MS-65+ condition is proving to be quite difficult. This, of course, accounts for the often very substantial prices realized by the few truly superb gold coins which appear at auction from time to time. By the way, to compliment next week's August issue of the CDN "MONTHLY SUMMARY", we will list the prices brought by the extensive run of dates in the \$10 Indian series which appeared in the recent "Commonwealth Sale" conducted by New England Rare Coin Auctions.

This Week's Market

CENTS: One major bidder is still continuing attempts to locate several bags each of the 1965-71 P-mint Lincolns--actual transactions remain quite limited in spite of frequent teletype requests for these "common dates"! It also appears that both the 1934-58 and 1941-58 BU roll sets are rather elusive at current respective bids of \$1500 and \$600; potential buyers, of course, want only choice MS-65 coins--not spotted, finger-printed or otherwise inferior rolls. Virtually all individual issues are unchanged and firm at present levels.

NICKELS: As was mentioned a couple of weeks ago, "gem, full steps" Jeffersons are on the minds of at least one or two teletype dealers--and it seems that there are very few sellers (even though bidders usually ask for "quotes" rather than offering specific prices.) As the serious collector knows, there are many common date Jeffersons which are extremely difficult to locate in this ultimate condition! The 1966-P issue is also currently wanted in bag quantities--and offers to pay "bid plus postage" have, thus far, been ineffective.

DIMES: Gains this week for the Mercuries include 1934-P (bid now at \$875), 1935-P (bid now at \$360) and 1937-D (bid reaches the \$1500 level!). Actually, several serious buyers are still strongly in the market for all of the 1934-45 Mercuries in strictly choice MS-65 condition--and, more often than not, they want "full bands" specimens. Several bidders simply list their needs and state that they are "willing to listen to reasonable quotes". It should be noted, by the way, that the 1944-P is turning out to be quite elusive in "full bands" condition--with some dealers already offering to pay \$4-\$5 for the right pieces (and one seller noted at \$15!). Changes for the Roosevelts are minimal this week--see page three.

QUARTERS: Bidders have been content with recent higher levels for the Washington rolls; this week's bids are virtually unchanged--and a few more rolls have appeared on selling lists. The \$7000 bid for the 1941-64 BU roll set, however, is still proving totally unsuccessful. Both the 1927-D and 1927-S quarters are being actively sought after by one frequent bidder; all grades are wanted--and only a relatively small quantity of these two low mintage coins have been located. (These two dates are particularly elusive in the VF/AU grades.)

HALVES: Last week's numerous advances for both the Walking Liberties and the Franklins seem to have sufficed for the moment. Still, very few W.L. rolls are being listed for sale--and most of the Franklin rolls offered are dated 1954 or later. These are several buyers of "gem" singles in both series--and they are often willing to pay prices somewhat in excess of bid-ask levels for top quality coins. (This is especially true for the S-mints in both groups.) Bidders are finding, by the way, that both the Barbers and early Walking Liberties are very few and far between in strictly VF or XF condition--the higher priced AU's and "sliders" seem more plentiful than the much more affordable VF/XF's!

DOLLARS: Advances continue to pepper both the BU roll and MS-65 columns--with the tough singles taking the lead this week. Higher bids have been registered for several of the "Redfield" S-mints, many of the very scarce well-struck O-mints (1886-97), and, naturally, such "keys" as 1884-S, 1889-CC and 1901-P. Sales in all areas have remained quite limited--as most sellers keep their price tags well ahead of bid levels. (In the case of the more elusive dates, of course, there simply aren't any sellers of truly MS-65 specimens.)

PROOF SETS and MINT SETS: A few minor changes--in both directions--have been recorded during another week of light to moderate trading. Bargain-hunters are quite active--but they aren't locating many trouble-free sets!

COMMEMORATIVES: Very few changes have been noted this week (with the majority on the plus side). Several bidders have entered the market--asking to be confirmed on some of the recently offered MS-65's; sales have so far been rather limited.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$145.80 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES.

\$10.00 per column inch, four consecutive ads

(no changes) - 10% discount

Advertising space is limited, ads will be placed in first possible edition

COMMEMORATIVES

MS-60 coins are "average UNC" - they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-65 coins are choice fully struck specimens without detracting marks - they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices. "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull

DEALERS READY FOR '77 A.N.A. CONVENTION Quarters, Halves & Dollars Top Active BU Roll Market

The Market in Depth

ALLEN HARRIMAN

By the time subscribers receive this issue of the CDN, the 1977 A.N.A. Convention will be in full swing at the Atlanta Marriott Hotel! There is a general feeling of optimistic expectation among most dealers who plan to attend the convention—with numerous teletype messages inviting everyone to “stop by our table” and often stating that plans include lots of buying. In addition, dealers have been “stocking up” on nice material in order to have an impressive bourse display. The problem, of course, is one that has frequently been voiced during recent months—that it is very difficult to locate the calibre of material which one would like to take to this major event of the numismatic year! Those who have squirreled away a few “blazers” may now dig into their vaults to come up with some of those coins which collectors and dealers alike will be searching for across the convention floor.

Meanwhile, a major portion of teletype trading time is being devoted to the BU roll market—from Lincoln cents thru Eisenhower dollars. It is interesting to note that the larger the denomination, the greater the number of potential buyers. There are minor scattered exceptions, of course—but recent gains recorded by the Lincolns, Jeffersons and Roosevelts have basically been the result of one dealer's teletype activity. The Mercury issues, of course, are wanted by practically everyone—and, this week, even more widespread interest is evident for the very active Washington rolls. Moving into half dollars, we have at least as many hopeful bidders—and for all three dollar series there is an even greater number of anxious buyers! Check pages two and three for this week's impressive number of higher bid levels. By the way, no one seems to have been able to locate the 1977-P Kennedy and Eisenhower rolls; this week's higher bids are still unsuccessful—where are they?

As was mentioned in last week's column, an extensive run of \$10 Indians was included in the recent “Commonwealth Sale” conducted by New England Rare Coin Auctions. The following are some of the prices realized (descriptions are from the catalog): 1908-S gem MS-65 to 70, superb—\$4600; 1909-S MS-60 to 65, well struck—\$1100; 1910-D gem MS-65 to 70, superb—\$750; 1910-S gem MS-65, a beautiful strike—\$1700; 1914-P gem MS-65, fully struck—\$800 and a 1915-S MS-60 to 65, a few trivial hairlines away from gem quality still brought \$1650. Again, these few prices will give readers an idea of how much excitement outstanding coins can generate at a major auction. The numismatic community will be anxiously awaiting the results of Kagin's “largest ever” A.N.A. Convention Auction!

see what happens this time around! This same current buyer, by the way, has also advanced bid levels this week for the 39-S, 41-P, 52-D, 55-S, 60-D (sm) and the 1965 thru 1969 P-mint rolls—see page three.

NICKELS: The above mentioned major bidder is also responsible this week for the slightly higher bid levels noted for the 38-S, 47-S and 55-P Jefferson rolls. A few additional buyers want one or two choice rolls of specific dates—but, in general, their bids are in line with present bid-ask ranges. Several dealers are searching for quantities of key Liberty and Buffalo nickels 1885, 1886, 1912-S, 1913-S (II), 1914-D, 1937-D (3 leg), etc.; these are particularly wanted in the Good thru Fine grades. In addition, several BU Buffalo rolls have edged ahead (with only choice rolls wanted, of course!).

DIMES: The Mercuries remain of numerous buying lists. Bidders want choice “full bands” early singles and they will pay even higher prices for them (see the enclosed MONTHLY SUMMARY price chart). This week's gainers in the later BU rolls include 34-P, 35-P and 38-D & S. Even though a few more potential buyers are interested in the Roosevelt series, this weeks gains are again the result of the aforementioned bidder's attempts to locate 47-D, 48-D, 49-D and the 55-PD rolls. (It is very intriguing to note that the often “popular” 55-S and 58-P rolls have yet to participate in the current “upswing”).

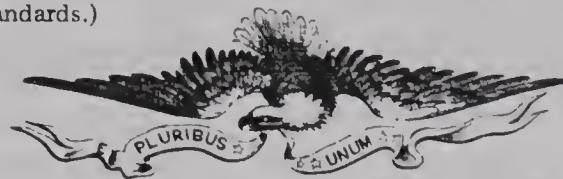

QUARTERS: Interest in the Washington rolls is far more widespread than it is for the smaller denominations—with the previously mentioned major buyer not particularly a leading contender among bidders in this area. This week's impressive number of substantial advances for the 1941-54 rolls can, therefore, be attributed to higher bids from several sources—and, thus far, actual sales have still remained rather limited. Bid for the 1941-64 BU roll set has now edged up to \$7050 (with none offered) and even choice single sets are elusive at \$180 bid.

HALVES: At least a like number of dealers are interested in the two half dollar series as in the Washingtons—price hikes are liberally scattered across both charts. The bid for choice “common date” P-mint W.L. rolls is now a minimum of \$270 and advances have also been noted for 35-P, 36-P, 37-P, 40-P, 43-D and 47-P & D. Prices for the Franklins are quite firm—again with several gains recorded in light to moderate trading (check page three for this week's numerous higher bid levels).

DOLLARS: All of the dollar charts are peppered with plus signs! The Eisenhower issues are now wanted by several bidders and practically all have registered gains; the BU and Proof roll set is pegged at a higher \$2150—and single sets are now registered in the \$112.50-\$120.00 range. Those interested in this area of the market should make a thorough examination of both the Morgan and Peace dollar charts—and, it should be remembered, bidders in the MS-65 column want only strictly graded fully struck coins at these new higher prices (MS-60+ pieces will not fit their requirements).

PROOF SETS and MINT SETS: A moderate amount of bidding is being registered across the entire proof set line-up—with a few small advances noted this week. Most of the current buyers, however, are content with present bid levels—and most even slightly higher bids result in quick transactions.

COMMEMORATIVES: This week's changes are about evenly divided between gains and losses. One major commem dealer is now running regular “buy and sell” lists for virtually all of the silver issues in MS-65 condition. Several other dealers run occasional buying lists—and they usually add that they are “fussy buyers” and want only full MS-65 specimens. (Apparently a number of coins are being returned as not quite up to the bidder's standards.)

This Week's Market

CENTS: One dealer is again attempting to buy quantities of choice 1945-D rolls—at a higher \$10 this week. Many subscribers will recall that this issue has experienced one of the most “roller coaster” backgrounds of any Lincoln roll. Although it reached a high of only \$18 during the BU roll “boom” in 1964, a truly “meteoric” rise took place between the beginning of April and the end of May, 1974—when the bid advanced 260% from \$7.50 to \$27! After remaining at this plateau for a short while, the bid began a virtually uninterrupted drift toward lower levels—ending at a low of only \$6.75 in late June of this year (for a net loss of 75¢ per roll over thirty-seven months). It should be interesting to

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$143.90 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coal market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE the prices in the Newsletter are from dealer to dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee as you would buy stock through a broker.

ADVERTISING RATES

ADVERTISING RATES
\$10.00 per column inch, four consecutive ads
(no changes) - 10% discount.

Advertising space is limited, ads will be placed in first possible edition.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-65 coins are choice fully struck specimens without detracting marks—they may be brilliant or have original toning.

BU ROLLS

- Refer to "Early Singles" above

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MARKET STRONG AS A.N.A. CONVENTION BEGINS

Mercuries Register Record Gains For '77; Washingtons & Eisenhowers Enjoy Bidder Demand

The Market in Depth

ALLEN HARRIMAN

The summer of '77 has witnessed the most active teletype trading of any similar period of the past several years. Not only have the various areas of the market basically resisted the usual "vacation weather slump"---but strongly renewed interest in BU rolls has resulted in the greatest number of summer plus signs recorded in recent history! Add to this the fact that auction prices realized during the past few months have frequently been of a record-breaking nature and you have a strong basis for a successful A.N.A. Convention---and a healthy coin market as we approach the coming autumn months.

"Type" is being challenged more and more by the scarce and rare dates in the Barber and earlier series. This doesn't mean that interest in type coins has lessened---only that many of the better issues are again widening the price gap between themselves and the "common dates". In addition, of course, buying (and subsequent price advances) in all of the twentieth-century series continues at a rapid pace. (A quick comparison between MS-65 prices as reported in the first MONTHLY SUMMARY issue---which was introduced at last year's A.N.A. Convention---and the current issue will give readers a picture of just how substantial these gains have been during the past twelve months.) Quality, needless to say, is more important than ever!

The current interest in BU rolls is much more orderly than in some instances past. Buyers are more sophisticated---demanding not only quality rolls but also generally knowing which rolls they consider worthwhile putting away and which ones to avoid. During the first eight trading months of '77, the 1934-45 Mercuries have not only consistently topped teletype BU roll "want lists"---but these still elusive rolls (and singles) have reported the greatest gains of the entire market for this period. The 1934-40 group has averaged a gain of over 21% since the first of the year and the 1941-45 rolls have fared even better with an average gain of over 26%. The two figures, however, may be somewhat misleading---since advances for the individual dates range from a low of only 1½% (for the previously "hot" 36-S roll) to a high of 71% for the once overlooked 42-D. The major winners in the earlier group include: 37-D (63%), 39-S (59%), 35-D (37%), 37-P (31%)---with hikes in the 20-26% range being registered by 34-D, 35-P, 36-P, 36-D, 38-S and 39-D. The remainder of the '34-'40 issues posted an average gain of about 12% (omitting the 36-S).

The even more sought after lower priced 1941-45 rolls were led, as mentioned above, by the 42-D; other impressive gainers have been: 42-S (44%), 43-S (42%), 41-S (33%), 42-44-P (all 30%), 44-S (25%), 45-P (19%)---with the rest of these later issues averaging about 11%.

A number of the 1941-55 Washington rolls are also finally "coming into their own". Although price advances in this series have been somewhat less consistent than in the Mercury series. There are still a number of dates which remain unchanged---or nearly so---since the beginning of the year. On the other hand, buyer interest in this series is much more recent than for the Mercs---and it still seems to be gathering steam. Among the biggest winners we find: 52-S (50%), 53-P (43%), 48-S (42%), 45-D (37%), 48-P (36%), 45-P (32%), 47-D (31%) with the following dates enjoying increases in the 20-24% range---44-P, 45-S, 46-D, 47-S and 55-P. In addition, advances in the 10-17% were chalked up by a majority of the remaining pre-1956 rolls. Notable exceptions which thus far have been more or less overlooked include: 41-D, 43-D & S, 49-P & D, 50-P, 51-PDS, 52-P, 53-D, 54-PD and 55-D. The next few weeks should determine whether interest in the Washingtons will continue along the same path as it has for the Mercuries.

established higher bid levels---and the major factor limiting sales is the general non-availability of nice, defect-free specimens. Scattered gains have again been registered by the Lincoln rolls---including such often "popular" issues as 1943-PDS, 1954-P and 1955-S. Continued interest in bag quantities of the later dates is beginning to spill over into the earlier "memorial reverse" years---with several bags of the 1959-64 issues changing hands at around \$65 plus shipping.

NICKELS: Locating full MS-65 "common date" Liberty nickels isn't as simple as the present \$90 bid level might indicate---a large percentage of the pieces seen have "problems" of one sort or another. In addition, dealers and collectors alike are finding that most of the earlier issues are far more scarce in this top grade than nominal "Redbook" listings would lead one to believe. In fact, current MONTHLY SUMMARY bid levels (many of which are approaching "double Redbook") for the 1883 (WC) thru 1896 issues very seldom produce the desired results. With many of the major bidders away from their teletype machines this week, gains for the Buffalo and Jefferson rolls have remained at a minimum.

DIMES: Yet another impressive round of gains has been registered by numerous Mercury rolls. The 1941-45 BU roll set is now bid at a record \$2850 (with single sets tagged in the \$58-\$62 range); sales of one or two choice 1934-45 "short sets" have been noted around the \$500 level---but these are no longer listed for sale with any frequency. Barber dimes, by the way, in strictly choice original MS-65 condition are eluding both type and date collectors---with more and more issues being removed from the "common date" category. The Roosevelt series is quiet this week---the picture may well change when some of the major bidders return from the A.N.A.

QUARTERS: The 1941-64 BU roll set is bid this week at a higher \$7150---still with none offered; scattered individual dates have also registered gains (see page three). Attempts to buy the scarce pre-1941 issues result in only widely scattered transactions---even the 1934-40 P-mint rolls are now few and far between. As with the dimes, "dated" Barber quarters are receiving quite an amount of bidder attention---and many issues previously considered as "common dates" (and still listed as such in the latest "Redbook") are proving to be far from easy to locate. A quick glance at the August MONTHLY SUMMARY will show that current buyers are willing to pay substantial premiums for properly graded original MS-65 specimens. Assembling a choice complete set of any of the three Barber denominations is now quite a challenge---to say the least!

HALVES: Bid for the 1941-47 BU roll set of Walking Liberties is noted this week at a higher \$8250---with single sets in the \$425-\$460 range. Roll sets are now rarely seen. As a matter of fact, very few single sets reach teletype selling lists---and, in addition, buyers must be careful to avoid those sets which include a "slider" or two and/or poorly struck S-mints. (Retail sales of gem, fully struck 1941-S singles, by the way, have recently been registered as high as \$150!) The Franklin series has remained steady throughout the week; it is interesting to note that the present \$5200 bid for the BU roll set is slightly over the total of the individual bids for the thirty-five rolls involved---a relatively unusual situation.

DOLLARS: Trading this week has been kept to a minimum due to the fact that most of the major silver dollar dealers are attending the '77 A.N.A. Convention. Still, bidder interest has remained very strong at current levels---and various "want lists" are as lengthy as ever. Bid for the BU and Proof roll set of Ikes is now \$2250---which is considerably over the total of the individual roll bids (another unusual occurrence---which indicates that at least some potential buyers are willing to pay extra in order not to have to put together their own sets roll by roll).

PROOF SETS and MINT SETS: Small gains have been recorded this week by several of the issues in the 1957-64 group (as well as a number of the S-mint issues). The lower priced silver sets are beginning to interest a number of buyers at current bargain levels---but virtually all bidding in this area falls into the "cautious" category.

COMMEMORATIVES: This week's few minor changes are practically all on the plus side of the ledger. As with the dollars, many of the major traders in this segment of the market are not at their teletype machines this week; the few weeks following the A.N.A. Convention may well prove to be interesting for the silver commems.

This Week's Market

CENTS: Further teletype attempts to locate early copper type material are meeting with little or no success; potential buyers are sticking with recently

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$143.70 per ounce.

SUCCESSFUL A.N.A. CONVENTION CONCLUDES IN ATLANTA Most Dealers Are Back At Their Teletype Machines; Numerous Gains Noted

The Market in Depth

ALLEN HARRIMAN

The 1977 A.N.A. Convention can certainly be termed a success! The bourse floor was generally quite active throughout--and virtually every dealer spoken with reported that sales were excellent. At least one major dealer stated that this show was his most successful ever and the number of complaints was definitely at a minimum. Most dealers arrived armed with lengthy "want lists" which had been given to them by various clients and, in addition, the many collectors who were personally able to attend created considerable competition by scouring bourse tables for just the "right" specimens.

Activity basically covered all areas of the market--with material of all kinds changing hands. Not unexpectedly, however, top quality merchandise captured a major share of the action--with a great deal of attention being focused on the Barber and all later series. Truly outstanding specimens in these categories were fetching quite extraordinary prices--especially the beautiful original toned nickel and silver coins. Copper, somewhat incongruously, is usually wanted without the normal toning often acquired over the years. An excellent example is the gem BU 1914-S Lincoln which changed hands during the Atlanta show for what may well be a record \$800! (And, by the way, while speaking of copper coinage, it should be mentioned that an excellent article on the rarity and current retail value of gem MS-65+ Lincolns is "in the works." It will appear in the September issue of the CDN Monthly Summary.)

One series which is currently receiving quite a lot of attention is Barber dimes. Even the common date P-mints (in strictly choice MS-65/better condition) were "conspicuous by their absence" from bourse tables--and the few scarce and rare issues which buyers were able to locate brought truly impressive prices (often as much as three or four times the latest Redbook listings). It must be stressed, once again, that these strong prices are for gems--usually MS-65+; coins in the MS-60/60+ range trade for much less (and much less quickly). As a matter of fact, most of the buying in all of the above mentioned series was either for gems or for nice high grade circ specimens in the VF/XF range. The AU, "slider" and MS-60 pieces attract far less attention unless truly "bargain-priced."

Several knowledgeable dealers have recently expressed the opinion that the dime set is the most difficult of the three Barber denominations to assemble in choice/gem condition! This statement of course, is open to discussion--and depends to a great degree upon the experiences of the individual dealer or collector. Putting together sets of the quarters or half dollars is certainly not a simple project. However, suffice it to say that the Barber dime series is still vastly underrated. Numerous dates are rare--and many others which have heretofore been considered "common dates" are actually quite scarce. This fact is just beginning to be generally known--and the future for this attractive set appears to be a bright one!

This Week's Market

CENTS: Gem MS-65+ Lincolns were on the minds (and "want lists") of many dealers, collectors and investors during the A.N.A. Convention--and very few pieces of this ultimate quality were located. As one dealer remarked, it is just beginning to become apparent to most people that assembling a truly choice set of Lincolns is far more difficult than putting together a complete set of Indians in the same condition! By the way, the scarcity of nice defect-free early copper--in the VG/VF range--was quite apparent at the show; no wonder that frequent teletype bidding produces so few results.

NICKELS: Continued bidding for choice Buffalo rolls in the 1934-38 "short set" is basically ineffective; a few 1937-P and 1938-D rolls can be located--but, in general, the remainder of these issues seem to be in hiding--at least for the moment. Dealer bid levels for the scarce circ 1879-89 three-cent nickels are now pegged at the following higher levels (prices for 1886, of course, are for circulated proofs):

	G	VG	Fine	VF	XF
1879	\$20	\$23	\$27	\$37	\$47
1880	25	28	32	39	50
1882	22	25	28	37	50
1883	37	43	57	68	78
1884	50	53	65	75	95
1885	65	68	80	105	120
1886	75	83	99	112	140
1887	55	58	70	87	100
1888	18	19	20	22	25
1889	24	25	27	32	35

DIMES: The "hot" 1938-D roll is heading a number of teletype buying lists--bid has moved to \$800 (up \$75) and at least one potential buyer is practically begging for even a single roll. The 1939-S roll, by the way, has advanced \$100 (to \$1250 bid)--this roll is far more scarce than the 38-D even though neither is being offered for sale at the present time. Additional plus signs have been reported by virtually all of the 1934-45 issues--check pages two and three!

QUARTERS: The Washington rolls continue to perk along quite well. Trading remains in the "light" category and those few dealers who are listing rolls for sale are keeping price tags just ahead of bid levels. Among this week's gainers is the very scarce 1942-S roll--now bid at \$1400. It has been a long time since this roll has been listed for sale--and bidders often state that they would be happy to locate even a few choice singles. Choice full MS-65/better Barber quarters, by the way, were very few and far between at the recent A.N.A.--with the usual "sliders" and MS-60 specimens far more plentiful.

HALVES: Advances this week are rather liberally scattered across both the Walking Liberty and Franklin charts. As usual, quality is the key to sales--and several dealers are now asking for gem singles of the W.L. "short set" issues rather than rolls (which often include a number of MS-60/60+ coins). A.N.A. bourse tables displayed very few nice circ Barber or W.L. halves in the popular VF/XF category--with more AU and "sliders" being offered. (It is apparent that more and more collectors are trying to put together sets of these two series in the VF/XF grades.)

DOLLARS: The minimum bid for pre-1921 BU Morgan rolls is now \$134 (for 1883, 84 & 85-0) and \$137 for "any other" issue. Gains this week are again rather plentiful--with a number of MS-60 singles getting in on the act for a change. Superbly toned specimens of even the most common dates were bringing very impressive prices at the A.N.A. and, of course, choice and gem prooflike pieces were enjoying the usual strong demand. (An up-dated price report on PL dollars will be forthcoming within the next several weeks.)

PROOF SETS and MINT SETS: Scattered small gains are again registered for a number of issues in the 1956-64 group--with many bidders asking for one or two hundred set lots of spot-free sets. The 1977-S set is just a bit stronger--with a few transactions noted around \$8.50.

COMMEMORATIVES: Changes are minimal for the silver issues--but one major commem dealer has offered a rather large selection of both MS-60 and MS-65 gold issues at lower prices. (A consistent teletype complaint in the commem area is that many of the "MS-65" coins listed for sale turn out to be of somewhat lesser quality when received.)

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$145.90 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offer to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer to dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

\$10.00 per column inch, four consecutive ads (no changes) - 10% discount

Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster. MS-65 coins are choice fully struck specimens without detracting marks—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

An Exceptional Offering Of Properly Graded Half Dimes:

1829 ch VF/XF (lovely toning)-\$30; 1830 ch XF (PL surfaces)-\$47;
1831 F-\$13; 1832 VF-\$21; 1832 Brill AU/UNC (originally bought as
BU)-\$99; 1833 XF (few light handling marks) only-\$24; 1833 orig.
uncleaned AU (many would grade UNC)-\$90; 1834 VF-\$21; 1836 VG+
-\$11; 1836 lovely tone XF/better-\$46.

The prices which follow the S.L. half dimes in parenthesis are the
Ahwash price listings in the January CDN: 1837 (NS) small date Good
(rev AG) (\$50) sell-\$20; 1837 (NS) large date F (\$70)-\$45 and VF (\$95)
-\$70; 1838-O G (one small dig in field) (\$45)-\$25; 1838 (ND) VF+
(\$25)-\$17; 1839-small O G (\$12)-\$7 and XF (\$60)-\$42; 1840 (ND) abt
F (\$15)-\$8, VF/XF (\$25-\$50)-\$23 and ch XF (\$50)-\$42; 1840 (WD) F
(very slightly bent - hardly noticeable - very scarce!) (\$60)-\$30; 1841 VG
(\$10)-\$6; 1841-O VG (\$15)-\$9; 1842 ch XF (\$35)-\$30; 1842-O F (\$25)-
\$16; 1843 lustrous XF (\$35)-\$29; 1844 AU, choice (\$45-\$350)-\$85;
1844-large O G (rev AG) (\$25)-\$12; 1845 XF (\$35)-\$29; 1846 full
F/better RARE! (\$150)-\$120; 1847 XF/better (\$35)-\$29; 1848 med.
date G/VG (\$12)-\$7 and ch AU/UNC (\$35-\$325)-\$85; 1848 lg. date VF
scarce (\$45)-\$31; 1848-O AG no defects (\$20 G)-\$9; 1849 abt F (\$15)-
\$7; 1849-O full XF and RARE! a few tiny obv marks keep this coin out
of the \$300 class (\$300)-\$175; 1850 VF (\$20)-\$13; 1850-lg O abt F
(\$30)-\$18; 1851 G (\$8)-\$5 and F (\$16)-\$10; 1851-O F minor old scr
in field - not important (\$30)-\$17 and ch VF (\$45)-\$32; 1852 VF (\$20)-
\$13 and ch brill semi-PL AU/UNC (375 UNC)-\$85; 1852-O just barely
F no defects-scarce! (\$60)-\$41; 1853 (NA) VF very scarce (\$75)-\$55;
1853 (A) VG/F (\$8)-\$5.50; 1853-O (A) VG (\$8)-\$5 and VF (\$16)-\$11;
1854 F (\$9)-\$6; 1854-O XF (\$80)-\$35; 1855 VF (\$15)-\$11; 1855-O
G (\$15)-\$9 and F (\$30)-\$21; 1856-O F/VF (\$11-\$20)-\$12 and ch XF
(\$40)-\$34; 1857 VF (\$12)-\$10; 1857-O ch VF/XF (\$20-\$40)-\$23;
1858 VF/XF (\$13-\$26)-\$15; 1859 ch VF scarce! (\$65)-\$35; 1859-O
VF (\$30)-\$16; 1860 G (\$6)-\$4; 1860-O VG (\$6.50)-\$4.50; 1861 F
(\$6.75)-\$5; 1862 G/VG (\$6.50)-\$4; 1863-S F (overall VF) (\$30-\$45)-
\$25 and full XF but with scrapes which occurred in the Orient (\$100)
only-\$20; 1864-S VG (slightly bent - not important (\$35)-\$19; 1865-S
G/VG (rev F) (\$20)-\$14 and VF at least with scrapes as above (\$65)
only-\$15; 1866-S F (overall VF) (\$30-\$50)-\$24 and XF with the same
light scrapes (\$125) only-\$30; 1867 ch brill PROOF with fully frosty
devices - at least MS-60+ (most would grade 65) sell at only-\$195; 1867-S
G/VG (\$15-\$20)-\$13; 1868 VG scarce! (\$30)-\$21; 1868-S ch lustrous
AU - scarce so choice (\$325 UNC)-\$75; 1869 VG scarce (\$12)-\$9;
1869-S VG (\$15)-\$9; 1870 VF/XF (\$15-\$40)-\$16; 1871 G+ (\$6)-\$4
and ch XF (\$25)-\$20; 1871-S at least XF with the scrapes from the
Orient (\$125) only-\$30 and another XF with light solder mark obv - rev
AU (\$50 in F) sell at-\$15; 1872 ch XF (\$23)-\$19; 1872-S (above)
F/VF (\$9-\$15)-\$8; 1872-S (below) G (\$7)-\$5; 1873 ch AU+ (very
close to MS-60) (\$200 UNC)-\$45; 1873-S ch "super slider BU" (\$300
UNC)-\$75 and a lustrous AU sell at \$40; Lot--all damaged; 1834 VF,
39 VG, 42 G, 45 F, 48-O G/VG, 53 AG, 56 VG, 58-O VF, 62 F,
70 VF - 10 pieces-\$20.00.

SILVER DOLLARS VERY STRONG; MANY GAINS RECORDED BU Roll Market Also Quite Active—Bidders Raise Numerous Bid Levels

The Market in Depth

ALLEN HARRIMAN

Silver dollars continue to present one of the most steadily active areas of the market—particularly the Morgans. There are several dealers who are anxiously attempting to locate “nice” common date BU bags of any pre-1921 issue and the current bid level of \$6700-\$6750 produces only widely scattered sales of 83-O, 84-O or 85-O. This week’s bid has edged up to \$137.50 for “any other” pre-1921 roll (\$6875 per bag)—and, again, actual transactions have been very limited.

At this point, only the 85-P and 86-P rolls fall into this “second most common date” category and bag quantities of even these dates now seldom reach the teletype circuits. (The few sellers encountered usually keep their ask prices just one step ahead of the market.) Several dates which a year or so ago were considered in the same common date category (87-P, 88-P, 89-P, 00-P, 04-O for instance) have recently been escalated to a somewhat higher position—and are now even more infrequently offered. The late O-mint issues, by the way, are currently of considerable interest to a number of dealers—with further price hikes being registered this week 98-O, 99-O, 01-O, 02-O and 04-O.

It is interesting to note the present scarcity of most of the S-mint “Redfield” dollars on today’s teletype circuits. During the past several weeks, one major and frequent bidder has been edging his offering prices a bit higher now and then for all of the 1886-91 San Francisco coins—yet relatively few strictly MS-65 specimens have been located. There is no doubt, of course, that tightened grading standards are definitely in force for dollars as well as in all other areas of the market—and there does seem to be a small “floating supply” of MS-60/60+ pieces which have been shipped back and forth at least once or twice as not meeting today’s more strict grading requirements. Still, it is still somewhat surprising that current buyers are having such a difficult time locating these dates which not too many months back were plentiful to say the least!

Readers will also note that this week has brought a rash of plus signs in the often neglected MS-60 column. It is obvious that, as MS-65 bid levels increase, many of the MS-60 prices begin to look more and more attractive. Then, of course, bidders start to offer a dollar or two more. The differences between MS-60 and MS-65 bid levels can be quite intriguing. These variances range from only a few dollars (as reflected, for instance, by the earlier Carson City issues) to the five to one ratio shown by the 92-O. The two major factors that determine which category a particular coin falls into are strike and the imperfections acquired after the coin was struck (ie. bag marks or abrasions). The large differences between MS-60 and MS-65 bid levels usually are a result of a general weak striking of the particular issue (examples: 86-O, 89-O thru 97-O, 01-P, 21-P & D). The determining factor for those issues which are almost always found well struck is the condition of the surfaces of the coin (examples: 78-S thru 82-S, 78-CC thru 85-CC, 90-CC, 91-CC).

sales”; this seems to be an order which is difficult to fill! Quite a number of individual rolls have also advanced this week—nearly all the result of one bidder’s attempt to locate these particular dates in the desired condition.

NICKELS: Scattered gains have been noted for a few Jefferson issues—with 47-S, 48-S, 49-S, 50-P, 51-S, 55-P and 58-P the most sought after dates. It should be remembered that bid-ask levels are for MS-65 material; problem rolls (such as the dark 55-P’s or 58-P’s—or poorly struck and/or spotted) trade much more slowly and at lower prices. The 1938-64 BU roll set, by the way, has now moved to \$3600 bid (none offered)—with the single set now pegged in the \$95-\$100 range.

DIMES: The Mercury rolls are virtually unchanged this week—but this doesn’t indicate a dwindling of interest. A number of anxious bidders are now simply asking for “quotes” or they are sticking to current levels—knowing that continually raising bid levels doesn’t necessarily bring out the sellers (most of whom may well be waiting to see just how far bid levels will advance). Gains this week for the Roosevelts include 48-D, 49-D and 55-P & S.

QUARTERS: Here, too, potential buyers seem to be content—at least, for the moment—with present bid levels for the 1941-64 rolls (exceptions: the “common” ‘54 thru ‘57 P & D issues—which are slightly widening the gap between the bullion related dates and themselves). The BU roll set still seems totally unavailable at the current bid of \$7150; an occasional single set changes hands around \$190-\$195.

HALVES: Interest remains high for all of the 1934-47 Walking Liberties, even though—as with the Washingtons—bid levels are practically unchanged. (Offering to pay “pro-rated ask” for gem singles isn’t proving very effective and actual transactions have been very limited). A few advances have been noted for some early Franklins (48-P & D, 50-P, 51-S); the later dates are firm at present levels.

DOLLARS: An extremely active area of the market—with hopeful bidders asking for singles, rolls, bags and now even MS-60 singles and rolls. See “The Market in Depth” column!

PROOF SETS and MINT SETS: Interest in the low priced silver issues—1956 thru 1964—remains evident. Most buyers want relatively large quantities (one hundred to five hundred sets)—but, in general, they seem somewhat reluctant to disturb the present price structure (the ‘61-‘63 sets have edged just slightly higher). There are several dealers who want quantities of the 1965-67 “special mint sets” at slightly higher prices—and the two popular ‘70 and ‘73 mint sets have also registered token gains.

COMMEMORATIVES: Not unexpectedly the silver issues have begun to edge forward—with gains outnumbering losses by a large margin this week. Two major commem dealers are being joined by several other potential buyers and, again, the greatest obstacle to sales appears to be the difference of opinion as to what does and does not constitute the full MS-65 classification. Some sellers, of course, tend to be a bit optimistic—while most buyers, on the other hand, are strictly conservative.

This Week's Market

CENTS: Both the 1934-58 and 1941-58 BU roll sets have registered advances this week—with the single sets recording proportionately even greater gains. Bidders want strictly choice MS-65 sets—and rolls which are “suitable for single

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$148.35 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES:

\$10.00 per column inch; four consecutive ads (no changes) - 10% discount.

Advertising space is limited; ads will be placed in first possible edition.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

* Kennedy sets include 32 rolls listed on page three

SINGLE SETS AND ROLL SETS

Complete sets do not include 22-Plain, 55/55, 72/72, 18/17 or 42/41.

MARKET CLOSING PRICES BU SILVER DOLLARS

Gem MS-65 70 angles are worth more than the MS-65 prices below. Roll prices are for average strikes for the issue. Choice full MS-65 rolls usually bring more than the listed prices. Scarce and rare date rolls should be figured on the basis of the quality of the individual coins involved.

A FEW CHOICE COINS FOR SALE:

CENTS: 1873 lovely orig tone Proof-65-\$165 (Cat \$265!); 1908 superb
gem MS-70 (no finer could exist)-\$75; 1921-S full orig MS-65+, sharp
strike - no spots-\$195; 1932-P superb gem MS-70 - absolutely perfect!
-\$25; 1972/72 another gem MS-70-\$125. **NICKELS:** 1880 ch
65/better Proof (only one minute spot keeps this coin out of the gem
class) only-\$250; 1897 superb gem 70 Proof-incredible coin-\$175;
1926-P a gem MS-65+ specimen-\$35. **DIMES:** 1897 gem 65+ Proof-
\$250; 1898-O lovely orig tone AU/UNC (rare in this top grade)-\$70;
1913-P ch MS-65, full strike-\$125. **TWENTY CENTS:** 1875-S a very
choice frosty MS-65 - close to gem quality-\$850. **QUARTERS:** 1878-S
obv. G+, rev defect-free AG - a very rare coin-\$70; 1890 ch VF (Rare!)
-\$90; 1896 a gorgeous halo-toned 60/65 beautiful-\$175; 1903-O
Brill. UNC (slightest friction - very scarce)-\$165; 1909-O XF/AU (rare
date!)-\$85; 1917-P (I) fully brilliant "slider BU" (full head) only-\$110;
1917-D (II) Brill UNC with FULL HEAD (slightest cabinet friction
keeps this coin out of the \$500 class)-\$225. **HALVES:** 1795 ch
totally defect in VG with claims to Fine hair detail \$290 and another
ch Fine absolutely defect-free-\$400; 1847-O orig tone MS-60 (very well
struck)-\$210; 1859-S a brilliant "slider" (which most would grade
MS-60)-\$115; 1874 Brilliant Proof (few marks) a true bargain at only
\$300! 1918-S a fully struck frosty orig coin - but with a planchet flaw
obv (nearly hidden by toning) a steal at-\$150. **DOLLARS:** 1881-CC ch
frosty full strike MS-65-\$75; 1882-CC ch MS-65-\$25; 1883-CC ch
MS-65-\$25; 1927-D ch fully struck MS-65 (very few marks of any kind)
-\$125; 1874-CC Trade dollar - a frosty "slider BU" (which most would
grade UNC - very scarce & underrated)-\$365. **COMMEMS:** Ft. Van-
couver ch AU & scarce-\$110; Hudson ch MS-65 (light orig halo tone)-
\$375. **GOLD:** 1873 \$1.00 ch brill MS-65 a superior defect-free piece-
\$400; 1909-D \$5 brill MS-60/better - only-\$190; 1913-S \$10 XF/AU
(defect-free and quite scarce)-\$400; 1915-S \$2½ Pan-Pac ch AU
(perfect for the collector who doesn't want to spend \$1000 for a BU)-
\$475; 1917 McKinley \$1.00 - gem MS-65+-\$325.

ROLLS: choice MS-65/better roll 48-P quarters-\$85. **MINT SETS:**
1953-S double set in original holder--choice coins, lovely color-\$20.
Please add postage and insurance on orders under \$100.00!

*Exquisite Line
of
Fine Jewelry*

A NO-RISK jewelry program tailored for you - designed to complement
your existing business.

Highest quality 14K gold cocktail rings, dinner rings, pendants and earrings
set with real precious gemstones, natural rubies, sapphires, emeralds, opals
and, of course, diamonds.

Buy direct from the manufacturer and save - NO MIDDLEMAN! Act as
your own wholesaler or retailer. 100% to 200% profits are very realistic
from a proven industry with high profit guarantees. For example: an item
at your cost of \$60.00 retails from \$175 to \$225 in jewelry stores.

The jewelry industry statistics show that one-fourth of all retail jewelry
sales occur during the Christmas season. Assure yourself of extra profits
by sending EARLY or calling for our brochure. Our reputation is built on
quality and service.

Arrangements can be made for the trade of your coins for our line. Please
write or call for details:

DOLLARS CONTINUE TO PACE ACTIVE MARKET

Sales Remain Light Even Though Anxious Bidders Crowd Teletype Circuits

The Market in Depth

ALLEN HARRIMAN

Strong buying pressure continues to be applied to the Morgan dollars---with increased bidding also reaching over into both the Peace and Eisenhower series. For the Morgans, demand encompasses all areas from VG/better circ rolls and bags thru the scarce and rare circ singles---from BU “common date” bags thru the semi-key and key singles in gem MS-65+ prooflike condition---and virtually all categories inbetween!

Price differentials among dates previously lumped together in the “common date” grouping are becoming more and more evident. Few buyers are now able to locate choice rolls, for example, of the 1888-P & O, 1889-P, 1890-P or 1896-P issues; these---and a number of others---are dates which not too long ago were priced at or near the same levels as the much more easily obtained 1883-85-O and 1885-86-P rolls. (Readers will note that these are now the only five pre-1921 Morgan rolls which are bid at less than \$140.) In the Peace series, the once quite plentiful 1924-P and 1925-P rolls are eluding a number of anxious potential buyers---bids have advanced to \$122 and \$140 respectively with very few completed transactions recorded. It is very interesting to note that in the 4th edition of the “Redbook” (The 1951-52 issue), the 1925-P was listed as the second most expensive Peace dollar at \$6.50. The key 1934-S was listed at \$15 and the remainder of the dates were priced from \$2 to \$4!

The 1973-S 40% proof Eisenhower dollar again seems to be recapturing at least a part of its former glory as the “key” of the series. Those bidders who want ten, twenty or even a hundred sets are now offering to pay \$27.50 per---and few are being located. The whole series, as a matter of fact, is experiencing mild buyer attention---with several other issues edging a bit higher this week. This doesn’t mean that there aren’t sellers in this area---there are. Many of the sellers, however, are listing mixed date lots for sale and dealers who need specific dates usually pass these “lots” by. In this area, too, the differences between making a purchase or not seems to be a matter of only a few cents per coin---or of who is going to pay the rather hefty postage charges connected with shipping a quantity of Ikes. Complete BU and proof rolls sets are still bid unsuccessfully at \$2250---and an occasional single set changes hands at around \$120. These sets, however, lack the 1977-P---none of which have yet been seen on the teletype circuits! Although the mint reports list this coin (as well as the half dollar) as having been minted in some quantity, no dealers seem to have any---either for sale or not. Rumor has it that some rolls of both changed hands earlier in the year---but, at this point, no one seems able to find either roll. Perhaps this lack of availability will spur interest in ordering the 1977 mint sets at \$7 each (which is almost double the face value of \$3.82)! Of course, the releasing late in the year of the 77-P halves and dollars could “shoot the theory” of those expecting another even better version of what happened in 1970 with the Denver half and in 1973 with the P & D dollars!

This Week’s Market

CENTS: Advances are once again rather thoroughly scattered across the Lincoln charts---still mostly the result of one major buyer’s frequent “want lists”.

Several bidders, however, would obviously like to locate one or more 1941-58 BU roll sets; this week’s higher bid of \$625 has remained ineffective. Locating a seller who has all of these rolls in choice MS-65 condition is quite a problem---many dealers have not been stocking much in the Lincoln category during the past few years. A few gains have been noted for some of the rather scarce (defect-free) lower grade large cents---check page four.

NICKELS: A moderate amount of interest has edged a number of Jefferson issues a bit higher. Those dates which are appearing on buying lists are, naturally, the rolls which are more or less being “held back”---with many of the remaining dates still easily located. The “Type III” three-cent silver piece, by the way, has moved to \$290 bid in strictly MS-65 condition. This issue is considerably more elusive in top condition than the similarly priced but much more plentiful “Type I”. Mintage figures for the 1851, 52 and 53 issues total over thirty-five million coins---while the four 1859-62 “collectable” dates total less than one and a half million pieces!

DIMES: Even though the bid has yet to advance above the \$800 mark, attempts to locate “several choice rolls” of the low mintage 1938-D Mercury have been quite fruitless. This roll does exist, of course, but seemingly those who have them are far more interested in watching current demand from the sidelines rather than offering to sell. As a matter of fact, this is true for virtually any Mercury roll at the moment---and in spite of the fact that bid levels are steady, buyer interest for the 1934-45 dates is still strongly evident. Prices for the Roosevelts are lightly mixed---with the 1946-64 BU roll set moving up to \$2850 (total bids for the forty-eight individual rolls is well over \$3000).

QUARTERS: The very elusive 1804 Draped Bust issue is again appearing on several teletype buying lists---with “any grade” wanted in defect-free condition. (The mintage of this scarce coin is only 6,738 pieces---very close to the 6,146 figure for the far higher priced 1796 “one-year-of-type” issue.) Interest in Washington rolls seems to have settled just a bit; this week’s few small changes are about evenly divided between gains---and losses and sales have been light to moderate. Some interest is now noted for the 37-D single---at a slightly higher \$22.

HALVES: A number of the lower priced Franklin rolls---particularly 1956 thru 1961---are now being listed for sale in small quantities. Current buyers, however, are “playing it cool” by only casually picking off a few dates here and there. Walking Liberty rolls, on the otherhand, are still eluding nearly all bidders---even those who simply ask for “quotes on gem, fully struck rolls”. Several potential buyers are also in the market for virtually any VF Barber half---as well as the earlier W.L.’s in both VF and XF condition. Present bid levels in this area don’t seem to be adequate---if, indeed, this issues are available in quantity at all!

DOLLARS: Dollars are still enjoying a major share of the market activity. Plus signs are equally as numerous as they were last week---yet sales have continued to be in the light category. For more details, see “The Market in Depth”.

PROOF SETS and MINT SETS: Both groups are virtually unchanged this week. There are several dealers who are attempting to locate quantities of nearly all dates from 1956 onward---but, in general, bidding has again slipped mostly into the realm of “bargain hunting”. Choice original “double” mint sets from 1946 thru 1958 are wanted by a few bidders at current levels---and, of course, the popular 1970 and 1973 issues change hands frequently within present bid-ask ranges.

COMMEMORATIVES: The silver issues presnet a somewhat confusing picture! There are two major commem dealers who are constantly running extensive “buy-sell” lists for most dates at or near current bid-ask levels---yet sales appear to be rather limited. On the otherhand, there are several bidders who want specific issues in “strictly MS-65” condition---and who don’t seem to be able to locate the quality material they need for their clients.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$148.40 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor a transaction of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee as you would buy stock through a broker.

ADVERTISING RATES:

\$10.00 per column inch, four consecutive ads
(no changes) - 10% discount.

Advertising space is limited, ads will be placed in
first possible edition.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices. "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "

MARKET CLOSING PRICES BU SILVER DOLLARS

MS 60 prices are for rolls more than the MS-65 prices below. Roll prices are for average strikes for the issue. Choice full MS-65 rolls usually bring more than the listed prices. Rare and rare date rolls should be figured on the basis of the quality of the individual coins involved.

PLAN TO ATTEND OUR 5TH ANNUAL COIN SHOW
OCTOBER 28—30 AT CHICAGO'S O'HARE HILTON

*Exquisite Line
of
Fine Jewelry*

A NO-RISK jewelry program tailored for you - designed to complement your existing business.

Highest quality 14K gold cocktail rings, dinner rings, pendants and earrings set with real precious gemstones, natural rubies, sapphires, emeralds, opals and, of course, diamonds.

Buy direct from the manufacturer and save - NO MIDDLEMAN! Act as your own wholesaler or retailer. 100% to 200% profits are very realistic from a proven industry with high profit guarantees. For example: an item at your cost of \$60.00 retails from \$175 to \$225 in jewelry stores.

The jewelry industry statistics show that one-fourth of all retail jewelry sales occur during the Christmas season. Assure yourself of extra profits by sending EARLY or calling for our brochure. Our reputation is built on quality and service.

Arrangements can be made for the trade of your coins for our line. Please write or call for details:

CHOICE & GEM GOLD ELUDES MOST BUYERS

Silver Dollars Still Dominate Teletype Trading; BU Rolls Register Numerous Gains

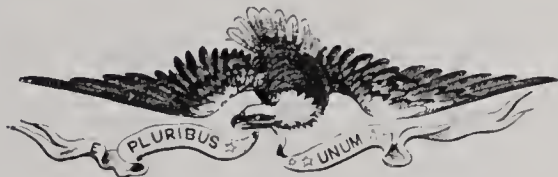

The Market in Depth

ALLEN HARRIMAN

Readers will note that the gold type coin chart (this page) carries a new rash of plus signs in both the MS-60 and MS-65 columns. Serious buyers in this area are having a difficult time locating a sufficient number of coins to fill their needs--and these higher bids haven't done much to alleviate the situation. As for strictly MS-65 specimens, there simply aren't very many accurately graded pieces on the market--not to mention the absence of true gems. One dealer recently remarked that he had scoured the bourse tables at several recent shows and had come up with only half a dozen truly choice gold type coins. Of course, he went on to explain, there were plenty of MS-60+ coins called "choice" or "gem"--but that properly graded examples were very few and far between. Teletype sellers of this material, needless to add, are just as scattered--overgrading is not exclusively the province of bourse dealers.

One dealer recently asked why there are complete sets of such series as Barber dimes, quarters and halves, Buffalos and Mercuries, etc. for sale on the tapes at discounts from the bid prices listed at the tops of various charts in the Monthly Summary. The answer is rather simple. The sets which are for sale at ten or fifteen percent below CDN bid prices are described as "nice average circulated sets"--which is simply another way of saying that at least some of the coins involved (often most) grade About Good. The CDN bid-ask levels are for Good/better sets. "Average circ" sets, of course, usually include some (if not all) of the key dates in AG condition--and just two or three such examples lower the value of a complete set considerably. For a Barber quarter set, an AG 1901-S alone can knock at least fifty dollars off the price! Collectors and and investors should take note that bid prices are for Good/better sets and make their buying decision accordingly.

The very active silver dollar market has registered several quite substantial individual price advances this week. Bid for the very rarely encountered strictly MS-65 1889-CC has jumped \$200 (to \$3300)--with at least one hopeful bidder willing to pay at least \$4000 for the right prooflike specimen. The fast moving 1904-P is now strongly bid at \$85 in full MS-65 condition--with "cherries" occasionally changing hands for as much as \$100. (The January bid for this one was \$50!) The suddenly scarce 1925-P roll is up again this week--with bids as high as \$155 and few if any offered. (This date has been "recommended" in a recent publication and the ensuing buying flurry could well push prices substantially higher during the next few weeks.) A thorough look at the page six chart will reveal the many other strong gains noted in the two extremely active dollar series!

This Week's Market

CENTS: A number of the 1934-55 rolls continue to be included on several teletype "want lists"--but virtually all of this week's plus signs (as well as most of

this week's plus signs (as well as most of those registered during recent weeks) can be attributed to a single dealer's higher bids. It must be stressed that only choice MS-65/ better rolls are wanted at these advancing bid levels--and this requirement is stated as part of the buying requests. Another major buyer will pay "ask" for mint-sewn bags of practically all of the 1967-71 Lincolns--with an occasional transaction noted (the 65-P and 66-P are now offered at lower prices).

NICKELS: Nothing of much consequence has happened in the Jefferson series this week--the few small gains are again the reflection of the above mentioned buyer's attempts to locate a few strictly choice rolls. (The higher bids of \$22.50 and \$4.25 for 55-P and 58-P rolls are for "brite" rolls--not the very often encountered dark coins.) At least two buyers are still extremely interested in located all grades of the 1879-89 three-cent nickels--and they are now willing to pay from one to three dollars over the bids reported in the recent 9/2 CDN issue.

DIMES: Respective and substantially higher bids of \$1800 and \$875 have failed to pry loose any choice rolls of 1937-D or 1938-D Mercuries. Other dates which are enjoying impressive gains this week are 1941-S (\$260); 1942-D (\$350) and 1942-S (\$400)--and interest remains strongly evident for "any or all" of the 1934-45 issues in choice condition. The several small advances in the Roosevelt series are again the result of one dealer's buying lists--most bidders in this series are content to stick to current levels. The present bid of \$135 for MS-65 Barber dimes is almost totally ineffective--with only scattered MS-60/60+ specimens being offered.

QUARTERS: Another strong round of gains has been registered by the 1941-48 Washingtons this week--and these dates have been joined by the 55-D at a higher \$92 bid. The 1941-64 BU roll set is now wanted at \$7200--with none offered for sale. As with the dimes, the current bid (\$270) produces few if any sales of strictly MS-65 Barber quarters. (Price tags for the occasionally encountered choice piece on bourse tables usually range from \$325 to \$400 for "common dates.")

HALVES: Recently recommended as "underpriced" by a leading numismatic advisory publication, the 1945-D roll recorded at \$25 jump (to \$305) this week. Also carrying plus signs are the 35-P, 37-P, 46-PDS and 47-P rolls--and the 1941-47 BU roll set is now wanted at a higher \$8400! Franklin rolls, however, are virtually unchanged this week--with several sellers noted around current ask levels. Barber halves in full MS-65 condition present something of a problem in that a very large percentage of the examples seen grade MS-60+ at best--and bidders who offer the current \$525 want nothing but top quality. (Bourse table price tags, by the way, for truly MS-65 pieces are usually \$650 or more.)

DOLLARS: There's just no stopping the dollars! From low grade circ pieces--thru choice MS-65 singles--to rolls, prices have again advanced on a broad front. There are numerous sellers of dollars on the teletype circuits also--but they are well aware of the active market and they manage to keep price levels somewhat ahead of advancing bids. Check pages five and six for the latest gains!

PROOF SETS and MINT SETS: There is very little to report in this area. Several potential buyers are in the market for quantities of all issues from 1956 thru 1977-S; practically all are offering to pay "bid"--or just a bit higher (as for the '58 and '73-S sets). Mint sets are steady at current levels.

COMMEMORATIVES: Commem prices are mixed this week--with minus signs predominating. Two major sellers apparently still want to see lower prices in this area. Since there are also several buyers, the main factor limiting slaes still seems to be a question of grading. At least one bidder's extensive buying list carries the admonition "save us both postage and stop sending overgraded coins!"

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$152.00 per ounce.

THE COIN DEALER NEWSLETTER

represents the coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer to dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

\$10.00 per column inch, four consecutive ads (no change) 10% discount.
Advertising space is limited; ads will be placed in first possible edition.

P.O. BOX 2308

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-65 coins are choice fully struck specimens without detracting marks—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—these bring higher prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

ADVANCES AGAIN DOMINATE DOLLAR CHARTS Dealers Find BU Roll Sets Of All Series Very Elusive

The Market in Depth

ALLEN HARRIMAN

For yet another week silver dollars have dominated teletype trading. Lengthy buying lists appear day after day---and most bidders find that edging bid levels a bit higher doesn't produce many transactions. It appears that the majority of dealers' stocks are already drastically depleted---and that those dealers who more or less specialize in dollars are not particularly interested in selling at teletype bid levels. Much of the bourse table activity at recent shows has centered around dollars and the numerous dealers who "set up" at these events find that investors and collectors are usually willing to pay at least "ask" for properly graded dollars. In addition, over-the-counter sales are brisk---so instead of selling on the teletype circuits, most members are in the buying mood!

Another area in which teletype bidders are having a difficult time is BU roll sets. There are several dealers who regularly ask for roll sets from the 1934 or 1941-58 Lincolns thru the Franklin and Kennedy halves and Eisenhower dollars. But, as with silver dollars, most dealers who have this material obviously prefer to either "hold on" or to assemble single sets and sell on a retail basis. Generally, bids for complete roll sets are still slightly below the total of the bids for the individual rolls involved---and yet current buyers almost always specify "choice rolls only". Given this combination, it is not surprising that sales are quite limited. (Actually, "for sale" listings of BU roll sets have been extremely few and far between for at least a year now.)

Don't let the lack of plus signs in the type coin charts (page four) fool you! Even though potential buyers (especially of choice MS-65 specimens) are not raising bid levels, very few pieces appear on the teletype circuits---and those few which dealers feel are correctly graded disappear almost immediately if priced within reason. The fact is that most experienced teletype members have their list of those dealers whose grading they know they can depend upon---and those which they cannot. This simple distinction usually makes the difference whether a "choice MS-65" remains on a teletype selling list or whether it sells immediately. Anyone who attends coin shows can attest to the fact that the availability of strictly choice coins in virtually any series is very limited---and that price tags on this sort of material are well ahead of current bid levels. The most commonly heard complaint among dealers is probably that they can't find enough top quality merchandise to satisfy their client's needs. This, of course, is the reason that truly choice and gem coins often realize "runaway" prices at auction!

This Week's Market

CENTS: Gem MS-65+ pre-1934 Lincolns are in very strong demand---with a number of serious collectors asking their favorite dealers to find just the "right specimens" for them. Needless to say, these top quality coins are

seldom seen on the various teletype circuits and those few correctly graded pieces which do appear are sold almost immediately. The BU rolls are steady at last week's levels (with a quantity of 45-D's available now at a lower \$11.50).

NICKELS: One dealer is now offering to pay "\$50 + ?" for a single gem 1954-S nickel with "full steps"---with no sellers in sight! (Searching for this coin may well fall into the same category as looking for "full bands" 1945-P dimes.) There are numerous other Jeffersons which range from scarce to rare in this condition---and, at this point, there are only a few dealers and collectors who actively trying to locate them. Price changes in Jefferson rolls are minimal this week.

DIMES: There is currently at least one frequent teletype bidder who is willing to pay 10%-25% over the MONTHLY SUMMARY MS-65 price listings for most of the pre-1934 Mercuries in truly gem MS-65+ "full bands" condition. There are more and more "fussy customers" who are in the market for this type of material. (By the way, a few of the later dates such as 37-D, 38-D and 39-S are also beginning to be sought after as gem singles---along with the usual 34-36 Denver issues.) A couple of small losses have been noted for the lightly traded Roosevelts---but \$2850 bid for a BU roll set (1946-64) is still unsuccessful.

QUARTERS: Surprisingly little attention is being directed toward the 1932-40 Washingtons. There are, of course, buyers in this area---but dimes and halves from these years are enjoying a considerably more widespread demand. The 1941-64 rolls continue to appear on scattered "want lists"---prices are basically unchanged this week. As with the dimes, however, bidders find that complete roll sets are very difficult to pry loose; bid for the 1941-64 Washingtons is \$7200.

HALVES: There are numerous teletype dealers who want 1934-47 Walking Liberties---with many hopeful bidders asking for gem MS-65/better singles of even the lower priced issues which heretofore have usually been traded by the roll. This is due, at least in part, to the fact that even "original" BU rolls often contain coins with a few nicks or abrasions---and most collectors are looking for specimens that are nearly perfect!

DOLLARS: Potential buyers continue to push bid levels higher in their efforts to locate the dollars they need. Some dealers have tired of raising their offering prices to no avail and are now simply asking for "reasonable quotes" on the material they need. Interest covers all areas---from VG/better rolls thru gem prooflike singles; sales have remained moderate, however, since most sellers of properly graded coins are well aware of the current demand and are pricing their coins accordingly.

PROOF SETS and MINT SETS: Several dealers remain in the market for quantities of virtually all the lower priced proof sets---with one or two now adding quantities of the 1952-55 issues to their "want lists". Bid prices, however, are not being disturbed. The slight advance noted for the '64 set is due to strong interest in rolls of the proof halves (bid now \$58); these, of course, are for use in complete roll sets of Kennedy halves. (It is for this same reason that the 1965-67 "special mint sets" are wanted in quantity.)

COMMEMORATIVES: All of this week's numerous changes are on the plus side of the ledger. Sellers are outnumbered by buyers---and the next couple of weeks will tell if the expected advance in this area is about to begin. (At least one major dealer has altered his "buy-sell" list to a "buy" list only.)

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$153.65 per ounce.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices. "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

COMMEMS & ROLLS JOIN SILVER DOLLAR UPSWING

Low Grade Circ Dollars From Particular Years Wanted In Quantity

The Market in Depth

ALLEN HARRIMAN

Following last week's example, the silver commcm chart is again sporting an array of plus signs---with no losses! The two teletype dealers who often tend to dominate this area are both in a buying mood and this week's gains are a combination of their current extensive "want lists". For an interesting change, many of the higher bid levels are for various Arkansas, Boone, Oregon issues and for all of the BTW and W-C sets. So far, interest in the Texas issues remains within currently established bid-ask levels. (It should be noted that there are more than two commem buyers on the teletype circuits---however, virtually all of the others run shorter, more specific buy or sell lists---far less frequently.)

A quick glance at pages two and three will also show that price hikes have not been limited to only commems and dollars. The BU roll charts, too, are liberally peppered with gains---again with practically no losses. Advances are particularly widespread for the Lincolns, Jeffersons and pre-1950 Washingtons (including a number of the 1934-40 rolls)---with several Mercury and Roosevelt rolls also on the plus side of this week's ledger. In addition, the Walking Liberty halves are wanted by numerous dealers---but the majority of bidders in this area are asking for "quotes" rather than disturb present bid levels (since higher bids seldom get results anyway). The most quiet series this week is the Franklins---changes are minimal and with a bit of perseverance most issues can be located on today's teletype circuits.

Needless to point out, silver dollars are definitely still on the march! A minimum bid of \$138 is now in force for any pre-1921 Morgan roll---and the remaining issues which until recently were more or less considered "common dates" are enjoying strong bids from \$145 to as much as \$200---or even more. Take a careful look at page six!

A considerable amount of demand is being enjoyed by a number of low grade circulated dollars because of the year in which they were minted---not because of the mintmark and not necessarily due to a low mintage figure. These particular issues carry dates which are needed in quantity for "year sets"---and they have been reflecting higher bid levels in recent weeks for this reason. There are two Peace dollars which fall into this category---one is relatively scarce and the other is not. The former, of course, is the 1921 issue---which is already receiving quantity bids of \$15 in "full rims Good or better" condition; the latter is the 1928-S---which is needed for "year sets" simply because the '28 Philly issue is far too expensive for this purpose. The 28-S is bid at \$6 in Good/better condition while other similar or lower mintage Peace dollars such as 24-S, 25-S, 27-D, 34-D & S and 35-P & S remain at lower levels.

In the Morgan series, prominent among the "magic" years are 1893 and 1895. "Any" 1893 issue is now wanted at \$15 in the above described condition---even though the obtainable "P", "O" and "CC" issues vary considerably in mintage and availability (as is reflected by the bid recorded for the higher grades). Again, for the year 1895, the Philly issue is out of the question---and thus the two rather scarce branch mint issues are now bid at a minimum of \$18 in defect-free Good or better condition. Another interesting year in the Morgan series has recently come forward on "want lists"---with the "common" high mintage '03-P now asked for in quantity at \$6; both the "O" and "S" mints being more elusive. (The far lower mintage '04-P remains basically at a true common date level in low grade due to the easy availability of the New Orleans issue from that year.)

As time passes, interest will no doubt develop for other years as scarcities appear. Among the most likely Morgan candidates are 1892 and 1894---there are no large mintage issues from these years. In the Peace dollars, 1927, 1934 and

and 1935 will in all likelihood fall into this same category before too long.

This Week's Market

CENTS: In addition to continued strong demand for gem early specimens, the 1934-48 rolls are carrying a number of plus signs this week. It cannot be too strongly emphasized that only choice full MS-65/better rolls are wanted at these higher prices. As anyone who has handled a quantity of these earlier Lincoln issues can attest, there is a large percentage of rolls on the market which do not fulfill this requirement! By the way, one major buyer is still in the market for "original mint-sewn" bags of all the 1965-71 P-mints---and will now pay "ask plus shipping" for quality merchandisc.

NICKELS: The Jeffersons have also registered a rather substantial number of advances this week; many of these noted for issues which usually lead any major upswing in this series---47-S, 48-DS, 49-S, 51-S and 52-D for example. (Most, but not quite all, of these gains are the result of one major buyer's quantity bids---and several lots have been offered at these higher prices.)

DIMES: Among this week's gains for Mercury rolls are: 1934-P \$975, 1935-P \$375, 1936-P \$320, 1938-D \$900 (!), 1939-P \$235, 1942-D \$360, 1942-S \$410 and 1943-D \$165. (Virtually all of the other rolls are still wanted "at bid"---and future advances will almost certainly touch additional dates.) The big winner in the Roosevelt series this week is the again "suddenly scarce" 1948-D (now wanted in quantity at \$100)---with considerable interest also noted for both the 1947-D and 1951-D issues.

QUARTERS: A higher bid level of \$7300 for the BU 1941-64 Washington roll set is just as unsuccessful as previous bid levels have been! Additionally, this week's individual roll gains are perhaps the most numerous recorded in recent months---with nearly all of the 1943-49 issues wanted at higher prices (together with scattered earlier dates joined by the 51-S and 55-D). Single choice BU "short sets" (1941-64) are very few and far between at \$185 bid-\$200 ask and there are number of dealers who feel that this set may well be among the most attractive "sleepers" at present levels!

HALVES: As was mentioned in "The Market in Depth", the W.L. half dollar rolls have remained unchanged this week---not so much due to lack of interest as to the fact that most potential buyers have realized that pushing offering prices higher often has the opposite effect to the desired one of prying loose the needed rolls. It should be noted that the occasional roll which is listed for sale at "ask" usually disappears almost immediately. By the way, \$8500 is the new bid for a choice 1941-47 BU roll set---another unsuccessful bid!

DOLLARS: This week is another repeat of the last several---gains all over the place! Dealers continually attempt to top each other's bids---and many of the holders of these rolls and singles are enjoying sitting on the sidelines as prices advance. The 1925-P roll, by the way, was one of the most recommended issues in a new book entitled "Silver Dollar Fortune-Telling"---and, as a result, the bid for this suddenly "hot" issue is already already an impressive \$190 (up from the \$132.50 recorded at the beginning of September)!

PROOF SETS and MINT SETS: This still remains one of the most quiet areas of the market. There are a few bargain-hunters on the tapes---and a few others who are offering "bid" for fairly large quantities of the lower priced 1956 to date sets. The 1970 and 1971 "no-S" sets have edged higher---and the 1965-67 s.m.s. and 1971-72 mint sets have registered small advances.

COMMEMORATIVES: All of the week's changes are of a positive nature---see "The Market in Depth".

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$154.90 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES:

\$10.00 per column inch; four consecutive ads

(no changes) - 10% discount.

Advertising space is limited; ads will be placed in first possible edition.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

How Much Should A Dealer Pay A Collector For His Coins?

The quickest and easiest way to find out is by reading Coin Market every week in Numismatic News

Because Coin Market gives accurate reflections of the prevailing retail buy and sell coin prices. The Coin Market "buy" prices tell you what dealers around the country are paying collectors for the most popularly traded coins. Conversely, the Coin Market "sell" prices tell you what coins are currently selling for in dealer to collector transactions. And Numismatic News subscribers receive this service absolutely free every week as a part of their regular subscription.

An incredible amount of data supports every Coin Market report. Nationally recognized coin dealers on our panel of contributors supply the backbone information about the coin trading activity. Any significant changes in pricing activity are extracted

from advertised buy and sell prices. In addition, transactions over our on-premises teletype are monitored daily and supplemented by auction results as soon as they occur. All of this is combined by our Coin Market editor, Bob Wilhite, to give you the accurate and reliable Coin Market every week. Bob's experience as a collector and former coin dealer make him superbly qualified to put together this respected report.

Side by side coin price values show dealers and collectors alike what coins should trade for in transactions between the two sectors of the hobby. That's Coin Market! Read it every week in Numismatic News.

SILVER COMMEMS GATHER STEAM; DOLLARS CONTINUE ADVANCE "Mystery" Of 1977-P Halves & Dollars Deepens; '77 Mint Sets Trade At \$9

The Market in Depth

ALLEN HARRIMAN

Not surprisingly, the market continues to be dominated by the extremely strong demand for silver dollars—with the silver commemoratives beginning to corner a respectable share of the plus signs. The BU roll market has been limited this week to only a few minor changes (in both directions)—yet interest remains high for such series as the Mercuries, Walking Liberties and, to some extent, the pre-1950 Washingtons.

Several subscribers have written to ask why the differences between bid levels for MS-60 and MS-65 dollars do not reflect more of a standard percentage. The answer, at first thought, appears to be a simple one. But when actually expressing the reasons, the explanation becomes a bit more involved! For those issues which are generally found fully struck, the price difference between the two grades is usually smaller and is mostly based upon the condition of the coin's surface. In other words, an 1880-S dollar in the MS-60 category is usually as well struck as the choice MS-65 or even the gem MS-65+ specimen—but it is relegated to the lower grade because of bag marks and/or abrasions.

However, when an issue such as 1892-O is being considered, strike has considerably more to do with determining which category a specimen falls into—and with the major price difference between the MS-60 and the MS-65 coin (not to mention the rare MS-65+ gem). The vast majority of 92-O's were weakly struck—even though a percentage of these weak strikes may be virtually free of marks. This is where grading becomes crucial and, in addition, somewhat subjective. Where does a fully struck 92-O with an average (or even more than average) number of marks and abrasions fall on the price scale? Collectors generally try to locate fully struck dollars—and the 1892-O (among numerous other issues) is rarely encountered in this condition. Will a collector settle for a fully struck 92-O with a number of marks—or would he rather have a weakly struck piece which is free of marks? And how much will he pay for either? This final question is why the word "subjective" was used earlier. The answer lies, most likely, somewhere between the MS-60 bid of \$53 and the MS-65 bid of \$275—and "in the eye of the beholder"!

In general, therefore, it can be stated that the weaker struck issues (all of the 1886-97 O-mints, for instance) will show a considerably greater spread between the MS-60 and MS-65 price listings—and that normally well struck dates will reflect the smallest.

It is interesting to note that the bid for 1977 mint sets has jumped substantially this week—to \$8.75—with a few changing hands around the \$9 mark! Since there is only \$3.82 face value in each set, this rather impressive bid level is obviously aimed at the still "mysterious" 1977-P Kennedy half and Eisenhower dollar—both of which have yet to reach general circulation channels. Issue price, by the way, for the 1977 mint sets was raised to \$7 this year—and all of the other coins involved are now available by the roll for a nominal premium. The latest available "mint report" indicates that slightly over fifty-eight million halves and just over twenty-five million dollars were minted during the first seven months of this year—but production figures for individual minting facilities will "not be available until the end of the calendar year"! However, a call to the Philadelphia Mint netted the information that thru June 10, 974,000 halves and 3,006,000 dollars had been minted at Philadelphia. The spokesperson also stated that the fact that neither coin seems to have reached circulation was due to "lack of demand at the Federal Reserve level". It was also added that "souvenir sets" are currently available thru over-the-counter-sales (only at the Mint) for \$3.00—and that these sets contain the cent to half dollar (but no dollar).

It might be noted that there are several private theories floating about among dealers regarding the unusually late release of these two coins. One of the most interesting was recently expressed by an active teletype member. His opinion is that both the 77-P halves and dollars will "suddenly" appear in circulation after the cut-off date (October 31) for ordering '77 mint sets! There are others, of course, who are banking on just the opposite—expecting (or hoping) that the '77 set will fall into a similar category as the '70 and '73 sets. However, it appears

that anyone who visits the Philadelphia Mint can already buy at least the half dollar in his "souvenir set"—and, the Mint has "no limit" to the number of these sets which can be purchased. (By the way, the January to June total number of P-mint dollars produced does seem interestingly close to the possibly anticipated number of mint set orders!)

This Week's Market

CENTS: Interest in Lincoln rolls continues at a moderate pace. There are one or two buyers who will currently pay "ask" (or even more, in some cases) for gem rolls—particularly of the pre-1941 issues. However, these buying requests state that "all fifty coins must be gem MS-65+"—and this is a very tall order for virtually any Lincoln roll! An example is the \$200 now being offered for a 1935-S roll which fits this description (a rarely seen roll in this condition).

NICKELS: Only minor changes in the Jefferson series have been noted this week—and the 1934-38 Buffalo issues are entirely undisturbed in spite of the fact that very few rolls are being listed for sale. The occasional roll offered is usually 37-P or 38-D—and these are steady in the \$255-\$275 range.

DIMES: Demand for all Mercury dimes continues unabated. The pre-1934 singles are all regularly listed on the extensive "want lists" of numerous dealers—with bids ranging from perhaps ten-percent below the MONTHLY SUMMARY levels for choice MS-65 "full bands" pieces to as much as 15%-25% over current levels for "gem MS-65+" specimens which exhibit not only split but "fully rounded split bands"! The 1934-45 rolls, of course, remain quite strong—with a few scattered increases registered.

QUARTERS: Some of the lower priced P-mint Washington rolls are carrying additional plus signs this week—and moderate interest in most of the pre-1950 rolls is still evident on the various teletype circuits. Those dealers who want "gem MS-65+" pre-1941 mint-marked singles are finding most dates rather elusive in this ultimate condition; for example, teletype requests for "quotes" on true gem 32-D's seldom even receive an answer! (In addition, there seems to be enough "uncirculated" 32-S's to go around—but very few which can be accurately described as "gem".)

HALVES: Several dealers are now offering to sell the later common date Franklin rolls at slightly lower prices—and, in general, buyers are a bit more conservative with their bids. The earlier dates are basically unchanged—with small losses recorded by 48-D and 56-P. Buying interest in the Walking Liberty "short set" (1941-47) seems to be centered around those difficult to locate fully struck S-mints—and most bidders would apparently be pleased with just a few singles.

DOLLARS: Silver dollars continue to dominate the trading scene! The minimum bid for "any pre-1921" roll is now pegged at \$141.50—with very few dates listed below the \$150 mark. Multi-bag quantities are in demand! Gains are once again impressively scattered across both the Morgan and Peace charts; those interested in this area should thoroughly examine page six! (By the way, the "hot" 1925-P roll is now receiving quantity bids of \$225!)

PROOF SETS and MINT SETS: A few small advances can be found this week for some of the lower priced proof sets—mainly the result of three or four bidders who are asking for fifty to one hundred of most dates after 1955. The 1977 mint set is enjoying rather high bids—see "The Market in Depth"

COMMEMORATIVES: The not unexpected upward swing in bid levels for the silver issues is gathering steam! Plus signs are quite liberally in force across the entire 144-piece series—including a majority of the various PDS sets. In contrast, two major commemo dealers are still lowering sell prices for the gold issues—and, thus, it appears that the "bottom" for this eleven-piece set has yet to be reached. It should be mentioned that "fussy" buyers are still willing to pay "ask" or more for the "right" gold commems!

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$168.20 per ounce.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

STRONG GAINS REGISTERED BY SILVER COMMEMS Dollar Market Remains Frantic—Prices Advance On A Daily Basis

The Market in Depth

ALLEN HARRIMAN

This week's teletype activity has been more or less a carbon copy of last week---only with higher bid prices! Silver dollars are now definitely being challenged by the silver commems as the leaders in the race for plus signs---and this week, a multitude of gains have been registered in both areas. In fact, practically all of the commems are bid at substantially higher prices in both MS-60 and MS-65 condition---with the MS-60 pieces, in general, recording larger advances than the MS-65's! Needless to say, the dollar charts are once again peppered with gains as dealers try to top each other's bids on a daily basis!

The higher bid---now \$3000---for complete choice MS-65 Peace dollar sets remains entirely unsuccessful. Actually, determining a "reasonable" bid for this set poses something of a problem for the potential buyer---even though a complete set would seem relatively easy to assemble. The price of any complete set, of course, must be decided on an individual basis---each coin should be examined and evaluated to arrive at an accurate value. The Peace dollar set contains two coins which are "stoppers"---and at least three others which, because of strike, can vary the price of a set considerably. The first two are the 1921-P and the 1934-S. It seems that most "choice" sets usually contain these two dates in MS-60+ condition (at best)---the 21-P being so rated because of strike and the 34-S often so rated because of marks, abrasions and perhaps a "hint" of frietion (in addition to strike). The other three dates which seldom fall into the "strictly MS-65" category are 24-S, 25-S and 28-S---again usually because of strike. So, quite often a complete set which may be considered "choice" by the seller may not be so evaluated by the buyer. It might be added that an occasional bid as high as \$3400 has been noted for strictly choice MS-65 or better sets of Peace dollars---sets which contain all of the above mentioned five issues (as well, of course, as all others) in fully struck and as nearly mark-free condition as possible. Finding such a set is rarely accomplished!

Two teletype dealers are regularly asking for Hawaiian coins in quantity---and several others need a few specimens now and then. The following are the highest bids currently being monitored; they result in an occasional sale of lower grade coins---but they rarely pry loose higher grade pieces (except for the quarter---which is the most "common" Hawaiian coin).

	VG	Fine	VF	XF	AU	MS-65
1847 cent	\$ 55	\$ 78	\$ 98	\$120	\$180	\$385
1883 dime	7	10	20	75	180	475
1883 quarter	9	12	16	25	35	80
1883 half	20	25	35	65	130	425
1883 dollar	80	100	115	180	500	1450

The 1881 five-cent piece and the 1883 eighth-dollar (12½¢) are patterns---and they are very seldom seen except on major bourse table displays or at important auctions. (Hawaiian coins are listed on page 250 of the Redbook---for those readers who would like to compare present bid levels with the most recent catalog listings.)

This Week's Market

CENTS: Buying attempts in this area continue to concentrate on the pre-1934 issues. As usual, several dealers are looking for "gem MS-65+" specimens of all the early dates ---but now, in addition, some attention is being focused upon many of the scarce mint-marked issues in "choice brown unc" and even in defect-free XF/AU condition. Bid for "choice original rolls" of the 1972/72 double die are unsuccessful at \$5600; both the 1960-P and 1970-S "small date" rolls have registered small advances.

NICKELS: A number of Jefferson rolls have recorded small losses this week; most buyers are occupied with other areas of the market. (There is some "below market" bargain-hunting noted---but the prices being offered are not very exciting.) Numerous potential buyers are finding that the pre-1897 Liberty nickels remain quite elusive in strong Fine or better condition; it is apparent that bid prices will have to advance to higher levels in order to encourage transactions.

DIMES: The lack of plus signs for the 1934-45 Mercury rolls is definitely not a sign that interest is on the wane. Actually, the opposite is true---but, in general, bidders are hesitant to continually raise bid levels without prying loose the rolls and singles they need. By the way, it should be emphasized that two or three major buyers of the earlier Mercury singles will pay prices considerably ahead of enclosed MONTHLY SUMMARY MS-65 bid levels for "strictly gem MS-65+ specimens with fully rounded bands." Coins of this ultimate quality, of course, are very few and far between and even a few "fussy customers" can create a "want list" backlog!

QUARTERS: The 1941-64 BU roll set bid has moved ahead once again---with offers to pay \$7400 meeting with no success. Several individual rolls in the '35 - '48 range show gains this week---while a few small losses are noted for scattered issues in the '50-'55 group. Locating quantities of the 1916-24 Standing Liberty quarters in "full date" G/VG thru VF or XF condition is not a simple project for the several teletype dealers who are attempting this feat.

HALVES: Gains in the Walking Liberty series include: 1935-P and 1937-P---both now bid at \$500; 1936-P wanted at \$450; 1947-P & D in demand at \$530 and \$450 respectively. In addition, dealers are very interested in virtually all of the "short set" issues (1941-47)---but, as with the Mercuries, they prefer to stick to current bid levels trying to locate the dates they need for their clients or for store stock. Changes remain minimal for the relatively quiet Franklin series; common date rolls have moved back to \$40 bid---with "original bags" wanted at \$4100.

DOLLARS: Dealers are scrambling over one another in their attempts to be the highest bidders for silver dollars! Every date in both series is enjoying demand to some extent---with anxious bidders asking for MS-60, MS-65 and "truly gem MS-65+" singles as well as rolls and bags. The minimum bid for any pre-1921 Morgan roll has now advanced to \$145 (for 1883, 84, 85-O & 1904-O) and \$147 for 1885, 86 & 87-P; the remainder of the "common date" rolls are now bid in the \$160 - \$180 range! (Check page six for the extensive changes on the scarce and rare singles.)

PROOF SETS AND MINT SETS: Small gains---and quantity bids---have been recorded for all of the 1956-68 issues (including the 1965-67 "special mint sets"). In line with last week's interest, bid for the 1977 mint set has now advanced to \$9.25---with a few sales noted around \$9.50 - \$9.75. (Still no rolls of 1977-P halves or dollars have appeared on the market!)

COMMEMORATIVES: A record number of substantial gains have been registered this week as the two major commem dealers "battle it out" on the various teletype circuits---take a thorough look at page two!

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$158.40 per ounce.

BU ROLLS

- Ref. to "Early Singles" above

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices. "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

SILVER DOLLARS STILL TOP TELETYPE ACTIVITY Silver Commems Register Further Gains; Washingtons Lead BU Roll Market

The Market in Depth

ALLEN HARRIMAN

This week's advance for the silver commemoratives are as extensive as they were last week. With scattered exceptions, plus signs thoroughly cover both the MS-60 and MS-65 columns. It should be explained that the majority of the bidding in this area is being done by two major commem dealers (with a few others expressing their needs for specific issues). These two strong buyers, by the way, are the same dealers who were lowering ask prices across the board only a few weeks ago. This "cyclical" action in commems is not new---and, actually, similar past cycles have usually been the result of two or three dealers strong buying attempts or extensive selling campaigns. This is in contrast, for example, to the current widespread buying interest for silver dollars---a market which virtually every teletype dealer is involved in to at least some extent.

And while on the subject of the still extremely "hot" dollar market, a discussion of bids for "choice MS-65" singles in comparison for the bids registered for BU rolls might be in order. First, the notation at the beginning of the page six dollar chart should be read. With now only relatively few exceptions, there are no bids reported for the scarce higher priced rolls. Many have been eliminated over the last few years as roll offerings have dwindled considerably---and as roll buyers have become more and more quality conscious. As explained on page six, values for scarce and rare date rolls must now be figured on the basis on the individual coins involved. The price, obviously, can therefore vary considerably.

Generally, the greater the difference between the MS-60 and MS-65 single bid level, the more difficult it is to determine a price for an entire roll. For usually well-struck issues (such as many of the CC dates, the later O-mints, etc.) the roll bid will be quite close to "twenty times the MS-65 single bid"---choice rolls of these issues are relatively easy to locate. When dealing, however, with such coins as the 1889-92 New Orleans issues, the value of even an "original" roll can vary greatly. For instance, an occasional roll of 92-O's is offered for sale---but the many potential buyers who are interested must see each coin to decide whether it is a \$1200 roll or a \$6000 roll (or, more likely, somewhere between.) The same price variations, of course, exist for the more frequently encountered 1889-O, 1890-O and 1891-O rolls.

These two examples are more or less the two extremes. There are numerous issues in both the Morgan and Peace series which still can be located in choice condition by the roll---but, as time passes and demand increases, the nicer rolls tend to be broken up for "single sales"; the extant rolls, as a result, tend to become less and less desirable. (It is also evident that many rolls have had the choicest specimens replaced with pieces more in the MS-60+ category.) Actually, the vast majority of BU roll trading is now concentrated on "common dates" which are priced in the \$145-\$235 range---with an occasionally noted offering of the higher priced 1878 issues, 79-O & 80-O, the 1882-84 Carson City rolls, the 1921-D & S, 1922-D & S, 1923-D & S and a few others. (The 1921-23 branch mint rolls, by the way, can vary considerably in quality---and truly choice rolls are now quite few and far between.)

This Week's Market

CENTS: Locating even a few strictly gem "common date" Indians isn't as simple as the current reasonable (and slightly higher) bid of \$42.50 might indicate. A majority of the extant specimens---even from original rolls---seem to have problems of one sort or another. Bidding continues for the 1972/72 Lincoln---with choice rolls now wanted at \$5700 (or \$114 per coin).

NICKELS: In addition to higher grade circulated Liberty nickels, several teletype dealers are beginning to run frequent buying lists for most of the 1913-28 mintmarked Buffalos---usually asking for grades from "strong Fine" thru "full XF". (Bidders ask for quantities---but only a few singles are usually located.) The BU roll market continues to take a back seat to activity elsewhere; prices remain virtually unchanged for both the Buffalos and Jeffersons.

DIMES: As with the nickels, BU roll trading in this area is minimal---particularly for the Roosevelts. (Oddly, however, the present bid of \$2850 for BU roll sets very seldom receives a response.) The 1955-P roll, by the way, has been experiencing some expected profit-taking after its recent meteoric rise---rolls are now available at \$40 (or perhaps a bit less in quantity). Interest, of course, is still very strong for the Mercuries---for choice and gem early singles and both singles and rolls in the 1934-45 group. The few sellers encountered are still keeping price tags somewhat ahead of the advancing market.

QUARTERS: The elusive 1939-D roll has jumped to \$700 this week (up \$40)---and, again, a number of issues in the 1943-48 range have registered gains. Since potential buyers find the 1941-64 BU roll set so difficult to locate, several are apparently assembling their own---roll by roll. It should be noted that interest in the relatively scarce 1949-P roll (at the current \$335 bid) is quite evident---with quantities wanted at this level. Those two "toughies"---the 1916 and the 1918/17 Standing Liberties---remain very elusive; several dealers will take specimens "in any defect-free grade".

HALVES: Further gains have been recorded by the scarce 1935-P and 1937-P rolls (both are now wanted at \$525) and the very popular 1947-P is up again---at \$545 bid. Bidders continue to ask for the remainder of the 1934-47 dates---usually asking for "gem fully struck" singles. (Sales remain quite scattered.) Several teletype buyers continue to ask for the earlier Walking Liberties in VF and XF condition---and these seem to be just the grades which are missing from the stocks of most dealers. No price changes have been noted this week for the surprisingly quiet Franklin series.

DOLLARS: The rush to buy continues unabated! Numerous bidders run frequent and lengthy "want lists" for MS-60, MS-65 (and gem MS-65+) singles---as well as rolls. These anxious buyers keep an eye on each other's bid levels---and they usually attempt to offer "just a bit more". There are, in addition, a number of sellers---and all are well aware of current demand. Ask prices---especially for the better singles---are as "strong as the market". The 1922-P and 1923-P Peace dollar rolls are now bid at \$110---with "choice original bags" wanted for as much as \$5700 (or \$114 per roll). A few gains have been registered by the rather quiet Eisenhowers---see page six.

PROOF SETS and MINT SETS: The 1976-S and 1977-S sets are a bit more active this week---small gains have been noted for both. Also on the plus side are 1964 (wanted in quantity at \$4.50), 1968-S and 1969-S. The 1970 and 1971 "S-less" sets are again on the buying list of one major buyer---with bid levels being edged a bit higher again this week. (Quotes are also requested for the rare 1968-S set with the "Philly" dime.) The 1977 mint set is now in a slightly advanced \$9.50-\$10.50 range; buying this set is still the only way to get both the 77-P half and dollar.

COMMEMORATIVES: The silver issues continue their rapid upward flight---see "The Market in Depth" for details.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$162.55 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES:

\$10.00 per column inch, four consecutive ads

(no changes) - 10% discount

Advertising space is limited, ads will be placed in first possible edition.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

TYPE COINS FINALLY JOIN ACTIVE MARKET

Dollars And Silver Commems Continue To Register Advances

The Market in Depth

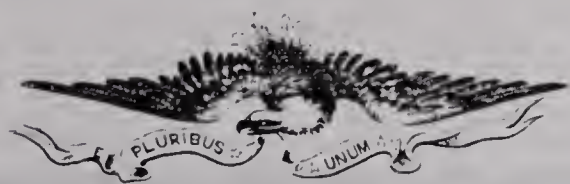

ALLEN HARRIMAN

A major and welcome change this week is the sudden rash of plus signs for MS-65 "type". Readers will note that bid prices have advanced rather substantially for a number of the issues listed in the page four chart! As most subscribers know, teletype bidding in this area of the market "peaked" about a year ago---and prices have remained virtually unchanged during most of 1977. Those dealers who have needed strictly choice material during the past several months have found very few pieces available on the teletype circuits---but, with a few exceptions, most potential buyers have been reluctant to disturb the bid-ask levels which have been in effect for a relatively long time now. This week things have changed noticeably!

It must be stated at the outset that this week's gains are all the result of the concerted effort of a single major teletype buyer's attempts to locate a rather lengthy list of type coins in quantity. Many of the earlier "high-powered" types are not included on these current buying lists---however, sales thus far have been extremely limited even for those issues which have enjoyed the largest gains. All indications point to continuing advances in this area---adding "type" to the very active market which has been steaming ahead for silver dollars and, more recently, for the silver commems. (It might be mentioned here that the gold commems also may be poised for an upward move in the near future. Dealer stocks of strictly choice specimens are definitely limited---and "want lists" are becoming more frequent and extensive.)

It should be stressed that during the past year long "lull" in teletype bidding, choice and gem type coins have certainly not been out of favor at auction or over convention bourse tables. Properly graded top quality pieces have continued to bring impressive prices throughout 1977 even though the majority of teletype activity has been concentrated elsewhere. (As a matter of fact, some of the same dealers who have been sticking to established bid-ask levels with their teletype bidding have been paying prices well in advance of these levels for choice specimens at auction. Collectors and investors, as a result, have very often found that they must pay 20%-50% over "ask" at auction when the "right" coins come along!)

An interesting footnote to this most recent round of increases for type coins is the fact that current buying lists include a bid range for the seldom encountered "gem MS-65+" coin---and this price range is substantially higher than the newly advanced bids for strictly choice MS-65 pieces! Admittedly, of course, true gems rarely reach the teletype circuits. It should also be emphatically added that bids are for strictly graded material only. This, of course, is in line with the overall quality-conscious market which has become more and more evident during the past two years or so. A careful check of the page four chart should be in order for those interested in this segment of the market. The current bid levels could well represent the starting point for a very interesting and volatile type coin market in the coming months!

This Week's Market

CENTS: One hopeful bidder is finding that locating even a single gem roll of 1935-S Lincolns is quite a project---and his offer to pay "\$50 over bid" for fifty gem specimens has been entirely unsuccessful. The 35-S roll---along with the 34-D---are actually the only two issues in the '34 to date "short set" which are truly difficult to locate in this ultimate condition. Bid for choice original rolls of the 1972, 72 double die have edged higher again this week---to \$5750---or \$115 per coin (with "average BU's" now bid at \$108 and "cleaned, spotted or fingerprinted" pieces wanted at \$100).

NICKELS: A few of the often "popular" Jefferson dates are on the buying list of one major dealer---and all at higher levels. From one to as many as twenty rolls are wanted. These issues (47-S, 48-S, 49-S, 50-P, 51-S) are among those rolls which in the past have recorded substantial advances when the Jefferson series has been "in favor". Frequent buying lists for Fine and better 1883 (WC)-1896 Liberty nickels (as well as the "key" 1885 and 1886 in "any grade") continue to meet with very limited success.

DIMES: Scattered gains are noted for a few of the Mercury rolls this week---but most bidders seem to have decided to "hold the line" at present levels for the time being. (After all, it is often easier to buy when prices are not advancing week after week.) All dates in the 1916-45 series are still being anxiously sought after, however---and very few top quality rolls or singles are being located on the various teletype circuits. The Roosevelt series remains extremely quiet; a minimal amount of trading is noted---all within current bid-ask ranges.

QUARTERS: As suspected, the 1949-P roll has suddenly "come to life". This late date "key" roll was on buying lists "at bid" for several weeks without results---and now at least two bidders will take quantities at a higher \$350 (with evidence that they are willing to pay "a bit more" if several rolls are located). Interest in the remainder of the 1941-50 rolls is still moderate in spite of the fact that two issues (46-D and 48-P) have registered a little profit-taking. The "popular" 55-D roll can't seem to "get off the ground"---it is again pegged in a lower \$88-\$92 range.

HALVES: The 1935-P and 1937-P Walking Liberty continue their forward march---with both bid at \$540 this week. These two rolls (in addition to the 1934-P) are considerably more elusive than the higher priced and somewhat "promoted" 1939-P & D. This doesn't mean that the 39-P & D are overpriced---only that the 34-P, 35-P and 37-P rolls still have some catching up to do. (The 36-P, for some reason, is the most easily located pre-1940 roll.) That late date "key"---the 1974-P---is up again with a record-breaking (and still unsuccessful bid) of \$565! The Franklin series remains quiet with a minimum of changes recorded.

DOLLARS: Plus signs continue to dominate the dollar charts. Bidding, however, appears to be somewhat less "frantic" than during recent weeks. Bag quantities of BU common date Morgan and Peace issues are wanted at slightly higher levels---and, of course, the more scarce and rare singles continue to advance unabated. See page six!

PROOF SETS and MINT SETS: The lower priced early sets (1940-42) have all added a few dollars to bid levels---choice, defect-free sets are not as easy to locate in quantity as current nominal prices might indicate. In addition, small gains have been registered by all of the regular 1956-63 issues---along with the expected weekly gains for the two "S-less" sets (which are again enjoying the "upswing" portion of their frequently cyclical price structure).

COMMEMORATIVES: Prices continue to move ahead for the silver issues---but perhaps in a slightly more orderly manner. It is interesting to note that the "MS-60 bid" for many issues is closing the gap between the MS-60 and MS-65 price---with "overlaps" appearing for such issues as the Arkansas, Boone and Oregon type issues. The eleven gold commems might bear watching---see the comment in "The Market in Depth" column.

U.S. GOLD (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$162.00 per ounce.

BU ROLLS

Refer to "Buyer's Guide" page

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices. "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

SILVER DOLLARS SOAR TO NEW LEVELS Type Coins Register Further Gains; Silver Commems Continue Advance

The Market in Depth

ALLEN HARRIMAN

"Type" continues to challenge both silver dollars and silver commemoratives for the "most active" award of the week. Further gains have again been recorded for most of the issues which suddenly awakened last week--and, even so, the resulting sales have been minimal to say the least! As pointed out last week, the current major bidder in this area is very quality-conscious--as well he may be considering the higher prices being offered. The fact seems to be that the many teletype dealers who read these frequent buying requests simply do not have this choice material in stock--or, if they do, it is being sold thru channels other than the teletype circuits. Actually, these higher bid levels do more to increase prices at the retail level (bourse table sales, auctions, etc.) than to produce teletype transactions!

Silver dollars, by the way, have more than adequately met the type coin challenge--having registered even more advances this week than last! Dollars still remain the undisputed champions of the entire coin market--with plus signs covering well over half of all the Morgan and Peace issues this week. From MS-60 singles thru BU rolls (with the usual emphasis on Choice MS-65 or better singles) the bidding war continues unabated. Practically as soon as one "want list" appears with higher buying prices, another comes along offering to pay even more--especially for the dates which are truly scarce (or rare) in the very top condition. The "common dates", however, are certainly not being ignored--rolls as well as bag quantities of any date are wanted by numerous anxious bidders.

It should be mentioned that there is an additional school of thought regarding buying in today's market--one that is not widely held--but one that has proven quite effective in the past. This is the philosophy of buying material which is out-of-favor at the time of purchase. There are at least a few buyers in such series as Jeffersons, the late Buffalo rolls, Roosevelts, proof sets, etc. who currently have the opportunity to be "fussy customers" and to put away the best quality available at little or no premium. Buying in a relatively "dead" area of the market, of course, isn't very exciting--but sometime in the future those who have managed to put away a quantity of "full steps" Jeffersons, for instance, will be in command of the situation when the general attention is turned in their direction. When will this be, naturally, is the question which keeps serious buyers to a minimum in this or any other quiet area of the market.

The 1977-P halves and dollars continue to elude all bidders--with none yet having been released into circulation. The cut-off date (Oct. 31) for ordering '77 mint sets has passed and those who expected these two dates to appear in circulation immediately after this date are still waiting. So far, then, the only way to get the 77-P dollar is from a mint set. (Bid for rolls is now \$40--with one dealer already having offered as much as \$50 for a single roll!) The "souvenir sets" which are available over-the-counter at the Philadelphia mint only (for \$3) contain the 77-P half--but not the dollar. Buying the half in the manner, however, costs the purchaser \$2.59 each (of one figures the cent thru quarter at face value)--which is even more than dealers are currently willing to pay for the dollar. (The 77-P half dollar roll, by the way, is now unsuccessfully bid at \$20.)

This Week's Market

CENTS: The 1965-71 P-mint rolls are still wanted in quantity and at least one bidder will pay "ask" for original mint-sewn bags--choice coins only, of course. Occasional requests for scattered dates from 1934 thru 1958 are noted--with the potential buyers often willing to pay "mid bid-ask" for "choice rolls suitable for single sales". The 1972/72 is still wanted; bid for this tough roll is now \$5800 (or \$116 per coin).

NICKELS: Further nominal gains have been noted for a few Jefferson rolls--although the series, in general, remains more or less in the doldrums. It should be noted, however, that in addition to the higher bid levels noted this week for 47-S, 48-S, 49-S and 50-P, a few dealers are interested in the eleven wartime issues--asking for both roll sets and the individual rolls "at bid". "Type" gains include advances for Bust and "no drapery" half dimes (both now bid at \$550), "stars obv." and "legend obv." half dimes (now bid at \$400 and \$275 respectively).

DIMES: The following Roosevelt rolls are appearing regularly on the "want list" of one major teletype buyer--and requests are for "up to twenty choice rolls": 1947-D \$63, 1948-D \$112 and 1951-D \$28.50. In general, however, (as for the above mentioned Jeffersons) this series is presently more or less overlooked in favor of other areas of the market which are currently much more volatile. (See comments in "The Market in Depth" column.) Most of the "type" dimes are again enjoying bidder attention--with advances registered this week for the 1853-55 "arrows" issues (now bid at an impressive \$725), the "legend obv." issues (at \$250) and Barbers (at \$160)--all in strictly Choice MS-65 condition, of course.

QUARTERS: The relatively low mintage 1949-P Washington roll has posted a substantial \$30 jump this week--to \$380 bid--with quantities wanted by several bidders. Other gainers include: 1937-P \$710, 1941-S \$380, 1943-P \$105, 1945-P \$92, 1947-D \$110 and 1948-D \$90. The current bid of \$7400 has still failed to produce the desired results. (The total of the bids for the sixty-one individual rolls in the 1941-64 set is \$7685 this week.) See page four the numerous gains recorded by MS-65 type coins.

HALVES: Bid levels have remained virtually unchanged this week for both the Walking Liberty and Franklin rolls--with an advance (to \$700 bid) noted for the scarce 1934-P and a small loss (to \$113 ask) for the not-so-scarce 1955-P. Gains for properly graded Choice MS-65 type halves are numerous: Bust \$675, Bust (reeded edge) \$1400, S.L. (no motto) \$650, the "with motto" version \$500 and Barbers \$535. Indications point toward further advances in this area in the coming weeks.

DOLLARS: A quick glance at the page six dollar charts will show that the MS-60 singles are not being totally ignored in favor of the strictly MS-65 specimens. In fact, this weeks gains for "60" coins are quite numerous as several dealers raise bid levels in this category. In addition advances have again been very substantial for choice singles in both series--a thorough examination of the charts might be in order.

PROOF SETS and MINT SETS: The two "S-less" sets are still on the move--with one regular bidder now offering to pay \$455 for the 1970 set and \$750 for the 1971 version. ("Quotes" are also being requested for the seldom seen 1968-S set with the "Philly" dime.) Except for very minor losses reported by the 1957-59 sets, prices for most of the regular issues are unchanged--and actual trading remains light. The 1977 mint set is still in demand at \$9.50; this is still the only way to get a 1977-P Ike dollar (see "The Market in Depth regarding the 77-P half dollar).

COMMEMORATIVES: Once again numerous silver issues have recorded gains in both MS-60 and MS-65 condition. The majority of these gains continue to be the result of a couple of major commem dealers' buying attempts--but several other bidders occasionally run less extensive "want lists" and a few of this week's gains have been found on these more abbreviated lists. Dealers stocks of the gold commems continue to dwindle--but, so far, bid levels are undisturbed.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$167.05 per ounce.

THE COIN DEALER NEWSLETTER

results the idea of a clearing market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad "formal" sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE the prices in the Newsletter are firm dealer to dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

\$10.00 per column inch, four consecutive ads
(no changes) 10% discount.

Advertising space is limited, ads will be placed in first possible edition.

the COIN DEALER newsletter

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-65 coins are choice fully struck specimens without detracting marks—they may be brilliant or have original toning.

BU ROLLS

- Refer to "Early Singles" above

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices. "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

TYPE COIN ADVANCE CONTINUES TO GATHER STEAM Silver Dollars Remain Very Strong; Roosevelts & Washingtons Register Gains

The Market in Depth

ALLEN HARRIMAN

A substantial number of gains have been registered for Choice MS-65 type coins for a third week in a row--and, thus far, these advancing bid levels have not yet resulted in very many actual sales of properly graded coins. As was mentioned a couple of weeks ago when this latest round of gains began, the major teletype bidder in this area (in addition to bidding for MS-65 specimens) is asking for "Gem MS-65+" coins--and this buying request is accompanied by a bid range for such rarely encountered "ultimate quality" material. The following is a complete listing of the price ranges for all of the silver type issues which are currently appearing on these important teletype "want lists":

Three-cent Silver (type I & III) -----	\$ 375 - \$ 425
Three-cent Silver (type II) -----	800 - 1000
Bust half-dime -----	650 - 850
Seated Liberty half dimes:	
(no stars) -----	1000 - 1200
(no drapery) -----	650 - 800
(stars obverse) -----	500 - 700
(arrows) -----	600 - 800
(legend obverse) -----	400 - 500
Bust dime (large size) -----	2000 - 2500
Bust dime (reduced size) -----	1400 - 1700
Seated Liberty dimes:	
(no stars) -----	2000 - 2500
(no drapery) -----	750 - 950
(stars obverse) -----	750 - 950
(arrows, 1853-55) -----	1000 - 1250
(legend obverse) -----	325 - 400
(arrows, 1873-74) -----	900 - 1200
Barber dime -----	200 - 300
Twenty-cent piece -----	1200 - 1500
Bust quarter (large size) -----	3000 - 4000
Bust quarter (reduced size) -----	1800 - 2200
Seated Liberty quarters:	
(no drapery) -----	6000 - plus
(no motto) -----	800 - 1000
(arrows & rays) -----	3000 - 4000
(arrows, 1853-55) -----	1300 - 1600
(with motto) -----	550 - 750
(arrows, 1873-74) -----	1100 - 1400
Barber quarter -----	350 - 550
Standing Liberty quarter - full head (type I) -----	325 - 400
Standing Liberty quarter - full head (type II) -----	300 - 375
Bust half dollar -----	1200 - 1500
Bust half dollar (reeded edge) -----	2000 - 3000
Seated Liberty half dollars:	
(no drapery) -----	9000 - plus
(no motto) -----	900 - 1200
(arrows & rays) -----	5000 - plus
(arrows, 1854-55) -----	1400 - 1700
(with motto) -----	600 - 800
(arrows, 1873-74) -----	1800 - 2200
Barber half dollar -----	700 - 1000
Seated Liberty dollar (both types) -----	1400 - 2000
Trade dollar -----	1000 - 1500

A spokesman for the firm which is actively seeking quantities of these gem coins explained that bid ranges (rather than specific prices) were being used because specimens of this quality "speak for themselves individually"--and, therefore, the price determination within these ranges is based upon "how close to

full MS-70 the piece may be". It must be emphasized that only true gems qualify for this consideration! The bidder may well be considered a very strict grader--and not many coins actually fall into the "Gem MS-65+" category. HOWEVER, for the pieces which do, these prices will be paid! It should be added that astute collectors as well as investors have been paying prices within the above ranges (and often even higher) for true gems at auction or over bourse tables for some time now. The CDN will continue to keep subscribers appraised on these important bid levels as and when changes occur. In addition, next week's issue will include this same serious buyer's bid ranges for gem type gold coins.

This Week's Market

CENTS: The BU Lincoln rolls have remained virtually unchanged (in very light trading) for another week; "average unc" rolls are often available "at bid" (or sometimes a bit less in "lots")--but the few scattered buyers in this area, of course, nearly always request "choice rolls only". The 1972/72 double die has once again edged higher--with choice rolls bid now at \$5850 (\$117 per coin). So far, by the way, copper type coins have not been included in the current strong upswing being enjoyed by the silver issues.

NICKELS: The Jefferson series isn't receiving much more attention than are the Lincolns --with the exception of one dealer's attempts to locate "up to ten rolls" of 1947-S (at \$21), 1948-S (at \$24), 1949-S (15 \$38.50) and 1950-P (at \$33.50). Continuing attempts to locate nearly all grades of circ Liberty and the earlier Buffalos are meeting with minimal success; it looks as if current bid levels (see enclosed MONTHLY SUMMARY) will have to be raised before much material is enticed into the marketplace. Gains for choice MS-65 half dimes are numerous--see page four!

DIMES: The BU roll set (1946-64) of Roosevelts has registered a sudden jump to \$3000 bid--still with none offered for sale. (This is still somewhat below the \$3199 total of the bids for the forty-eight individual rolls.) Specific winners in the series this week were led by a major advance to \$125 bid for the 1948-D roll; also on the plus side were 1946-PDS, 1947-D and 1954-S--with a bit of profit-taking noted for the 1955-D roll. As for the remainder of the silver type issues--dimes thru dollars--a thorough examination of the page four chart is recommended!

QUARTERS: Gains this week for the still advancing Washington rolls include:

1937P - A very scarce roll--bid now at \$735
1941-S - Bid is \$385 this week for this seldom available issue
1943P & 1945P - Bid now at \$106 and \$93 respectively
1947D & 1948D - Two more winners--at higher bids of \$115 and \$94
1949P - Still an "want lists"--now at \$390!
1950S - Another rather elusive roll; \$142.50 is the new bid level

HALVES: The Walking Liberty rolls remain steady at current levels--with the majority of bidding in the 1934-47 group being directed toward gem singles (particularly of the scarce to very scarce fully struck 1940-45 S-mints). The Franklin rolls, too, are practically unchanged--with a few bidders in the market for "one to five" gem single specimens of the earlier dates.

DOLLARS: This segment of the market continues to perk merrily along--with advances again liberally scattered across both the Morgan and Peace charts. The minimum bid is now \$148 for pre-1921 Morgans and \$115 for the 1922-P and 1923-P Peace issues. The 1898-O and 1899-O rolls have jumped to \$190 bid--and the 1900-P & O and 1901-O rolls to \$200 each. The 1924-P roll, by the way, is eluding all bidders at \$155--and indications point to further substantial gains in the coming weeks.

PROOF SETS and MINT SETS: Light to moderate interest in the 1940-42 sets remains evident at present levels--and transactions are few and far between. The 1970 and 1971 "S-less" sets continue to edge higher--with respective bids of \$470 and \$765 recorded this week. There are few if any sellers of the 1977 mint set at the current unchanged bid of \$9.50.

COMMEMORATIVES: The silver issues in MS-60 condition continue to close the gap between themselves and their MS-65 counterparts. As the price difference becomes smaller, it is obvious that more and more collectors and investors will prefer to spend the extra few dollars for higher quality coins. The gold issues are unchanged--but potential buyers are becoming more numerous at current prices (probably not wishing to disturb bid levels until absolutely necessary).

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$157.50 per ounce.

THE COIN DEALER NEWSLETTER

reports the coin market on a weekly basis. Under the present
system, it is impossible to monitor transactions of offers to buy and
sell, but the broad information sources of the Newsletter make it a very
accurate reflection of the market.**INVESTORS NOTE** the prices in the Newsletter are from dealer to
dealer transactions. As an investor, you may place your buy and sell
orders through a dealer for a fee, as you would buy stock through
a broker.

ADVERTISING RATES:

\$10.00 per column inch, four consecutive ads
(no changes) - 10% discount.Advertising space is limited; ads will be placed in
first possible edition.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

COIN										
The following coins (particularly the 5-cent issues) are worth more than listed prices

"GEM MS-65+" GOLD TYPE JOINS ACTIVE BIDDING

Washington Roll Sets "Impossible" At \$7400; Individual Rolls Register Further Gains

The Market in Depth

ALLEN HARRIMAN

The 1941-64 Washington "short set" rolls have been edging forward—slowly but surely—for a number of weeks now. Few is any of the gains made by individual dates have been of a spectacular nature—but "bid" for the sixty-one rolls in the group now totals a bit over \$7750 as opposed to \$6625 recorded at the beginning of this year. The increase represents an advance of \$1125—or about 17%. The highest current teletype bid for the complete BU roll set remains at the recently recorded \$7400—which is substantially below the total of the individual bids (and which is also quite ineffective). As a matter of fact, even the \$190 presently being offered for choice single sets is slightly less than the pro-rated roll prices. There are, by the way, very few of these single sets being listed for sale on the various teletype circuits—at least, truly choice MS-65 sets.

Collectors and investors who are interested in this series must be careful not to put away sets or rolls which contain a few "super sliders". (The earlier S-mints are particularly prone to a bit of "cabinet friction".) Among the nice aspects of the Washington series is the fact that all of the issues can be located in fully struck choice and gem condition—so that putting together a truly nice set is possible—and also still quite reasonable from the cost standpoint.

As was mentioned last week, the current strong teletype bidder in the area of choice and gem "type" has also (in addition to bid ranges for "Gem MS-65+" silver issues) listed buying price ranges for gold type issues in the same ultimate condition. The following is an extension of last week's report. As was stressed previously, only true gems qualify for these prices—and the bidder definitely knows the difference between a Choice MS-65 specimen and a Gem MS-65+! (The regular and frequent bids for MS-65 pieces, of course, are listed in the weekly report at the bottom of this page.)

One Dollar (type I) -----	\$ 650 - \$ 850
One Dollar (type II) -----	3250 - plus
One Dollar (type III) -----	600 - 800
\$2½ Classic -----	3250 - plus
\$2½ Liberty -----	275 - 350
\$2½ Indian -----	300 - 400
Three Dollar -----	1800 - 2100
\$5 Classic -----	4000 - plus
\$5 Liberty (no motto) -----	1500 - 2000
\$5 Liberty (with motto) -----	325 - 400
\$5 Indian -----	650 - 850
\$10 Liberty (no motto) -----	3750 - plus
\$10 Liberty (with motto) -----	400 - 600
\$10 Indian -----	500 - 800
\$20 Liberty (type I) -----	4000 - plus
\$20 Liberty (type II) -----	1400 - 1700
\$20 Liberty (type III) -----	340 - 450
\$20 St. Gaudens -----	340 - 450

higher for 34-P, 35-P, 36-P, 37-S, 39-PS, 40-D and 45-P. In addition, the 1972/72 double die continues to edge forward—with the bid for "choice original rolls" now pegged at \$5900 (singles of the same quality will be taken at \$115—slightly less than the pro-rated roll price.)

NICKELS: Even though bidders have not disturbed current bid-ask levels, increased interest in the eleven wartime Jefferson issues is evident—with an emphasis on the 42-P & S rolls; the few small advances this week have been registered by 48-S, 49-S and 50-P (with minor losses noted for 47-S and 55-P). By the way the first two sales of the rare BU 1949-D/S Jefferson have been noted—one in the Bowers & Ruddy "Fairfield Sale" at \$425 and the second by a dealer to a private collector at \$475!

DIMES: Again led by the 48-D roll (now bid at \$130), several earlier Roosevelts continue to record minor gains; last week's higher bid of \$3000 for the BU roll set hasn't yet resulted in any transactions. In "type", the following higher bids have been registered this week for the Seated Liberty issues in strict MS-65 condition: "stars obverse" \$625, "arrows, 1853-55" \$780 and "legend obverse" \$275. The current very strong buyer for these and other silver type material reports that very few properly graded coins are being received in spite of escalating bid levels.

QUARTERS: The rare full MS-65 "no drapery" Seated Liberty quarter has now reached a bid of \$4000!—with still none being offered for sale to frequent teletype bids. Readers will note that bid for "uncirculated MS-60" specimens is only \$850—which underscores the importance of strict grading for this issue (as well as all other material.) Other gains in choice "type" this week include: \$650 bid for the "no motto" quarter, \$950 for the "arrows, 1873-74" issue and \$275 for "type two-full head" Standing Liberties. See "The Market in Depth" for comments on the Washingtons.

HALVES: Advances are also numerous for "type" half dollars—see page four! A sudden rash of small gains cover practically all of the 1941-47 "short set" Walking Liberty issues—with a higher \$8600 being offered for the complete BU roll set. It has been a long while now since this roll set has appeared for sale on any of the teletype circuits—or, for that matter, practically anywhere else. Those interested in obtaining these twenty rolls almost invariably now have to assemble them one by one!

DOLLARS: Gains continue unabated for the dollars! All issues remain on the very numerous "want lists" which still dominate the tapes—bidders want circ and BU bags, common and scarce date rolls and scarce and rare singles. And even though "choice" and "gem" specimens are wanted by nearly everyone, there are several buyers who are interested in MS-60 coins as well as the better dates in circulated condition. See page six for this week's strong advances.

PROOF SETS and MINT SETS: Except for the usual weekly gains for the 1970 and 1971 "S-less" sets, proof sets remain steady in rather light trading. The 1977 mint set, however, has moved to \$10.50 bid; this set is still the only source for the 1977-P dollar and the most economical way to obtain the 1977-P half dollar. The half is also available in the over-the-counter "souvenir sets" from the Philadelphia mint—but the teletype selling price of this "cent thru half" set is around \$4 (the mint's price tag is \$3).

COMMEMORATIVES: Surprisingly few plus signs have been noted this week as the two major commem bidders have stuck with the previous week's buying lists. Gains have been recorded for the 1916 McKinley gold issue—and several hopeful bidders continue to offer "bid" for the remainder of the issues in this eleven piece set.

This Week's Market

CENTS: A number of the earlier Lincoln rolls are once again being asked for by one major roll bidder—"choice rolls only", of course; prices have edged slightly

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$155.80 per ounce.

BU ROLLS

Refer to "Early Singles" above

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full step" rolls (when available) bring higher prices. In the Mercury series, "gem, series bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

ACTIVE BIDDING COVERS MOST MARKET CATEGORIES Mercury, Roosevelt And Washington Rolls Register Numerous Advances

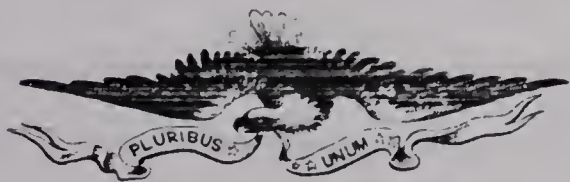

The Market in Depth

ALLEN HARRIMAN

As the end of the year approaches, virtually every area of the market is reflecting a healthy glow. From the newly awakened MS-65 type material thru the still extremely popular silver dollars, "want lists" continue to dominate teletype activity--with commemoratives, BU rolls, circ dollars, proof sets and mint sets all enjoying moderate to strong bidder interest. In addition, the scarce and rare circulated dates in the various series from Indians thru Walking Liberty halves regularly appear on the buying lists of a number of dealers--with bid levels continuing to edge forward on a regular basis. From all appearances, it seems that dealer supplies of most of this material is quite limited--and those dealers who do have the properly graded coins which are in demand generally have attached price tags somewhat in advance of even today's advanced bid levels. It is not uncommon, by the way, to see teletype messages stating that material recently offered on the circuits has "just been sold over-the-counter." When particularly desirable material is offered on the tapes, it is usually necessary for potential buyers to "act fast"--and immediate sales are often completed by telephone to save time.

There are, however, a couple of categories in which buyer interest is currently minimal. Copper and nickel type coins have yet to join the MS-65 buying lists (even though choice and gem specimens continue to bring top dollar at auction). Also, buying attempts in the circulated type coin market are light and scattered--and mostly fall into the "bargain hunting" classification. There are a few dealers who want quantities of specific types such as large cents, two-cent and three-cent nickel pieces, twenty-cent pieces, Bust halves, etc.--and they do occasionally edge bids slightly forward. Additionally, a few bidders are interested in type material in the XF thru MS-60 range--but, in almost all cases, they are sticking to established bid levels.

The major area of the market which is presently receiving the least attention overall is proof material. Bid-ask ranges have remained virtually unchanged for many months now; offerings of proof coins create very little attention unless they are described as "gem" or "superb"--and also priced reasonably. Even at auction, most proof coins are "taking a back seat" to choice/gem circulation strikes--unless they are of truly outstanding quality (and preferably with attractive natural toning). It should be mentioned that there are at least a few investors (and, perhaps, a few dealers) who are putting away some of their favorite types and dates in choice proof condition--with the reasonable expectation that proofs will once again "have their day." After all, past history has shown that each and every area of the market eventually enjoys at least moderate attention--and the proof type coin market has certainly been "hot" in the past! (When such a move will occur is actually more of a question than if it will occur.) Numerous recent instances of truly choice proof coins changing hands at quite reasonable prices have been recorded--on the teletype circuits, over bourse tables and even at auction.

This Week's Market

CENTS: Gains have been noted for a number of the earlier half-cents and large cents in G/VG condition; even the least expensive of these types are surprisingly difficult to locate on the teletype circuits--at least, in completely defect-free condition. After last weeks small rash of plus signs, only the 41-P and 41-S rolls have moved ahead this week--with the remainder of the Lincoln series steady in very light trading. Choice single 1972/72 double dies are now receiving bids as high as \$120--with the roll (in the same condition) now wanted at \$5950.

NICKELS: There are numerous potential buyers of semi-key and (especially) key date Liberty and Buffalo nickels in "any grade." Frequent buying lists produce very few sales of such dates as 1885, 1886, 1913-D & S (II), 1914-D--and the 1937-D "3-legged" (which has now moved up to \$53 bid for specimens in Good condition!) Mild interest continues for all of the wartime Jefferson rolls--but bidders are still content with the current price structure; a few single sets have changed hands around \$25. The remainder of the nickel rolls are unchanged--again in light trading at best.

DIMES: Advances this week for the still "hot" Mercury rolls include the following:

1937-D - Several bidders want this one--at a higher \$2200 (with one buyer even willing to pay \$100 more!)

1938-D - Still very elusive--now bid at \$950.

1940-D & S - These two have moved up to \$340 and \$195 respectively.

1941-D - Bids of \$350 have proven ineffective thus far.

1942-D & S - Respective bids of \$380 and \$425 have produced few if any transactions.

1943-S - Bid has advanced to \$250 (with one hopeful bidder offering \$300 for a "gem, full bands original roll").

Gains for the Roosevelts include: 47-D (\$68), 48-D (\$135), 49-D (\$195), 51-D (\$31) and 55-P (\$37).

QUARTERS: A major jump to \$120 bid has been noted for the scarce 1948-S roll (up \$28!)--with the following advances noted for other escalating Washingtons:

1939-D - A tough roll--now bid at \$750.

1943-D & 1944-D - Respective bids of \$210 and \$150 are now in effect.

1945-P & S - Both of these are wanted at a higher \$98.

1947-P - The second scarcest P-mint in the '41-'64 group; bid at \$125 this week.

1949-P - Still wanted in quantity--now at \$405.

1950-S & 1951-S - Bids advance to \$150 and \$220 respectively.

HALVES: The half dollar rolls seem somewhat overlooked in view of the activity in the dimes and quarters. The Walkers are completely unchanged--even though there are several dealers who want "quotes" on choice rolls and singles (particularly the 1934-40 P-mints and all of the "short set" issues). This week's few changes for the Franklins include: 51-P (\$120), 51-S (\$225) and 55-P (\$109)--with a small loss noted for 52-S (now in the \$235-\$255 range).

DOLLARS: Again, MS-60 and MS-65 singles as well as rolls have continued to forge ahead without interruption. This week's strong gains are far too numerous to enumerate here--check page six carefully!

PROOF SETS and MINT SETS: All of the early 1937-42 proof sets have suddenly moved ahead--with this week's higher bids resulting in very few sales of the choice sets which are wanted. Many of the extant sets have "problems" of one sort or another and, therefore, do not qualify for the MS-65 category. (Natural toning, by the way, should not be considered a detracting feature.) The two S-less sets (1970 & 1971) continue to edge forward--with "quotes" on the rare 1968 version being requested. The 1977 mint set is now wanted in quantity at \$11.

COMMEMORATIVES: Plus signs are considerably more numerous this week for both the MS-60 and MS-65 silver issues--with particular emphasis being placed upon the Arkansas, Boone, Oregon, BTW and W-C issues. Again, even though bid prices have yet to advance, interest in all of the gold comms remains strongly evident at present bid levels.

U.S. GOLD. (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at: \$160.00 per ounce.

COMMEMORATIVES

MS-60 coins are average UNC—they may have bag marks or handling marks but no wear and may not have had mint marks.
MS-65 coins are choice fully struck specimens without detracting marks—they may be brilliant or have a good toning.

BU ROLLS

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

SILVER DOLLAR ADVANCES CONTINUE UNABATED

Silver Commems & BU Rolls Move Ahead; '77 Mint Sets Reach \$11.50 Bid

The Market in Depth

ALLEN HARRIMAN

Buyers continue to outnumber sellers on the teletype circuits by a substantial margin. Without a doubt, of course, silver dollars are still cornering a major share of this action—with plus signs once again thoroughly scattered across this week's charts. As when any particular area of the market is truly "hot", sellers are well aware of the strong demand—and accordingly attach price tags which keep somewhat ahead of the advancing bid levels. As a matter of fact, if a current selling list includes silver dollars with prices at or perhaps a bit below present levels, potential buyers tend to be suspicious of the quality of the coins being offered! In other words, it is apparent that most buyers expect properly graded silver dollars to be priced ahead of the levels which they are currently offering to pay! For the scarce and rare MS-65 or better singles, many serious bidders simply ask for "quotes"—and, of course, auction results continue to set price records at session after session—reinforcing this general outlook.

Another area in which dealers often feel fortunate when they manage to even get a "quote" is for choice BU early dates in the extremely popular twentieth-century series. Additionally, some very impressive prices are being offered for "strictly MS-65+ gems" in the Lincoln cent thru Walking Liberty half dollar series. More and more research regarding scarcity, strike, "sleepers", etc. in these series is being conducted—and when accurate information regarding these facts is published it simply "adds fuel" to an already "hot" market! It might be mentioned here that an important two-part indepth analysis of the Barber quarter series will begin with next week's December issue of the "MONTHLY SUMMARY"—to our knowledge, the first such published information about this series on which so much attention has recently been focused.

Scattered dealers continue their efforts to locate quantities of circulated type material. However, as was explained last week, virtually all of the current bidders are convinced that their is no need to raise bids in this area at this time—since the vast majority of teletype activity is presently centered elsewhere. As a matter of fact, two or three major buyers are running frequent and extensive "want lists" for circ type—offering to pay five (or even ten) percent less than bid for quantities of any or all of the coins on their lists. Few sellers, it should be added, are responding to this bargain-hunting technique. It hasn't been that long since properly graded circulated type coins were very "hot"—recording major gains week after week—and there is no reason to believe that the current market climate in this area will remain quiet indefinitely. Perhaps this is the thinking behind today's attempts to buy at or below established price levels!

There is, in addition, one segment of the "circ market" which is considerably stronger than "type". There is definite interest at present in dated material in the Barber and later series—particularly for Fine to XF specimens. Locating specific dates in these series is often quite a problem—especially for those dealers who are helping their clients assemble, say, a complete set of Barber halves in uncleaned and defect-free VF/XF condition. Even while the circulated coin market has been generally stagnant, bid prices for dated pieces in these later series (including Buffalos, Mercuries, Standing Liberty quarters and Walking Liberty halves) have been edging forward in a steady and orderly manner. Next week's "MONTHLY SUMMARY" will, of course, report the latest gains registered by all series from the Flying Eagles thru the Walking Liberties. A comparison of January prices with the December listing will show that not all of 1977's increases were monopolized by the silver dollar market!

This Week's Market

CENTS: Another minor rash of small gains has been noted for several Lincoln rolls—mostly pre-1941 issues. Interest in the 1972/72 double die seems to be widening; more buyers have entered the market and offers to pay as much as \$127 for Choice MS-65+ specimens have been monitored this week (rolls are now wanted at \$6050). Quantities of Good/better large cents are in demand at a slightly higher \$3.60 per.

NICKELS: A few of the wartime Jefferson rolls have edged a bit higher—and the eleven date BU roll set is eluding all bidders at the present level of \$900 bid. ("Gem, full steps" single sets will currently bring about \$30—providing each coin is of top quality.) In view of recently increased interest in pre-1941 rolls, the Buffalos are strangely quiet; very few rolls, however, are finding their way onto today's selling lists.

DIMES: Pacing the Mercury market, the extremely elusive 1937-D roll is now receiving frequent bids of \$2300! Other gainers in the series this week include: 1938-D (\$965), 1941-D (\$360) and 1943-S (\$265). "Gem, full bands" rolls of any date will bring ask or more—but such rolls, of course, are now very few and far between. The very active 1948-D Roosevelt has reached \$140 bid—with smaller gains noted for a few other dates (see page three).

QUARTERS: Even though the highest teletype bid for the 1941-64 Washington BU roll set remains at \$7500, bid for the sixty-one individual rolls now totals almost \$7900. Numerous advances have again been noted for the 1941-50 issues—and the price tags on the scattered rolls offered usually remain just ahead of the bidders attempts to buy. By the way, several of the pre-1941 singles have recently been edging higher—but even so, sales of strictly MS-65 pieces have been quite limited. "Good or better" twenty-cent pieces are now being asked for in quantity at an advanced \$28.

HALVES: Bust halves in G/VG are also wanted in quantity—with defect-free examples bid this week at a higher \$14. (Actually, these halves seem more readily available in F/VF condition than in the lower grade.) Very few and only minor changes have been registered by the Walking Liberty and Franklin rolls—however, as mentioned last week, there are several dealers who are trying to locate "gem singles" in both series (with only a minimum of success).

DOLLARS: Thus far, activity in both the Morgan and Peace series shows no signs of slowing. "Want lists" remain lengthy and continue to occupy a major share of teletype trading time. Advances in the MS-60 column this week are easily as numerous as in the MS-65 category—and BU rolls are enjoying at least equal bidder attention. The "hot" 1925-P roll is now wanted for as much as \$310 (with the occasional seller asking \$335-\$350); the 1924-P roll is gaining momentum—with bids now recorded as high as \$190. One dealer, by the way, has offered to pay "over \$250 each" for a few "strictly gem fully struck 1891-O's! Other particularly sought after MS-65 or better Morgan singles include 1884-S, 1885-S, 1886-O, 1890-O, 1892-P & O, 1893-P, 1897-O and 1904-P (check page six carefully!)

PROOF SETS and MINT SETS: Again the 1970 and 1971 "S-less" sets have registered gains—bids are now \$525 and \$835 respectively. The 1973-S and 1977-S sets are experiencing moderate demand—and the 1977 mint set has moved ahead once again (to \$11.50 bid).

COMMEMORATIVES: Steady and orderly advances continue to be noted for the silver issues—led this week by the Oregon issues. Several dealers still want choice gold commems—but, so far, they have resisted moving bid levels to higher ground.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$152.10 per ounce.

figures on \$4.80 per oz. spot price.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-65 coins are choice fully struck specimens without detracting marks—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MARKET CLOSING PRICES BU SILVER DOLLARS

Coins MS 60 or higher are worth more than the MS 60 prices below. Roll prices are for average strikes for the issue. Choice full MS 60 rolls usually bring more than the listed prices. Large and rare date rolls should be figured on the basis of the quality of the individual coins involved.

WASHINGTON QUARTERS LEAD BU ROLL ADVANCE Notes On Circulated Walking Liberty Half Dollars

The Market in Depth

ALLEN HARRIMAN

During the past year or so, steady and orderly buying interest in the earlier circulated Walking Liberty halves has become more and more evident. Not only do teletype dealers run frequent buying requests for specific dates in the Fine/Extremely Fine range, but dealers at various shows report that keeping any sort of stock of the higher circ grades is quite a problem. It is obvious that investor and collector interest in this series is not limited to those who can afford the scarce and rare (often very rare) Choice MS-65 pieces—numerous higher grade sets are being currently assembled.

The pre-1933 dates present a rather interesting situation. With only three exceptions, all of the 1916-29 issues are bid at \$21 or less in Fine condition—and in VF condition the top bid is \$80 (again excluding the same three dates). These three dates, of course, are the low mintage 1916-S, 1921-P and 1921-D. Even including these three “keys”, the total bid for the twenty-five coins in the 1916-29 group in Fine condition is only \$353; in VF the bid moves substantially—to \$965—based mainly, of course, on the quick escalation of price for the three above mentioned key dates and the 1917-S (obv.), 1919-PDS and 1921-S. The true XF set, naturally, is far more desirable—and far more difficult to put together. The present bid for the 1916-29 dates in this condition is a rather impressive \$2926—which indicates the true scarcity of high date specimens. One dealer recently remarked that strictly XF early “Walkers” were so scarce because such a large number of the extant pieces had been “whizzed” or otherwise processed in years past to resemble AU or Unc coins. This, without question, is particularly true for the key issues which are worth so much more for a slight improvement in grade. (Consider that the 1921-S is bid at \$80 in VF, \$625 in XF and \$2000 in AU condition!) More strict grading standards—coupled with considerably more knowledgeable and educated buyers—have more or less alleviated this problem now. However, a large percentage of the strong VF and true XF early dates had already suffered this fate!

There are several early dates which, at this point, are still bid at quite reasonable levels in VF and even XF—issues which are still very few and far between in properly graded condition. Among the dates in this category are 1916-D, 1917-D (rev.), 1918-P, 1923-S, 1927-S, 1928-S and 1929-D & S—in addition to the larger mintage 1917-P, 1917-S (rev.), 1918-S and 1920-P & S. At present price levels, these dates are not as easy to locate as current bids would indicate—that is, in correctly graded, defect-free and not harshly cleaned condition. The 1927-S and 1928-S issues, especially seem extremely elusive in true VF, XF and even AU—even though the VF bid is in the \$7-\$8 range and XF in the \$33-\$37 range.

Teletype buyers are very often disappointed with the grading of the earlier Walking Liberties offered on the circuits—and many returns are noted. This particularly applies to the numerous dates which were poorly struck in the first place. As has been aptly pointed out, some notoriously weak strikes seem to go directly from AU to VF condition as soon as the luster disappears—the coin not having had much head, hand or breast feather detail originally! A sharply struck XF 1921-S half, as an obvious example, is, as they say, “a rare animal”! Indications are that from strict Fine thru nicely or fully struck XF condition, the circulated early Walking Liberties will continue to be popular coins with both collectors and investors—and that recent steady “promotion-free” advances will continue for quite a while yet!

This Week's Market

CENTS: Lincoln rolls were relatively quiet this week. The 1972/72 double die is still wanted by several major bidders.

NICKELS: Wartime Jefferson rolls are again edging higher. One major bidder has pushed many of his bids up a dollar or two. The 1943-D roll is wanted at a higher \$70. The 1944-S is wanted at a higher \$88.00. It's interesting to note that the scarce 1954-S/D, which has been quiet for quite awhile, is now in strong demand by several bidders at the current “bid” price of \$26.00.

DIMES: Many of the earlier Roosevelt rolls are wanted at slightly higher levels. However, the Mercury rolls are receiving the most attention. The rare 1937-D roll is bid at a higher \$2350.00 with none being offered. The 1943-S roll is up \$35 to \$300 “BID”!

QUARTERS: This week the Washington quarter series was pushed into the spotlight by several anxious bidders. Lengthy buy lists for all the 1932 to 1953 issues are meeting with little success. Several of the early 1932 to 1940 singles have edged higher (See Page 2). Nearly all of the 1943 to 1953 rolls are wanted at higher levels. Advances include:

1939-D up another \$50 - now bid at \$800
1943-D & 1944-D - Now bid at \$230 and \$160 respectively
1943-S - Now bid at an impressive \$400!
1947-P - This scarce roll moved up to \$135 “bid”.
1949-P Wanted by several bidders at a higher \$425
1950S & 1951S - Now bid at \$165 and \$230

HALVES: While there are several major bidders for Walking Liberty singles and rolls, most of the bids are at current levels. There is one major buyer for all Franklin rolls. The 1950-P, 1951-P, 1953-P and 1953-S rolls are all higher. The 1977-P half dollar roll is bid at a substantially higher \$40! This issue (along with the 1977-P dollar) is currently very volatile so check around before making any commitments.

DOLLARS: Morgan and Peace dollars are still very strong but, the “common” BU rolls appear to have leveled off somewhat. While there are lengthy buy lists for “common” rolls at or near “BID”, there are also several sell lists at the “ASK” level. Perhaps this “red hot” area of the market has temporarily found a stable trading range. The scarcer single dates are still being sought at even higher levels. A few of the most sought after issues include the 1878-CC which is wanted both by the roll and as single pieces. The 1885-S is wanted in “strict MS-65” condition at a higher \$75.00.

PROOF SETS and MINT SETS: A few of the 1952 to 1958 proof sets have edged forward in a bit of holiday buying. Both the 1970 and 1971 “S-less” sets are slightly higher. There is one bidder for the 1975 “S-less” dime set at \$4000! He is a major proof set dealer who claims this newly discovered set is “for real”.

COMMEMORATIVES: Most of the silver commems remain in demand at current levels. Only the 1928 to 1937 Oregon issues and the scarce Alabama 2 x 2 are bid higher in MS-65 condition. Several dealers are now interested in “buying quantities” of the gold issues in MS-65 condition.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$159.80 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES:

\$10.00 per column inch; four consecutive ads (no changes) - 10% discount.

Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster. MS-65 coins are choice fully struck specimens without detracting marks—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices. "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

SILVER DOLLAR BLAZE CONTINUES

Analysis Of 1977 Silver Dollar Market -Part 1

The Market in Depth

DAVID HALL, guest columnist

As 1977 ends and 1978 begins, every area of the market enjoys strong demand from numerous bidders. Both gold and silver commemoratives are being actively sought at current levels. All BU rolls, cents thru halves, are in demand, several at higher levels. While quiet this week, the BU type coin market has experienced numerous gains during the past several months. The Proof Set market has suddenly become "alive" (see page 6). All Choice gold coins are in strong demand. Coins in every modern series, Lincoln Cents thru Walking Liberty Half Dollars, are wanted in all grades, especially the elusive Ch. BU MS-65 specimens (check the gains in this month's summary). While the entire coin market looks as strong as ever, one area of the market stands alone in dealer buying activity that can only be described as "frantic". The Morgan and Peace dollar market enjoyed record price gains in 1977 (check page 6 for this week's numerous gains) and the following is a special two-part analysis of those gains.

Circulated Morgan and Peace Dollars experienced gains during 1977 (especially key dates such as 1889-CC, 1893-CC, 1893-S & 1895-O). Unc (MS-60) dollars also were overall gainers in 1977. But the thrust of the buyer demand was concerned with the Ch. BU MS-65 (and better) grade specimens. Many issues were up 50% to 100% in the elusive MS-65 category. The average price increase for MS-65 Morgan and Peace Dollars was 38%!!! The following analysis will concentrate on MS-65 prices.

LOSERS: Only 5 issues went down in price in 1977. Two of those issues had doubled or nearly doubled in price in 1976. The other 3 issues are very scarce at current levels and were possibly overlooked in 1977 as dealers fell over each other trying to be the "top bid" on the elusive O-mints. The 1892-S is down 5% (\$500) from its January 1977 bid. The 1896-S and 1898-S are down 3% and 15% respectively. After doubling in price in 1976, the 1924-S is down 3% in 1977. The 1926-S is down 8% in 1977 after gaining 90% in 1976. The 1896-S, 1898-S, 1924-S and 1926-S are all "Redfield" dates.

COMMON ROLLS: The price of common BU dollar rolls has been tied to the price of silver since they (and all other silver coins) ceased to circulate in 1964. The significant development in the 1977 silver dollar market was "common" BU rolls becoming "uncommon", breaking away from and rising independently of the price of silver bullion. The average gain for common BU dollars rolls was 33%!! The rolls which gained the least were, suprisingly, 5 of the scarcer rolls. The 1879-P (6%), 1880-P (7%), 1882-P (8%), 1890-P (8%), and 1898-P (5%) were modest gainers in 1977. The biggest gain by a "common" BU dollar roll was experienced by the 1900-P (up 69%). The 1888-P roll was not far behind, posting a 67% price increase in 1977. Other big winners included the 1882-O (53%), 1884-P (51%), 1888-O (58%), 1889-P (39%), 1896-P (48%), 1898-O (49%), 1899-O (56%), 1900-O (37%), 1901-O (47%) and 1902-O (40%). The early S-mints were all up substantially (1878-S 43%, 1879-S 43%, 1880-S 46%, 1881-S 32%, 1882-S 27%). All the remaining "common" dates were up between 14% and 27%.

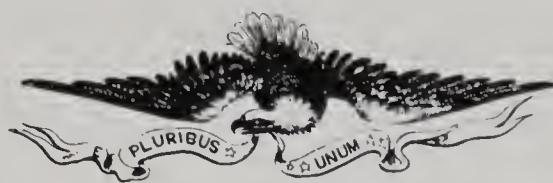

O-MINTS: The scarce New Orleans issues had a tremendous price surge in 1977. There are 14 "better-date" New Orleans dollars. Their average price gain was an unbelievable 106%!!! The 1879-O continued to demonstrate its scarcity. After gaining 57% in 1976, the 1879-O gained 50% in 1977. The elusive 1880-O (a "common" roll 4 years ago) gained 67% in 1977. The 1886-O, after gaining 76% in 1976, was up a whopping 162% (\$300!) in 1977. The 1887-O gained

momentum after a 42% gain in 1976 and gained 57% in 1977. The 1889-O, after gaining "only" 41% in 1976, gained an incredible 189% in 1977---nearly tripling in price!! The 1890-O more than doubled in 1977 with a 125% price increase. The biggest winner of all silver dollars in 1977 was the 1891-O. After doing well in 1976 (35% gain), the 1891-O exploded in 1977. In January of this year MS-65 1891-O dollars were bid \$46.00. This week's bid is \$200! The 1891-O more than quadrupled in price in 1977!! That's a mind-boggling increase of 335% in one year. After gaining 74% in 1976, the 1892-O more than doubled in 1977, gaining an incredible 165%. The rare 1893-O gained a substantial 47% (\$375.00) in 1977. The 1894-O, a 46% gainer in 1976, exactly doubled in price in 1977. The rarest O-mint of all, the 1895-O, gained 13% (\$250.00) in 1977. This coin is so infrequently encountered that most bidders simply ask for a "quote". They seem to feel that raising the bid price won't help them or their clients buy the coin. The rare 1896-O, following a strong 70% gain in 1976, gained 147% (\$535.00!) in 1977. The 1897-O "edged" up 23% in 1977 after soaring 62% in 1976. The 1903-O, again this year, gained little (3%).

CARSON CITY ISSUES: The average price gain for the 13 Carson City issues during 1977 was 21%. The total bid for the 13 issues also increased 21% (\$6546 vs \$5392). In 1976 they gained 18%. The biggest Carson City gainer of 1977 was the 1878-CC, up 40%. Not far behind was the 1881-CC with a 28% gain and the rare 1889-CC with a 27% gain (\$850.00!) Other substantial gainers were the 1880-CC (26%), 1882-CC (24%), 1883-CC (24%), 1884-CC (24%), 1885-CC (21%) and 1890-CC (25%). The 1879-CC, 1891-CC, 1892-CC, and 1893-CC did not fare quite as well, posting gains of 13%, 8%, 11% and 9% respectively.

PHILADELPHIA ISSUES: The 13 "better" date Philadelphia Morgan dollars showed a very substantial average price increase of 43% in 1977. The biggest winner among the Philadelphia issues was the 1904-P with a gain of 144%!! This scarce issue is up again this week (see page 6) yet, the higher bid is going unanswered. The 1892-P was the second biggest Philadelphia gainer for 1977---up 70% from January of this year. The ultra scarce 1901-P was up \$900 (69%) in 1977. The 1902-P and 1903-P were up 63% and 58% respectively. All four Philadelphia issues 1901 thru 1904 were big winners in 1977. In fact their average price increase was 83%!!! Other big Philadelphia gainers were the 1878-7TF (43%) and the 1891-P (41%). The 1893-P (21%) and the 1894-P (23%) posted modest gains. The 1878-8TF, 1878-7/8TF, 1895 PROOF, and 1899-P were up slightly, 9%, 8%, 4% and 3% respectively.

(PART 2 will appear in January 6 issue)

THIS IS THE LAST CDN ISSUE OF 1977; YOUR NEXT COPY
WILL BE DATED JANUARY 6, 1978. HAPPY HOLIDAYS!

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$159.90 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

\$10.00 per column inch, four consecutive ads
(no changes) - 10% discount
Advertising space is limited; ads will be placed in first possible edition.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices. "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

U.S. GOVERNMENT PRINTING OFFICE: 1964 O - 350-000										
The following table lists the prices of U.S. coins (particularly the S mint issues) are worth more than listed prices
